Queen Creek Emergency Communications Group Net reminder
When: Sunday, 05 March 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 449.325 (-) PL 100, 449.325 Simplex if Repeater Fails

Notes: The Queen Creek Emergency Communications Group will hold its weekly radio net Sunday evening at 2100 hours (9:00 PM). All are welcome to check-in on the first Sunday of the month. Only Regional Net NCS are required on all other Sundays of the month. The acting Net Control Station (NCS) will usually be announced in advance.

4271. Some Repeater Notes

Yahoo group: Queen_Creek_Hams
Date: 2017-03-06 04:20:08 UTC
From: Joe Sammartino
Topic: 4271 Message: 4271

Some don't ts for repeater operation:

1. Do not setup a cross band link to any coordinated repeater without permission from the repeater trustee.

2. Do not setup any VoIP or Radio over IP link to a repeater without permission from the repeater trustee.

3. Always IDENTIFY when accessing any repeater. Repeaters are not usually the proper place to test out equipment but, if you must, always identify and call for assistance.

Regards,

Joe, N2QOJ

4272. Arizona Emergency Net - Maricopa, Monday, 06 March 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-03-06 15:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4272 Message: 4272

Arizona Emergency Net - Maricopa reminder
When: Monday, 06 March 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Date: 2017-03-07 05:51:48 UTC
From: Dave Martin
Topic: 4254 Message: 4273

Good Evening All,
EVQRP's next gathering in the park will be this coming Wednesday evening at 17:00hrs. We will meet in the back of the park near the restrooms across from the baseball field. Last week Andy joined us in the park and we got his new buddistick tuned up for 10m & 20m. Andy's first contact was to Calgary and while talking to the gentleman from Calgary and telling him about his portable station W3FF broke into the QSO. For those that might not know the call sign, W3FF is Bud Drummond, the co-owner of Buddipole. Andy had a very nice QSO with Bud. It's really surprising that you never know who you are going to have a QSO with when you make that contact. I hope to see all of you there at the park on Wednesday evening. We will be monitoring the Ocotillo repeater if you need help finding us. Take care and have a great week

From: Dave Martin
Topic: 4254 Message: 4284

Greetings All,
This week's EVQRP gathering will be held on Tuesday evening at Desert Mountain Park. As we usually do we will meet in the very back across from the baseball field and close to the restrooms. We will start to gather around 17:00. We are usually there around 3-4 hours. We will have a couple of stations set up like we normally do. Last week Rick made a contact with K0STH outside of St. Louis MO. K0STH (Christian) does a weekly podcast called 100 Watts and A Wire. His podcast covers different topics each week and is usually 40-45 minutes in length. He also has a Facebook following by the same name and they issue ID numbers which is used when you make contact with another member from the group. Both Rick and I had a very nice QSO with Christian and I did exchange numbers with him and will be sending a QSL card his way. If you have any antennas that need to be tuned bring them to the park and we can help you with that. Last but not least, we have a new Amateur Extra in the group, congratulations goes out to Troy (K7TJK) on passing his Amateur Extra at the QCECG meeting on Thursday night, way to go Troy. Next time you see Troy give him a pat on the back. I hope to see all of you on Tuesday evening at the park. My family is kidnapping me on Wednesday and we will be doing a road trip to either the Grand Canyon or Colossal Cave for spring break. I wanted to get in another evening of radio before our trip. Stay safe everyone and I hope to see you tomorrow evening.

Subject: QCECG Invited to Fire Station Ribbon Cutting

Good day, folks -

QCECG has been officially invited to participate in the ribbon cutting ceremony for the new fire station #1. Hope to see you there. Please wear your QCECG vest, if you have one.

Here are the details:

The Town of Queen Creek is hosting a ribbon cutting ceremony for Fire Station 1, the replacement fire station in Town Center, on Wednesday, March 29 at 4:30 p.m. Tours of the new facility will be provided immediately following the ceremony. The ribbon cutting will be held on the south side of the new fire station, located at 20678 E. Civic Parkway.

Fire Station 1 Ribbon Cutting

Date:03/29/2017 4:30 p.m. - 5:30 p.m.

Location:

Fire Station 1 <http://www.google.com/maps?f=l&hl=en&q=20678+E.+Civic+Parkway%2c+Queen+Creek%2c+Arizona+85142>

20678 E. Civic Parkway <http://www.google.com/maps?f=l&hl=en&q=20678+E.+Civic+Parkway%2c+Queen+Creek%2c+Arizona+85142>

Queen Creek, Arizona 85142 <http://www.google.com/maps?f=l&hl=en&q=20678+E.+Civic+Parkway%2c+Queen+Creek%2c+Arizona+85142>

A flyer is attached.

4289. SDR dongles / radios?

Yahoo group: Queen_Creek_Hams
Date: 2017-03-17 21:25:05 UTC
From: Jay
Topic: 4289 Message: 4289

Who is using this tech in their shack that would be willing to put on a demo?
I would love to see how these cheaper $20-40 USB dongles are being used in the shack, as well as the more expensive SDR play or even the FLEX series rigs.

I want to learn a bit more about them and would love to see how any of you are integrating this technology into your ham station.

I will be happy to bring the coffee / tea or ice water!

Thanks - Jay N1RWY

Folks,

If you select the Ubiquiti Titanium Bullet from the link provided in the attachment, you do not have to order a separate PoE adapter.

An adapter is included with the Titanium Bullet.

Hi Jay,

Check out the following link. I was using one about 3-4 years. It was great. Using a simple inverted V from the top of my 2nd story I could easily pick up up Ukraine, South America, Most of the U.S. and occasionally Japan on 40, 20 and 10m.

I have a problem with the radio and no room for a antenna at my new place so I haven't messed with it but it's a great board and awesome support.

I had the same idea some years ago. I wanted to feed many sources of audio to my PC - Scanner, HF Audio, VHF APRS, VHF Air, etc.

I found (3) AV switch boxes intended for multiple gaming consoles at a really low price. I decided to use one of them as multiple input to the PC and another as multiple output from PC. Since each position has FOUR connectors - (3) RCA and (1) 4 pin din, the combinations of audio/ptt/spkr/phones/CAT connections are many. I'll post pics of the box at the QC Hams Yahoo Group. Andy,
It is beautiful! I don’t understand why these aren’t made with replaceable batteries (according to the questions). Well, I do understand why as they want repeat buyers. But it is nice to see how they laid it out.

Design and esthetics are nice however, two 10w panels are not all that practical as you are talking .5 amps / hr each panel.
You can only adjust the angle on one of the panels, so you would not see the full .5 amp either.
However, assuming 1 amp / hr in full sun. 8-10 amps of charge for a full day.

A 175W battery isn't all that large, 175W/12v = 14.5 amps.

$478

Meanwhile:
A 100W panel at 6 amps per hour will produce 48-60 amps in the same time frame. $120
A 10 amp solar changer $50
A 20 amp battery $40 ish.
USB/12V connections $10
100w 12-120V inverter $40

$260

From: Joe Sammartino
Topic: 4285 Message: 4300
Attachments: 1 described; binary payloads are missing from this source WARC

Good day, folks -

QCECG has been officially invited to participate in the ribbon cutting ceremony for the new fire station #1. Hope to see you there. Please wear your QCECG vest, if you have one.

Here are the details:

The Town of Queen Creek is hosting a ribbon cutting ceremony for Fire Station 1, the replacement fire station in Town Center, on Wednesday, March 29 at 4:30 p.m. Tours of the new facility will be provided immediately following the ceremony. The ribbon cutting will be held on the south side of the new fire station, located at 20678 E. Civic Parkway.

Fire Station 1 Ribbon Cutting
Date:03/29/2017 4:30 p.m. - 5:30 p.m.
Location:

Fire Station 1
<http://www.google.com/maps?f=l&hl=en&q=20678+E.+Civic+Parkway%2c+Queen+Creek%2c+Arizona+85142>
20678 E. Civic Parkway
<http://www.google.com/maps?f=l&hl=en&q=20678+E.+Civic+Parkway%2c+Queen+Creek%2c+Arizona+85142>
Queen Creek, Arizona 85142
<http://www.google.com/maps?f=l&hl=en&q=20678+E.+Civic+Parkway%2c+Queen+Creek%2c+Arizona+85142>

A flyer is attached.

4303. EVQRP Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-03-19 20:34:07 UTC
From: Dave Martin
Topic: 4303 Message: 4303

Greetings All,
Our next gathering will be this coming Thursday evening at Desert Mountain Park at 17:00hrs. We will gather in the rear of the park across from the baseball fields just south of the restrooms in the pavilion. Last week we spent most of our time trying to get Christi's FT-897 programmed and operating. Sad to say we think she has a receive issue on the VHF/UHF side. We didn't think to try hf. Christi, if you would like to bring it this week we can do hook it up to and hf antenna and give it a try. Like always we will have several stations set up running several different modes. Feel free to bring a radio or what ever you have and spend some time playing radio with us. I always have a great time and I take away something everytime we have a gathering. This week I will bring water due to the rise in temperature over the last couple of weeks. We will be monitoring the Queen Creek repeater 449.325 (-) 100.0 pl. If you should need directions that will you will find us. I hope everyone has a great week and I hope to see you there Wednesday evening for some good fellowship and playing radios. Also, if someone in the group wants to take an upgrade test or if you know someone that would like to test or upgrade I will have my VE box with me and we do have enough VE's in the group to conduct a VE test session at the gatherings

4304. Arizona Emergency Net - Maricopa, Monday, 20 March 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-03-20 15:58:19 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4304 Message: 4304

Arizona Emergency Net - Maricopa reminder
When: Monday, 20 March 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4307. Re: [Queen_Creek_Hams] SDR dongles / radios?

Yahoo group: Queen_Creek_Hams
Date: 2017-03-23 20:16:26 UTC
From: Norm Johnson
Topic: 4289 Message: 4307

Hi Jay,
I'm somewhat into lower end cost wise and higher end performance SDR. I've been playing with several versions of SDRStick (http://sdrstick.com/), which is more of a developers platform. Currently using SoCkit (FPGA) and CV-A9 (FPGA) with TX2 (transmitter) and HF2 (receiver) as my main shack rig. The FPGA is the processing platform with separate xcvr xmtr using 16 bit dac adc. The FPGA programming does all the math operations for signal processing and feature definitions which defines how the radio works.
Of course most SDRs including dongle type require some type of additional processing thing like a PC to provide the human interface for that knobs, dials, and switches to make it seem or look like a radio. There are several Windows or Linux programs that can do this, like PowerSDR or HDSDR and several others. Some of these applications are now moving to Raspberry Pi or other SBCs.
It's all plug and play so to speak.
The SDRStick with TX2 is a low power QRP SDR, 300mW, which is just fine for JT9 or JT65 work. However, add a 5 watt linear to work above the noise floor. If you're into DX, then feed the 5 watt linear into 2nd 50 watt linear to work the DX pile-ups.
The SDRStick without the TX2, and either the HF1 or HF2 is a high performance receiver. This could be a second receiver to augment your main transceiver in the shack.
There are several FPGA platforms to chose from depending on your need for performance. The CV-A9 has embedded A9 processors which are not used (programming developed) to do additional functions such as a linux server for human interface.
This SDR isn't exactly portable, its a collection of circuit cards plugged together on my lab table. It's been my main shack transceiver for a few years. The Icom 7000 is retired and back in its box, just don't need 100, or 50 or 10 watts anymore.
I'd be open to a cup of coffee. Depending on how many would like to see a demo, my shack is open, or I can pack it up in the go-box .... and meet somewhere.

4313. Arizona Emergency Net - Maricopa, Monday, 27 March 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-03-27 15:55:05 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4313 Message: 4313

Arizona Emergency Net - Maricopa reminder
When: Monday, 27 March 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

From: Dave Martin
Topic: 4254 Message: 4314

Greetings All,
EVQRP will be having our weekly gathering in the park this coming Thursday evening at Desert Mountain Park in Queen Creek @ 17:00hrs. For those who do not know where we meet, its in the rear of the park across from the baseball field and somewhat close to the restrooms. We will meet from 17:00hrs until we get tired or the bands conditions turn. We usually are there until around 21:00/21:30. Last week we had several different stations set up. Bands conditions were not stellar so not many contacts were made. Rick's (W9JRF) granddaughter made a phone contact to Hawaii. Judy (K7JLF) set up her digital station and was running JT65 and was showing Christi how to operate JT65 mode. Rick (NK9G) set up his CW station and was trying to hunt foxes on 80m. Lots of fun was had and we had great fellowship as always. I hope that you will be able to make it, and if you have a portable stations bring it out and set it up and play radios in the park with us. We will monitor the Ocotillo Repeater 449.325 (-) 100.0 pl in you need help finding us. Have a great week and hope to see you there.

4315. ☢ Volunteers Needed - Spring Into Queen Creek, Apr il 8th ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-03-30 09:07:24 UTC
From: Joe Sammartino
Topic: 4315 Message: 4315

☢ Volunteers Needed - Spring Into Queen Creek, April 8th ☢

Attention QCECG Members and Community Hams

The Town's Recreation Services Division has requested volunteers to assist with communications and the shuttle buses for the Spring Into QC event on *Saturday, April 8, 2017*. Volunteers will be needed from *8:00 a.m. - 2 p.m*.

Here is a link to the Spring Into QC <http://www.queencreek.org/departments/parks-recreation/special-events/spring-into-qc> event page on the Town's website.

Recreation Services will employ three (3) shuttle buses to move citizens from the parking area at the Library to the event at Desert Mountain Park (DMP).

Volunteer roles:

- One (1) QCECG member will be needed as net control. Located at the Library pickup/drop off location.

- Three (3) QCECG members, one on each bus, to communicate with net control and provide event information to citizens.

- Two (2) QCECG members at the Library shuttle pickup/drop off location to assist citizens with loading/unloading the shuttle buses. Two (2) CERT members may be added to this team.

- Two (2) QCECG members at Desert Mountain Park to assist citizens with loading/unloading the shuttle buses. Two (2) CERT members may be added to this team.

We can operate two shifts of 8 volunteers each:

1st Shift: 8:00 a.m. - 11 a.m.

2nd Shift: 11 a.m. - 2 p.m.

Event Details

1. Meeting Location:

Queen Creek Library
21802 S. Ellsworth Road

2. The Parks Division will provide an ice cooler with water at the shuttle bus pick-up/drop-off location.

3. Joe LaFortune is checking to see if the Parks Division will be providing a "script" with all of the events and information that we may need to answer for the public.

4. Joe LaFortune will provide a Parks Division Point of Contact.

5. Queen Creek Fire and Medical Department will provide snacks.

6. Queen Creek Fire and Medical Department will be providing lunch for the volunteers. Pizza? Chick-fil-A?

So, we need 16 total volunteers to cover the two shifts with eight assignments.

Please respond with your availability for either of the shifts, both shifts, or if you are not available. Please also note if you can volunteer but need a specific assignment.

Please respond by DIRECT EMAIL to Joe, N2QOJ, at jsammartino@... as soon as possible.

Regards,

Joe, N2QOJ

4316. MESH network and YOUR lat/log

Yahoo group: Queen_Creek_Hams
Date: 2017-03-31 15:05:45 UTC
From: Jay
Topic: 4316 Message: 4316

Greetings all,
In preparation for the MAY meeting... (Not APRIL).. Brad and I are going to have some information put together for the QCCom group meeting on MESH.

We are NOT going to go super deep, more of a what you need and how to get it setup on the network.
Joe, N2QOJ posted a "what to buy list" last month. If you come to the meeting with equipment, we can get the right software on it that night. I am sure Joe can repost if you missed it. (Or put it on the FB page, or some other location)

At the same time, this last bit is really important.

We all want to make sure we get the right equipment. A big consideration in that decision is your proximity to others also running / planning on mesh.

There are omni directional antennas and dishes. The dishes are SMALLER that the directv dishes.
The omni antenna is about 4' tall. (15DBi gain) and looks just like the tram or diamond X50? antenna.

What would help us help you is to get your Lat / long of your home address / street address.

We can then put that into Google Earth and map out how close you are to the next person who is planning on running mesh. This helps decide what antenna you need.

As an example, if there are three of you within a mile, and you can get the antenna up or around roof height, you can all run omni directional antennas. However, if they closest person is 2-3 miles.. you might want to consider a dish.

Last night I ran my 15DBi omni off of a painters pole at 15', when I was in Founders Park with the QRP folks. A very quick and dirty setup, with trees and houses blocking my path. I was not above the roof line. I was 1.58 miles from Brad's home and was able to connect to his mesh gear at a 55% connection. This was an omni to omni antenna with mine, VERY low to the ground. This is just an example of what is possible. With my antenna being up at 25-30' I would have an easy shot with probably 85-100% connectivity to Brad.

On the other hand, Brad is running his dish pointing North East, and is connecting to to the folks up in Mesa. OVER 9 miles away. 100% signal strength.

I am telling you this to prove we CAN cover the whole area, we just need some input from you to get the right gear selected.

So, IF you are thinking you want to invest in the mesh gear (about $160 total) please send me your street address or - lat / log.

I can then plot all of these in Google Earth, create the file and start to map out where everyone is.. and we can get this network started.

Thanks!

- Jay N1RWY

Topic: 4254 Message: 4317

Greetings All,
Our next EVQRP gathering will be this coming Tuesday evening at Desert Mountain Park where we usually meet. We are across from the baseball fields in the back of the park. We will gather around 17:00hrs and go until 9ish or so. Last week we didn't have much success. Jay (N1RWY) set up his mesh equipment with a 15dbi Omni antenna on a painters pole. It was a very quick setup but he was able to connect to Brad's (N7LZD) home from Desert Mountain park with the antenna only up about 15'. Very impressive I have to say. I would encourage any of the QCECG members that want to get on the MESH network to come to the May meeting, it will be a very informative meeting. As far as QSO's I made 1 CW contact to CA. The wind was terrible so we broke down the equipment and packed up and we set around and had a great fellowship with each other. I hope to see all of you there on Tuesday evening even if you can only stop by and say hello. Have a safe weekend.

Here's an easy way to find your latitude, longitude or GPS coordinates.
Just visit this link and enter your proposed mesh node address.

http://www.latlong.net/ convert-address-to-lat-long. html

Very nice Joe.

BTW, the Maidenhead Locator System (MLS) topic is very apropos for this Wednesday night Net.
I am looking for a utility to print maps with options for square, sub-square, and extended square grids.
Would like to use MLS to manage both HAM and non-HAM resources in emergency services.

Best Regards,

Steve, KG7OKE

If you have a smart phone, the app Ham Clock gives you the current grid square, lat/long and z time local time. Kind of a handy app.

Hey all.
Anyone have any idea which business might be selling these via this craigslist post?

https://phoenix.craigslist.org/cph/sop/6056507978.html

It looks like the location is near Carl Hayden Community Highschool - West of the Between N39th Ave and the 17. (west side of the 17)

I am thinking it might be a salvage place - I don't know if any of you might have and idea of who/what it might be.

The 15U server rack they are selling is EXACTLY what I am looking for to complete my 2m/6m amplifier builds.

Are you trying to configure your router for port forwarding from the external IP to the NAS?

No, but I could give you access to a VM at a remote data center to use its HD for experimentation....should be same effort as cloud NAS.

Let me know.

Joe

Thank you all for the suggestions and comments- what I want to do is host the log file on the NAS and then have the logging software talk back to it- however I am not sure if I can "remote" the log and still allow for network sharing. (AClog). I want to use a NAS over a second, or third computer due to HF noise. I am pretty sure I can figure out the port forwarding for external ip access , similar to what I am doing now for IP camera access.

Glad to see I have some possible reference to bounce idea off of.

Thanks all!

4338. Re: ☢ Volunteers Needed - Spring Into Queen Creek, April 8th ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-04-06 18:29:28 UTC
From: Joe Sammartino
Topic: 4315 Message: 4338

Hello Folks,

Unfortunately, We've only had 5 total volunteer responses to our request for 16 volunteers - two shifts of 8.

1st shift: have (1), need (7) assignments filled
2nd shift: have (5), need (3) assignments filled

With the event only one day away, we have a major resource issue. There are about 70 people on this distribution list PLUS the two QC YAHOO Groups -- that's not a very good response ratio.

So, we need more volunteers immediately. Please send me a private email at qcecgaz@... or jsammartino@gmail.com.

*If you do not want to be included in any future volunteer request emails, let me know that too. *

I hope to hear from you.

Thanks,

Joe, N2QOJ

4339. Fwd: [Yaesu-FT-991-group] Receiver Fault - Blowing R1005

Yahoo group: Queen_Creek_Hams
Date: 2017-04-07 01:31:30 UTC
From: Jay
Topic: 4339 Message: 4339

For those of us running 991s as well as other radios.. FYI.

- Jay N1RWY
---------- Forwarded message ----------
From: bruce@... [Yaesu-FT-991-group] <
Yaesu-FT-991-group@yahoogroups.com>
Date: Thu, Apr 6, 2017 at 4:20 PM
Subject: [Yaesu-FT-991-group] Receiver Fault - Blowing R1005
To: Yaesu-FT-991-group@yahoogroups.com

As some of you know, high level RF entering the RX input on the Main board will blow the 1/10 watt 150 ohm resistor R1005. In my case I had my 991A connected to a 40m dipole strung under a Mosely beam. Forgetting to turn off the 991A and transmitting on my FTdx3000 with the Amp running provided enough RF to the Main board in the 991A to blow R1005. When this resistor blows there is no receive on IPO but received on Amp1 and Amp2.

I examining the circuit for the FTdx1200 and the FTdx3000 I found that Yaesu had a protection circuit that open circuited the RX input to the Main board if strong RF entered. So I checked out the 991A circuit and sure enough the same protection circuit was there BUT Yaesu compomised and used that circuit as part of the attenuator circuit, no protection at all.

I decided to build an RF sensing circuit to drive a miniature relay and install that in my 991A. I cut the wire between the RX input socket on the main board and the PCB leaving a 1mm gap. The normally closed relay contacts was wired across this gap and the RF sensing was via a 47pf cap was connected to the RX input side of the gap. The circuit was built on a very small piece of varo board. 13.8 volts was obtained from the + side of RL1001 and earth obtained by soldering onto the shield of the RX in socket. I used very thin stranded audio inner wire.

Works a treat, 10W up to the Mosley via the FTdx3000 induces enough RF into the dipole to trigger the relay in the 991A and open circuit the RF into the main board. I setup some hysteresis using a 68uf tag cap to hold the relay in for about 10 seconds for SSB use rather than have the relay chatter.

Now if Yaesu had used the same circuitry as the FTdx1200 and FTdx3000 and not cut corners this problem would never have eventuated.

Very happy now that I don't have to replace R1005 again.

Circuit available at: http://vk2rt.com.au/FT-991A/R1005_Protection_CCT.jpg
[image: image] <http://vk2rt.com.au/FT-991A/R1005_Protection_CCT.jpg>
http://vk2rt.com.au/FT-991A/R1005_Protection_CCT.jpg

Technical Supplement: http://www.vk2rt.com.au/FT-991A/FT-991_Technical_Supplement.pdf

This modification is not for the faint hearted...

Alternative, turn off your 991/991A and disconnect the antenna if using another radio on a separate antenna.

4341. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-04-09 18:20:15 UTC
From: Dave Martin
Topic: 4254 Message: 4341

Greetings All,
EVQRP will have a gathering of the willing on Tuesday evening at Desert Mountain Park. For those who have attended we will gather in the same spot as always. Those who are new we will be in the back of the park (Southeast) across from the baseball field and near the restrooms. We will gather beginning at 17:00hrs and we usually are there until around 21:00hrs or so. Last week not to many contacts were made but we did manage to have some good fellowship and also had a young fellow hanging around asking questions about amateur radio. If you have a portable station we encourage you to bring it and put it on the air. We will have our usual Digital, Phone and CW stations set up. Remember that next Saturday the last RUSS (Radios Under Sun Shade) until September will be held. The location will be at the LDS church just west of Hawes and Ocotillo Rd from 10:00-14:00. If you have any questions please contact Dennis KF7RYX. Have a great Sunday and we hope to see you on Tuesday evening to play radio and have some good fellowship.

4342. Queen Creek Emergency Communications Group Net, Sunday, 09 April 2017

4343. Arizona Emergency Net - Maricopa, Monday, 10 April 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-04-10 15:55:02 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4343 Message: 4343

Arizona Emergency Net - Maricopa reminder
When: Monday, 10 April 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Date: 2017-04-14 19:44:08 UTC
From: Jay
Topic: 4348 Message: 4348

Hello Pinal County Storm Spotters!

There will be a Spotter class in Casa Grande on Saturday April 29th. There will also be a class in the Town of Queen Creek (Maricopa County) on Saturday May 13th. The link below has all the info (including registration) for those classes as well as all of the remaining classes in our forecast area.

http://www.wrh.noaa.gov/psr/general/skywarn/index.php

If you have any changes in your contact information (email, phone, street address, etc.) please send me an email so I can update our records.

On a final note, the option to use a web form to submit a storm report will be going away this summer. We wish that wasn't the case but it is a national server/system issue. However, we still have the other methods (email, phone, ham radio).

Austin Jamison
NWS Phoenix

4352. Space Station packet back on 145.825

Yahoo group: Queen_Creek_Hams
Date: 2017-04-15 21:42:42 UTC
From: Jim KF7E
Topic: 4352 Message: 4352

According to ARRL bulletin ARLS007 sent today, the new VHF radio is installed and working, so now viewers of the ISS announcements N2QOJ sends out can now listen to 145.825 during the passes. Note the packet will be on during passes at other times, not just during the 'visible' times.

If you have a packet setup, you can 'digipeat' through any pass that is line-of-sight.

If you have never done it, it is simple and has an 'out of this world' cool factor.

Jim, KF7E

4356. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-04-17 03:52:38 UTC
From: Dave Martin
Topic: 4254 Message: 4356

Greetings All,
Happy Easter to one and all. EVQRP will be having another Gathering Of the Willing on Tuesday evening starting around 17:00hrs. We will gather in our usual spot in the rear of the park across from the baseball field next to the restrooms. We will have our usual 3 stations set up (Phone, CW and Digital). If you have a portable station bring it along and set it up and play radio with us. This is just not a gathering for QRP rigs only, we encourage all to bring equipment and get on the air and have fun, 5 watts or 100 watts as long as your having fun then that's what counts. I hope to see everyone there for some good fellowship and playing radio.

Dave AC7FF

4357. Arizona Emergency Net - Maricopa, Monday, 17 April 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-04-17 15:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4357 Message: 4357

Arizona Emergency Net - Maricopa reminder
When: Monday, 17 April 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4358. FOUND! server rack seller and other stuff

Yahoo group: Queen_Creek_Hams
Date: 2017-04-21 14:26:52 UTC
From: Jay
Topic: 4358 Message: 4358

Hey all,
The server rack seller finally got back to me and I was bale to grab one of his racks.

https://phoenix.craigslist.org/cph/sop/6056507978.html
Real excited to get the 6m / 2m and 222 MHz amplifers into the rack.

Plenty of others available as well as NEW 12U rolling and used full height racks.
TONS (literally as in weight) of computer equipment for sale there as well as thousands of RG-6 feedline. Yes, it is 70 ohms.. but CAN work for ham radio. (.08 cents a foot).

Well worth a trip 8 - 4 M-F. As for Donnie. Good guy.

The business is "All things surplus"
https://allthingssurplus.com/

Their online store does not do their inventory justice. I will be making another trip for sure once the shack is complete.

- Jay N1RWY

This topic of vests needs a bit of clarification.

For those of you not at the last QCECG meeting, we had discussed purchasing some new vests. The Town cannot provide these items. We have to purchase them as individuals.

We anticipate the cost of each vest to be between $24 and $30. We are investigating the exact price. In the meantime, we want to develop a list of members who would like to purchase their own vest(s). Having a vest is a very good idea. It brands us to the public, it keeps us safe, and it identifies us to public safety organizations.

We should have a list compiled by next week and we will confirm pricing so you will know exactly how much you will be paying.

4364. Field Day

Yahoo group: Queen_Creek_Hams
Date: 2017-04-24 03:48:46 UTC
From: Dave Martin
Topic: 29 Message: 4364

Greetings All,
I hope everyone had a great weekend. I wanted to put out an email letting all know that will be participating in Field Day. As most of you know it is 60 days out and will be upon us before we know it. Field Day will be the last full weekend in June which will be Saturday June 24th and Sunday June 25th. The event will start at 1800hrs UTC on Saturday and end at 2100 UTC Sunday. Arizona contest hours are 11:00hrs Saturday until 14:00hrs Sunday afternoon. Yes it runs 27 hrs. We will be using the Club call (N7Q) while operating. What we are looking for right now is:

1. Who plans on Attending
2. Who plans on Operating
3. What equipment if any you might be bringing
4. Would you be willing to set up an Operating station

We will discuss at the next QCECG meeting
1. Location
2. Number and types(modes) of stations will be operating
3 Possibility of community dinners on Friday and Saturday night, like we did at Winter Field Day. The food was yummy both nights!!!
4. Anything that we missed or need to discuss

For now that should cover it. Remember we are planning on going to the Rim on Friday May 5th, Saturday May 6th and returning on Sunday May 7th. This trip is mainly a recon trip along with testing some new antennas and equipment set up. That weekend there will be a contest in the 7th call region so we possibly might be able to work that as well, just a thought. Please feel free to contact Jay (N1RWY) or myself by email with any questions or concerns. As always I hope to see you all on Field Day.

Regards,
Dave Martin

Greetings All,
EVQRP will be having our weekly gathering this week on Tuesday evening at Desert Mountain Park at 17:00. We will gather in the rear of the park across from the Baseball field and next to the restrooms. We will be at the Ocotillo Ramada. As always we have a great time playing radio and lots of great fellowship with each other. We will have our usual stations set up. This week I will be leaving early, I have to go help Dennis (KF7RYX) and Fred (AB7JF) testing new hams that are finishing up there class on Tuesday evening. As always I hope to see you all there on Tuesday evening.

Dave AC7FF

Hey Dave,
So excited for field day! Here are my responses:

1. My husband and I plan on attending
2. I plan on operating
3. I will bring my Yaesu FT-897D and a Honda EU2000i generator. I hope to have my battery setup by then and maybe solar. I also have 2 easy ups like Dennis has and I will bring them. I can bring my SOTAbeams antenna (20/30/40m) and I can bring the OCF dipole, but I have no idea how to get that one up. I will also bring my tripod and jackite pole.
4. I am willing to set up my 897 as an operating station.

thanks!
christi

Topic: 29 Message: 4370

Of course I am in as well. I will bring the following:

1. Bro Ham

2. GoBox with the FT-991

3. Generator, Solar, Wind Turbine

4. G5RV (Burger King Whopper),

5. UHF/VHF antenna

6. Depending on location, I could bring the Gap, Titian DX vertical antenna

7. Not going to operate 24 hours. I will take my turn, but plan on others taking a shift.

8. Cherry or Peach Cobbler and Ice Cream

Dennis

Of course I am in as well. I will bring the following:

1. Bro Ham

2. GoBox with the FT-991

3. Generator, Solar, Wind Turbine

4. G5RV (Burger King Whopper),

5. UHF/VHF antenna

6. Depending on location, I could bring the Gap, Titian DX vertical antenna

7. Not going to operate 24 hours. I will take my turn, but plan on others taking a shift.

8. Cherry or Peach Cobbler and Ice Cream

Greetings All,

I hope everyone had a great weekend. I wanted to put out an email letting all know that will be participating in Field Day. As most of you know it is 60 days out and will be upon us before we know it. Field Day will be the last full weekend in June which will be Saturday June 24th and Sunday June 25th. The event will start at 1800hrs UTC on Saturday and end at 2100 UTC Sunday. Arizona contest hours are 11:00hrs Saturday until 14:00hrs Sunday afternoon. Yes it runs 27 hrs. We will be using the Club call (N7Q) while operating. What we are looking for right now is:

1. Who plans on Attending

2. Who plans on Operating

3. What equipment if any you might be bringing

4. Would you be willing to set up an Operating station

We will discuss at the next QCECG meeting

1. Location

2. Number and types(modes) of stations will be operating

3 Possibility of community dinners on Friday and Saturday night, like we did at Winter Field Day. The food was yummy both nights!!!

4. Anything that we missed or need to discuss

For now that should cover it. Remember we are planning on going to the Rim on Friday May 5th, Saturday May 6th and returning on Sunday May 7th. 4374. Weather Spotter Training

Yahoo group: Queen_Creek_Hams
Date: 2017-04-27 18:20:57 UTC
From: Joe Sammartino
Topic: 4374 Message: 4374

QCECG Members,

The Queen Creek Fire and Medical Department has partnered with the National Weather Service (NWS) to offer weather spotter training as part of the Skywarn program. The training will be held on*Saturday,* *May 13 *at the *Queen
Creek Library Zane Gray Room* from *10:00 a.m. to Noon*.

This free training class will teach citizens how to properly identify and report significant weather phenomena and contribute to public safety. Even with sophisticated technology like radar and satellites, the NWS still needs ground truth information from trained weather spotters throughout the year. Participants will learn how thunderstorms work, how to identify cloud features associated with microbursts and tornadoes, visually estimate wind speeds, and how their reports tie in to warnings and advisories issued by the NWS. The NWS will also explain all of the services that they offer.

Spotters are typically adults but high school age students can also become spotters.

For more information, visit www.wrh.noaa.gov/psr/general/skywarn/index.php.

If you are interested in attending this training, please email Joe LaFortune atjoe.lafortune@... and I can add you to the class roster.

Thanks,

Joe

This is a great class to learn more about weather or get a refresher about some topics that you might forgotten about. You also can become part of the NWS weather spotting group which is a great way to give back to the community and the NWS as a whole.

Hope to see you there!

- Jay N1RWY

4377. CW keying from you computer

Yahoo group: Queen_Creek_Hams
Date: 2017-04-27 22:21:10 UTC
From: Jay
Topic: 4377 Message: 4377

Several of you (us) are starting to want to get more active in CW.
Especially those of us who like working from the park or low power.
Here is a very simple interface that you can put between your logging
computer and your radio to transmit CW. Yes, you still have to use your
brain to decode what is being sent to you, but this takes away having to
use a keyer to send back.

Simple interface and some random ramblings by me as well on my blog. More
than happy to help folks build their own.

4380. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-04-30 18:55:04 UTC
From: Dave Martin
Topic: 4254 Message: 4380

Greetings All,
EVQRP will have its weekly gathering this coming week on Thursday evening at Desert Mountain Park @ 1700hrs. We will meet at the Ocotillo pavilion which is across from the baseball fields in the rear of the park. I will bring bottled water on ice since the temperature is going to be close to or around the century mark on Thursday. As most know we will have stations set up, typically we have 3 modes operating (Phone, Digital and CW). Please feel free to bring your equipment and come spend an evening playing radio in the great outdoors. Some of us do run QRP but don't feel that you have to do the same, we just like to see you get involved and getting on the air, so if its 5 watts, 25 watts or 100 watts it doesn't matter as long as your having a good time and getting on the air and staying radioactive. As a reminder next weekend a few of us(Dennis KF7RYX, Jay N1RWY and Myself AC7FF) are going to the Mogollon Rim north of Payson as start of Radios On the Rim season kickoff and also to test some antennas and scout the area to see if they have left some trees for us to hang antennas from. If you have never been you should consider coming up for the day or over night, and remember its going to start to hit the century mark on Friday of this coming week so what better time than to go enjoy some nice cooler weather on the Mogollon rim. Dennis is going up sometime on Thursday with Jay and myself following up on Friday morning. We will be at the Carr Lake Campground which is off of FS 300 or Rim Rd. It is very primitive camping so you need to bring everything you will need such as food and water, the closest town would be a drive back to Payson if you needed something. Campsites are free and it first come first serve and we usually have good luck putting most of us on one site. I know I have been long winded in this email but just wanted to get this info out to everyone. I hope to see you either at the park on Thursday evening or on the Mogollon Rim over the weekend. Take care and have a great week everyone

Dave AC7FF

4381. Queen Creek Emergency Communications Group Net, Sunday, 30 April 2017

4382. Arizona Emergency Net - Maricopa, Monday, 01 May 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-05-01 15:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4382 Message: 4382

Arizona Emergency Net - Maricopa reminder
When: Monday, 01 May 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4383. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-05-07 21:57:26 UTC
From: Dave Martin
Topic: 4254 Message: 4383

Greetings All,
EVQRP will be having the Gathering this coming Wednesday evening at Desert Mountain Park at 17:00hrs weather permitting. We gather at the rear of the park at the Cottonwood Pavilion across from the baseball field and next to the bathrooms. We will have our usual mix of stations set up. We will be monitoring the Ocotillo Repeater which is 449.325 (-) 100.0 PL. We will also monitor 146.500 simplex. Please feel free to bring your own equipment and set up with us. Most of use like to run QRP (low power) but don't let that stop you from bringing your radio equipment and setting up. One of the things I learned from doing these park events is seeing how other people set up their equipment and making things more efficient with less effort. I hope to see you all there on Wednesday evening for some good fellowship and having fun playing radios.

Dave AC7FF

4384. Field Day 2017 June 24th & 25th

Yahoo group: Queen_Creek_Hams
Date: 2017-05-07 23:40:29 UTC
From: Dave Martin
Topic: 4384 Message: 4384

Greetings All,
I hope everyone has had a great weekend. As most of you may know Dennis (KF7RYX),Jay (N1RWY) and myself went to the Mogollon Rim this weekend for a little recon of Carr Lake Campground in prep for Field Day Weekend. We were joined by Kieth (KI7KDD) and Shelly (KI7IGC) on Saturday morning. We had a wonderful time setting up antennas and radios. We have some good news from our recon trip. They are up to the entrance of the campground in their process of thinning the trees. With that being said we will not have a clear picture if the park will be open for Field Day on June 23, 24 and 25 until about 2 weeks out from Field Day. Now the good news, we did some further scouting of the area and found 50 more camp site across Woods Canyon Lake turn off road on Hwy.260. So instead of turning Left onto the Rim Road you would make a right turn into the visitors center then bear to the left and follow the signs to FS 171 Rd. The road is passable to all vehicles and cars. The first half mile is day use sites only. Once you get past those there are 50 more sites just like Carr Lake Campground. The first 10/12 sites had a Rim view then after that you lose the Rim view, but still great sites with tall trees for putting up those antennas. And here is the bonus, they have done the thinning in these sites already. So here is our thoughts, we still would like to go to Carr Lake Campground some where between sites 20, 22, 24, Rim views but our back up plan if Carr Lake Campground is closed we can go to the second site for Field Day. Remember these site are primitive, meaning no hookups, no bathrooms or showers and the closest town is Payson which is about 25 miles away. We did find a little country store at Woods Canyon Lake and also there is a dump station for RV's to dump there black or gray water for a fee of $7.00 and you can also dump your bagged garbage for $3.00. With all of this being said Dennis and myself will probably go up on Wednesday to secure a great spot or spots for us. I have received a good response from my first email that I sent asking who would be attending and what equipment you would be bringing thank you for your response. As of today here is who I have attending or possibly attending

Dennis
Jay
Dave M
Christi
Andy A.
Rick F.
Kieth and Shelly
Troy - A very strong possibility

If I have missed anyone I apologize but as you can see we have 9 so far, campground rules say that we can only have 10 people on a site, and from looking at my list we have 7 RV's/Campers so far coming up, so it looks as

though we will need 2 spots. This is what we need from the people that have not responded as of yet, we need to know if you are coming and in what type of capacity for instant (coming for the day, bringing an RV/tent camping and what days you will be staying. I ask that if you plan on coming up please let either Jay or myself know of your intentions. What we are trying to avoid is someone showing up unannounced with a camper and not having a place on one of the spots to put you. We are trying to preplan ahead so this does not happen. I would imagine that with the valley temperatures being triple digits that most campers will be heading to cool country and spots will fill up quickly. Also something to think about before the QCECG meeting on Thursday evening is would you guys like to do a pot luck dinner on Saturday evening like we did on Winter Field Day or skip it. One last thing, we haven't decided on how many transceivers we will be using so we will discuss that either this meeting or the June meeting
I apologize for the lengthy email and I hope to hear from everyone that hasn't responded to my first email. If you have any questions or concerns please feel free to contact Jay or myself at any time. Have a great remainder of your weekend.

Dave AC7FF

4385. Queen Creek Emergency Communications Group Net, Sunday, 07 May 2017

4387. Arizona Emergency Net - Maricopa, Monday, 08 May 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-05-08 15:55:08 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4387 Message: 4387

Arizona Emergency Net - Maricopa reminder
When: Monday, 08 May 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4388. RE: [Queen_Creek_Hams] Arizona Emergency Net - Maricopa, Monday, 08 May 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-05-08 16:10:40 UTC
From: Thomas Anthony
Topic: 4387 Message: 4388

Hi all. I very much enjoy being a part of your net. I have been a "hammy" for several years but because of work and "life" am not able to do as much and learn as much as I would like. I feel intimidated when I get around guys that know so much because I "should" because of the time I have had my equipment but just haven't invested the time to learn.
I have a FT-60 that works great and used to have it configured with all of the local addresses to pickup on all of the nets and stuff that was going on. Then I joined a CERT group and had a guy reconfigure it for what he thought was a better way. Now I can't pick up anything. I should have kept the old configuration but didn't. That was my fault.
Does anyone have a CSV file for an FT-60 that I can load into mine with a working config? I would be so grateful.
Thanks so much.
Tom

4392. Prescott Hamfest June 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-05-10 01:40:09 UTC
From: kc7joe@...
Topic: 4392 Message: 4392

The Prescott Hamfest on June 9th and 10th has a growing list of grand prizes to be awarded. See the current list of grand prizes on the home page

www.prescotthamfest.com.

The schedule of seminars on Friday and Saturday afternoons of the hamfest can be found at

hamfest.w7yrc.org/technical-seminars/

The seminars are geared towards all interest levels.

Weather Balloon Launch with DMR hotspot tentatively on Talkgroup 3104 Arizona.

Listen Live!
http://hose.brandmeister.network/3104/

Find more hamfest details at www.prescotthamfest.com.

Hope to see you there.

From: Joe Sammartino
Topic: 4387 Message: 4395

Hello Tom,

I didn't see a response yet to your posting so I thought I might make a couple of observations.

First of all, I believe you replied to an automated net announcement to make your post. When you do that the Subject line is maintained from the original post but your discussion did not match the Subject noted. In other words, it would have been better to create your own original post with a subject line that matched the topic your were discussing.

Secondly, I'm not sure what you mean when you say you enjoy being part of our net since you may be referring to the subject line net, which is not our net. If you are referring to our Sunday night QCECG net, great.

Please don't feel intimidated around any of us. I don't think we give off a "know-it-all" vibe or anything close. We love to mentor, coach, and "elmer" all new comers. We are just hams having fun. Never heard the term "hammy" before and don't believe I will again. It sounds smelly to me. Given that you have a consulting business - as I have had - I'm sure you are used to being around all levels of knowledge.

Some of us have FT-60r radios and have a good channel configurations (not addresses). What will you do with a CSV file? That won't read directly into a FT-60r radio but could be read into a programming application. How are you programming your FT-60r?

My best advice is to come and meet us at one of our events. You have been a member of the Queen Creek Hams Yahoo Group since 2014 so I won't state all the events that we have. You've been receiving automated calendar notifications for a couple of years. Please try to make the time to participate. It will be personally rewarding and fun.

Regards,

Joe, N2QOJ

I have heard the term hammy and don't mind it. The Queen Creek hams does have wonderful events and opportunities for everyone. It is great. And everyone truly are willing to help. Thanks for a great group. Fellow hammy. Lots of laughs

Janet Gordon

4397. Re: [Queen_Creek_Hams] Arizona Emergency Net - Maricopa, Monday, 08 May 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-05-10 20:24:37 UTC
From: Jay
Topic: 4387 Message: 4397

"Hi all. I very much enjoy being a part of your net. I have been a “hammy” for several years but because of work and “life” am not able to do as much and learn as much as I would like. I feel intimidated when I get around guys that know so much because I “should” because of the time I have had my equipment but just haven’t invested the time to learn."

Come on out to an event and join us Tom.
We are all learning something new at one point or another.
I certainly don't take it as a competition as to who knows more, but rather look to take my knowledge to new levels and at the same time offer assistance to others who want it. Learning comes in all shapes and sizes. I have found experience to be my best teacher.

RUSS events, EVQRP events, QC ham breakfast sessions, and of course the QC EMCOM group are all good folks.
Come on out and join the fun.

- Jay N1RWY

Weather Spotter class THIS SATURDAY!
Sign up if you have not yet.

Great practical education that you can use to support you community (as well as your own shack... (Looking out the window.."I should probably unplug all these cables now...")
Many of us will be at the QC ham breakfast, then heading over to the course after.

4400. External video cams

Yahoo group: Queen_Creek_Hams
Date: 2017-05-11 20:23:43 UTC
From: Jay Baack
Topic: 4400 Message: 4400

Hey all.
I am looking at picking up some external cams to do the following:

A. Mounted outside (so what can take the heat)
B. Monitor property with at least 7 days recording
C. Decent color for weather camera
D. Can post to web and is mobile friendly without a bunch of hokey apps.

Feel free to reply off list if you don't want others knowing what you have.

THANKS!

-Jay N1RWY

Jay,
I am using the Blink indoor cameras now and have an outdoor model on the way. The outdoor model is VERY new!! I can let you know how it works after I get it.Info at;
https://blinkforhome.com/products/xt-one-camera-system

The indoor models work very well for me.

4403. Queen Creek Mesh discussions

Yahoo group: Queen_Creek_Hams
Date: 2017-05-12 13:48:51 UTC
From: Jay
Topic: 4403 Message: 4403

Hey all,
As I stated at the meeting last night, I have sent off the Powerpoint file to Joe to add to the club web site. This email below is the yahoo group that you can join to get more information on the mesh as we have new updates. Brad and I will be posting there.

QC_Hamnet@yahoogroups.com

I sent invites to a few of you that were at the meeting last night to the group. However, if you don't get an invite - you can subscribe to the group. We will be posting procedure files there as well as images, future plans.. etc.

TO subscribe to the group just send an email here:
QC_Hamnet-subscribe@yahoogroups.com

4404. Vests - last call for QCECG Members

Yahoo group: Queen_Creek_Hams
Date: 2017-05-13 06:38:27 UTC
From: Joe Sammartino
Topic: 4404 Message: 4404
Attachments: 2 described; binary payloads are missing from this source WARC

Folks,

This is the last call for anyone wanting to purchase a vest.

We have found a supplier for our QCECG vests.

Here's what the vest will look like:

[image: Inline image 1]

Here's the description:

Class 2 Surveyors vest. Solid front, mesh back. 1 split pad/pencil pocket, 1 radio pocket, 2 ext. waist pockets w/hook & loop closure, 2 open int. waist pockets, 1 int. flashlight pocket. Mic tabs on both sides. Medium - 5X.

The price of the vest will include printing on the back like this:

[image: Inline image 2]

Important: When choosing your size, consider that you may have need to wear a jacket or similar under the vest sometimes. You should bump up one to two sizes.

If you have not yet sent in your request, this is your last chance. If you have already put in your request, please ignore unless you want to change size or quantity.

The final price should fall somewhere between $20 and $25.

Send me a private email with your order.

Thanks,

Joe

4409. Arizona Emergency Net - Maricopa, Monday, 15 May 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-05-15 15:55:09 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4409 Message: 4409

Arizona Emergency Net - Maricopa reminder
When: Monday, 15 May 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4411. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-05-17 00:49:14 UTC
From: Dave Martin
Topic: 4254 Message: 4411

Greetings All,
I hope everyone is enjoying the cooler weather!! EVQRP will be having another gathering this week on Thursday evening at Desert Mountain Park @ 17:00hrs. We gather at the Ocotillo Ramada and set up our 3 stations running 3 different modes (Phone, CW and Digital). This week I will be bringing my portable station which is an FT-857, signal link and computer for logging. I will be learning how to go from my FT-857 and signal link for running digital with the logging software (N3JFP) and getting it all sync up then being able to use the same logging software program with my FT-991 which has the built in sound card. We will be in the rear of the park across from the baseball fields and just directly east of the bathrooms. This would be a good opportunity if you plan on doing field day either up on the rim with us or doing your own thing some other place to get your portable station fined tuned and see how everything works. I hope to see you there on Thursday evening to play radio and have good fellowship with each other. Take care and stay radioactive.

I've passed the EVQRP Thursday night gathering info along to several active HAM TV operators and asked them to contact Dave if they would be interested in coming to demo Fast Scan HAM TV.

I hope it would be of interest to the other attendees..

I'm not an expert but I play one - on HAM TV.

4420. Arizona Emergency Net - Maricopa, Monday, 22 May 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-05-22 15:55:04 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4420 Message: 4420

Arizona Emergency Net - Maricopa reminder
When: Monday, 22 May 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4421. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-05-22 16:57:22 UTC
From: Dave Martin
Topic: 4254 Message: 4421

Greetings All,
EVQRP will gather this coming Thursday evening at Desert Mountain Park @ 17:00. For those that are not familiar we meet in the back of the park, across from the baseball field and to the Southeast of the restroom building at the Ocotillo Ramada. We will set up out usual stations operating on 3 different modes. Last week Jay (N1RWY) helped myself and Christi (KG7NAD) get our portable JT65 software and logging program talking to each other so our QSO's will logged automatically after each contact. I had some small issues getting my JT software set up but once we figured it out I was being spotted all over the US. I will bring this setup again in case people have questions or want to make a contact using JT65. I will bring a cooler full of ice cold drinks. As most know we are there until about 21:30 so if you can't make it right at 17:00 you still have plenty of time to make it and play radio. Please feel free to bring your portable station and show it off. Last week Andy (KG7KWG) and
Dennis (KF7RYX) brought there portable stations and set up. I know Dennis made 3 -4 contacts on his set up and Andy was testing his SWR on an antenna project he has been working on. I hope to see you all there and Thursday evening at Desert Mountain Park to play radio and fellowship with us. Take care, try and stay cool and stay radioactive.

4422. Field Day 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-05-24 17:06:41 UTC
From: Dave Martin
Topic: 4422 Message: 4422

Greetings All,
I wanted to put out another email update for Field Day 2017. Field Day is 30 short days from today and things are moving along great. It seems we have a pretty good group of folks that will be participating in Field Day this year. As most know we will be using our Special Call of N7Q for the event as we have done in the past years. We will be on the Mogollon Rim for this event which is approx.35 miles Northeast of Payson off of Hwy 260 which heads to Showlow. We will not know exactly where we will be until about 2 weeks out from the event. If all goes well we will muster at Carr Lake Campground which is off of Rim Road /FS300. If by chance they close down the campground due to thinning the forest we will be on the other side of Rim Rd/FS300 on FS171. I will have more info in a couple of weeks after I find out if Carr Lake Campground will be open or closed during that time around the event. More info to come on that so keep an eye out for the updated email in a couple of weeks.

Next, we would like another head count on who's coming. All are welcomed to come and participate. Even if you plan on attending for the day please let us know so we can keep an eye out for you. This is the list I have so far:

Dennis (KF7RYX) Going up Wednesday afternoon
Dave (AC7FF) Also going up on Wednesday afternoon
Jay (N1RYW)/Joe (N2QOJ) Early Thursday morning
Christi (KG7NAD)/Husband Friday afternoon
Rick (W9JRF) Friday afternoon
Andy (KG7KWG) Friday afternoon/evening
Ron Earle (K7RWE)/Wife ?
Al (KG7BMI)/Wife?
Kieth (KI7KDD) Shelly (KI7IGC) Friday afternoon

That's my list as I have it as of this morning. If I fail to add you to the list I apologize. Please email or call me and let me know. With that being said we really need to know if anyone else plans on attending so we can my arrangements to grab more than 2 spots. What we are trying to avoid is you pulling your camper or driving your motorhome all the way and find out that there is no spot for you and the campground is full. As of now we know that we are going to need to get 2 spaces possibly even 3. Please feel free to call or email Jay or myself and let us know of your intentions.

I know most of you are probably wondering how many stations we will be running. I believe we are planning on running 4. We plan on having community antennas, meaning, when the folks that want to go to sleep they can unplug their rig from that antenna and you can use that antenna with your rig and run into the wee hours of the night. Speaking of antennas, we will have a pretty impressive array of antennas on hand. We plan on putting up to beams which are 3 bands (10,15,20) thanks to Jay (N1RWY) and also

having a couple of Off Center Fed dipoles up as well and I would imagine that we will also have a G5RV along with a UHF/VHF antenna up as well. So with that much up in the air, we should be covered pretty much from every angle. If you would like to bring an antenna up and put it up, please feel free to do so. Jay, if I have missed anything please feel free to comment add or delete where needed.

Lastly, Jay has agreed to put up and sort of checklist page on hos blog web site www.n1rwy.org/GOTW. He will be working on that I believe this weekend and I know he will post when he has it up and running. Basically its going to be a page that will cover things that you might want to consider buying last minute for Field Day like Band Pass Filters, Headsets, headphone splitters and things like that. So look for that coming soon. Ron (K7RWE) has agreed to make his pork again like he did for Winter Field Day (yummy). Ron has to leave Saturday evening to pick up his grandson at the airport on Sunday. We haven't discussed what day he will be doing this and I will let him handle this. Basically what we did for Winter Field Day is you bring a dish and we have a community style dinner on either Friday or Saturday evening. It seemed to work good at our last event and there was plenty of food.

Ok I promise that's all for now, if I have missed anything please let me know. Please let us know of your intentions and if you have any questions please feel free to contact Jay or myself. As soon as I know where we will be I will make sure to pass it along to the group.

73,
Dave AC7FF

4423. International Space Station visible tonight

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 6 minutes. It will be at a very great height and should be an excellent viewing barring any cloud cover.

Time: Wed May 24 8:33 PM
Visible: 6 min
Max Height: 83°
Appears: 10° above SW (from 225 degrees)
Disappears: 10° above NE (toward 45 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

Regards,

Joe, N2QOJ

4430. Programming your Baofeng UV-5r or similar radio

Yahoo group: Queen_Creek_Hams
Date: 2017-05-25 18:48:32 UTC
From: Joe Sammartino
Topic: 4430 Message: 4430
Attachments: 2 described; binary payloads are missing from this source WARC

Here are a couple of nice reference docs from our friend Jon at www.Iwillprepare.com.

Manual programming and CHIRP programming recipes.

Enjoy,

Joe, N2QOJ

QC Hams,
heading into field day...
Can someone recommend a link to the band pass filters that you would recommend?
Thanks!
Andy KG7KWG

Topic: 4432 Message: 4433

Array solutions has them.
Best - top of the line are the w3nqn filters.
They are 40-50 bucks MORE than the others on that site. The others listed there are good- however the W3NQN are the best.
I have a mix of both "grades" depending on the band.

Buy W3NQN, the extra money will be well spent in performance for
years to come. And they maintain high resale value later.

okay, silly question. Are these all mono-band filters, or is there a filter option for mulit-bands - say 20-40m?

All mono band.
However - you can save money if you buy the whole stSt at once. :-)

heading into field day...
Can someone recommend a link to the band pass filters that you would recommend?
Thanks!
Andy KG7KWG

4445. Arizona Emergency Net - Maricopa, Monday, 29 May 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-05-29 15:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4445 Message: 4445

Arizona Emergency Net - Maricopa reminder
When: Monday, 29 May 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4446. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-05-31 18:02:31 UTC
From: Dave Martin
Topic: 4254 Message: 4446

Greetings All,
Greetings from Portland Oregon, I just wanted to put out a quick email today before I catch a plane back to Arizona. This week's Gathering will be this Friday at Desert Mountain Park @1700hrs. I will put out more in the next day or two. Take care and stay radioactive.

Dave AC7FF

Here's an interesting article from QST regarding band pass filters for HF and their benefits.

For those that may want to experiment, there is build information.

Regards,

Joe, N2QOJ

If we had enough interest we could do a club build project and make several of these on 40/20/xx bands. As the video and article states- there isn't a pile of parts.

4452. Field Day Community Meal Info

Yahoo group: Queen_Creek_Hams
Date: 2017-06-01 15:43:12 UTC
From: Christi K Feldewerth
Topic: 4452 Message: 4452

Fellow Field Day Participants,

Wow, can you believe we are less than one month to Field Day? Where does the time go? Thanks to Jay N1RWY and Dave AC7FF, we have a great list to guide our camping and radio preparations, and now it is time to plan for the community meal! If you came to Winter Field Day, you know the community meal featured excellent food and great fellowship. I am sure the Field Day community meal will be the same.

The Field Day Community Meal will be on Friday, 23 Jun 2017. Dinner will be served when Ron K7RWE lets us know the pig is ready, somewhere between 1600 (4 pm) and 1800 hours (6 pm).

Here is the list of contributions we have so far:

Amazing Smoked Pig - Ron K7RWE
Pig Slaw and Tossed Green Salad - Christi KG7NAD
Spectacular Cobbler - Dennis KF7RYX

If you are coming to Field Day on Friday, please let me know what dish you would like to contribute to the community meal. My email is christi.feldewerth@...

Thank you so much for participating in Field Day and the Field Day community meal. See you at the Rim!

Christi KG7NAD

4453. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-06-01 19:53:29 UTC
From: Dave Martin
Topic: 4254 Message: 4453

Greetings All,
I wanted to send out an email update from last week's Gathering In the Park. We had a pretty good attendance at last weeks Gathering. We had our usual stations on the air plus a new one we haven't tried in the park before. Troy (K7TJK) decided to pet up and do some satellite contacts. I believe he made 2 contacts using the mode. Christi (KG7NAD) set up her station and Jay (N1RWY) help her finish getting her FT897 and computer set up to do JT65, and she made 4 contacts and was having a good time learning how to use the JT65 program along with her logging program. Dennis (KF7RYX) set up his FT991 along with a new antenna he hasn't used before, it was a Chameleon Antenna, he got it tuned up on 40 meters but I believe he was unsuccessful in making and contacts. Rick (W9JRF) started to set up on phone but when Jay arrived he quickly grabbed Jay and they worked on flashing his MESH antenna and proceeded to play with that. John (KG7RS) set up his new FT891 and an MFJ-1661 antenna and made a few contacts one of which was into the Indy Motor Speedway for their special event. Also coming out were Fred (AB7JF) Bruce KF6EZT) JIm (KC7QPI) Joe (N2QOJ). I set up my antenna and let Christi hook up to it to do JT65 and I also helped her with learning her JT65 program and logging software. Fun was had and there was plenty of fellowship among friends.

We will have the next Gathering tomorrow evening at Desert Mountain Park @1700hrs. We will meet at the Cottonwood Ramada in the back of the park across from the Baseball fields and just Southeast of the bathroom building. We will have our usual stations set up and encourage you to bring your portable setup and play radio with us. Also, if you plan on attending Field Day on the Mogollon Rim with the Queen Creek group and have not responded as of yet please send myself or Jay (N1RWY) and email and let us know. I have started an email group list with those that plan on attending so you will probably not see any more mass emails about Field Day from here on out. We would like to see you join us for a fun weekend in the cool country and its not to late to get on the list and join us. I hope to see you all at the park on Friday night for good fellowship and playing radio. Have a safe week, what's left of it and remember to stay radioactive!!

Dave AC7FF

FYI,
I received my Blink XT outdoor cameras a couple of week ago and they seem to be working well. They even report the temp where they are. I have one on our front porch and one on our driveway.

Standard disclaimer, Only a customer and happy with the product.

4465. Arizona Emergency Net - Maricopa, Monday, 05 June 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-06-05 15:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4465 Message: 4465

Arizona Emergency Net - Maricopa reminder
When: Monday, 05 June 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4466. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-06-05 18:57:51 UTC
From: Dave Martin
Topic: 4254 Message: 4466

Greetings All,

EVQRP will be doing another Gathering this coming Friday evening at Desert Mountain Park @1700hrs. We will gather in the back of the park at the Cottonwood Ramada which is across from the baseball fields and just East of the bathroom building. We will set up our usual stations and we encourage all to bring their portable station and set up and play radio with us. As most know we usually have 3 stations up with 3 different modes (Phone, CW and Digital). Lately we have been doing little projects with antennas during our gatherings in the park. I will bring ice water for everyone.

Last week we had a few folks show up. Dennis (KF7RYX) and Jim (KF7E) tested a Balun on a Chameleon Antenna to see if it was a 9:1 Balun. After that Dennis set up his portable station with a full sized MP-1 Superantenna and he was able reach South Cook Island on 20m I believe. Brad (N7LZD) set up his portable mesh network. Rick (W9JRF) and his grand daughter set up his portable station and she made 3 contacts with one being a Battleship Special Event station. He hopes that she will be taking her Technician test very soon. Jay (N1RWY) and me started working on a 6m beam and got it all tuned up. After that I had my portable station set up with a Mini MP-1 and we played around with getting it tunes up and Jay was teaching Christi and me about counterpoise and radials. We tuned my antenna on 20m with a counterpoise and my first contact was a European Russia station (UA3KW) on CW with 10 watts. I then later did a rag chew on CW with a fellow in California. We also had several show up for moral support and to fellowship with the group. Ron (K7RWE), Joe (N2QOJ), Al (KG7BMI), Jim (KC7QPI) and his wife Janell (KF7WWJ) and Dennis's son Jonathan (KG7AJM). I would like to thank those that showed up. We always have a great time and I always learn something each week during these events.

Remember Field day is right around the corner and these gatherings would be a great place to test your Field Day projects such as getting that battery box all dialed in or testing and antenna system or even playing with a new headphone setup. I hope everyone can make it this coming Friday and I hope to see all of you there. Remember to stay radioactive and have a great week.

Dave AC7FF

4472. What is Field Day?

Yahoo group: Queen_Creek_Hams
Date: 2017-06-09 00:10:08 UTC
From: Joe Sammartino
Topic: 4472 Message: 4472

ARRL Field Day is the single most popular on-the-air event held annually in the US and Canada. On the fourth weekend of June of each year, more than 35,000 radio amateurs gather with their clubs, groups or simply with friends to operate from remote locations.

Field Day is a picnic, a campout, practice for emergencies, an informal contest and, most of all, FUN!

It is a time where many aspects of Amateur Radio come together to highlight our many roles. While some will treat it as a contest, other groups use the opportunity to practice their emergency response capabilities.

It is an excellent opportunity to demonstrate Amateur Radio to the organizations that Amateur Radio might serve in an emergency, as well as the general public. For many clubs, ARRL Field Day is one of the highlights of their annual calendar. The contest part is simply to contact as many other stations as possible and to learn to operate our radio gear in abnormal situations and less than optimal conditions.

We use these same skills when we help with events such as marathons and bike-a-thons; fund-raisers such as walka-thons; celebrations such as parades; and exhibits at fairs, malls and museums – these are all large, preplanned, non-emergency activities. But despite the development of very complex, modern communications systems – or maybe because they ARE so complex – ham radio has been called into action again and again to provide communications in crises when it really matters.

Amateur Radio people (also called “hams”) are well known for our communications support in real disaster and post-disaster situations. What is the ARRL? The American Radio Relay League is the national association for Amateur Radio in the USA, representing over 171,000 FCC-licensed Amateurs.

The ARRL is the primary source of information about what is going on in ham radio. It provides books, news, support and information for individuals and clubs, special events, continuing education classes and other benefits for its members.

What is Amateur Radio Often called “ham radio,” the Amateur Radio Service has been around for a century. In that time, it’s grown into a worldwide community of licensed operators using the airwaves with every conceivable means of communications technology. Its people range in age from youngsters to grandparents. Even rocket scientists and a rock star or two are in the ham ranks. Most, however, are just normal folks like you and me who enjoy learning and being able to transmit voice, data and pictures through the air to unusual places, both near and far, without depending on commercial systems.

The Amateur Radio frequencies are the last remaining place in the usable radio spectrum where you as an individual can develop and experiment with wireless communications. Hams not only can make and modify their equipment, but can create whole new ways to do things. For More Information visit: www.arrl.org

Hi, I got this from ARRL.

It's their Field Day One Pager.

Good PR.

4476. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-06-11 22:10:34 UTC
From: Dave Martin
Topic: 4254 Message: 4476

Greetings All,
I hope everyone is enjoying the some what slightly cooler weather that is supposed to be here for the next couple of days. EVQRP will host another Gathering Of the Willing in Desert Mountain Park this coming Thursday evening @1700hrs. We will be at the Cottonwood Ramada in the rear of the park just to the east of the bathroom building. We will setup our usual stations (Phone, Digital, and CW).in an attempt to make some contacts. Most all that have attended know that we usually close down the park and we usually are the last ones out of the park. I will bring my cooler with cold ice water for those who would like to partake.

Last week we had a dwindling number of participants. Rick (W9JRF) set up his mesh antenna. We put it on 5 4ft military masts and pointed it in the direction of Brad's (N7LZD) mesh node and was able to pick his node up from the park at 20ft in the air. Rick was using his Air Grid antenna and we were able to check out the inside of Brad's shack thanks to his camera. Christi brought her FT897 and Dennis (KF7RYX) helped her with the built in filters on her FT897. She is really excited about Field Day and has been getting her station fine tuned for the upcoming event. I didn't set up this week, I wanted to relax because Jay (N1RWY) was picking me up at 4 in the morning so we could head off to the Hamfest in Prescott on Saturday morning. As always we had a great time and lots of friendly fellowship along with playing radios

I hope to see you Thursday evening for some great fellowship and to play radio. This will be the last we meet before Field Day, so if you plan on doing Field Day with us on the rim or just finding a place to operate portable this would be a great time to bring your portable setup and put it on the air and work out all of the bugs before the big day. We will not meet next week due to Field Day. I hope everyone has a great week and I hope to see all of you at the park on Thursday evening. Have a safe week and try and stay cool.

Dave AC7FF

4477. ☢ International Space Station visible tonight ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-06-11 23:22:12 UTC
From: Joe Sammartino

Attachments: 1 described; binary payloads are missing from this source WARC

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 2 minutes. It will be at a very great height and should be an excellent viewing barring any cloud cover.

Time: Sun Jun 11 9:07 PM
Visible: 2 min
Max Height: 80°
Appears: 29° above NW *(*f*rom 315 degrees)*
Disappears: 46° above ESE *(toward 113 degrees)*

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

Regards,

Joe, N2QOJ

4478. DATV Downlink from ISS Tuesday

From: wmunsil@...
Topic: 4478 Message: 4478

An International Space Station ARISS contact has been planned for
astrronaut Jack Fisher K2FSH with Space Center Houston, Houston, TX,
USA.

The event is scheduled Tuesday June 13, 2017 at approximately 15.19
UTC, which is 08:19 MST..

The telebridge radio contact will be operated by ON4ISS.
Downlink signals will be audible in parts of Europe on 145.800 MHz
narrowband FM.

Moreover, the ARISS HamVideo transmitter will be operated by the astronaut.
Live DATV from the ISS will be available at:
https://hamtv.batc.tv/dashboard/
as well as
http://www.batc.tv/iss/ http://www.batc.tv/iss/

4482. Iridium flare tonight

Yahoo group: Queen_Creek_Hams
Date: 2017-06-13 23:33:12 UTC
From: Jim KF7E
Topic: 4482 Message: 4482

I note there will be a brighter than usual (VERY bright) Iridium satellite flare visible in QC tonight. They do not last long, unlike the ISS, but this one should be much brighter in QC. Make sure your watch is accurate...

It will be just after 8PM... 20:07:31, appearing slightly east of straight overhead.Traveling from north to south. These are brief but spectacular. It might last 6-8 seconds. The line of max brightness will be about 4 km east of downtown, beautiful QC. But is should still be brilliant within 10 km either side.

Iridium is launching new satellites to replace the originals. The new sats are built differently, and will not produce these 'flares' that have become iconic.

Enjoy.

Jim, KF7E

Flare Details
Date: 13 June 2017
Time: 20:07:31
Brightness: -6
Altitude: 66°
Azimuth: 87°
Satellite: Iridium 18
<http://www.heavens-above.com/satinfo.aspx?satid=24872&>
Distance to satellite: 829 km
Angle off flare centre-line: 0.3°
Distance to flare centre: 4 km
Flare producing antenna: right
Sun altitude: -6.3°
Angular separation from Sun: 115.1°

4483. Fwd: Yuma Hamfest is scheduled for February 2018

Yuma hamfest date!
Feb 16-18th.

- Jay N1RWY

Date: Tue, Jun 13, 2017 at 2:46 PM
Subject: Yuma Hamfest is scheduled for February 2018
To: whereisjay@...

There continues to be a rumor circulating the state and beyond that the Yuma Hamfest is no more. Nothing could be further from the truth. The Feb 16-17, 2018 Hamfest is scheduled and will be held as planned. There was a feasibility study being conducted to relocate the Yuma County Fairgrounds (Yuma County Fairgrounds Relocation Study). If they do decide to move, which might be 10 years away, the Yuma Hamfest would move to the new location after it is built.

Arizona Emergency Net - Maricopa reminder
When: Monday, 19 June 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4499. Arizona Emergency Net - Maricopa, Monday, 26 June 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-06-26 15:55:04 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4499 Message: 4499

Arizona Emergency Net - Maricopa reminder
When: Monday, 26 June 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4500. Preliminary Field Day Report

Yahoo group: Queen_Creek_Hams
Date: 2017-06-26 17:54:58 UTC
From: Dave Martin
Topic: 4500 Message: 4500

Greetings All,
This is quick Field Day report since things still need to be totaled and figured out. We had approx. 25 folks that attended. This number includes Operators, Visitors, Spouses and folks that came up for the day to get out of the heat in the valley. We had over 1100 contacts in the 24hrs of the contest and we were able to capitalize on many of the extra bonus points that were offered in the event. Conditions were tough at times due to the increased heat that we experienced over the course of the event. We had 3 stations under the N7Q call and a GOTA station that was under my call (AC7FF). We put up 3 OCF wire antennas, 1 ZS6BKW wire antenna and 2 triband (10m,15m,20m) 3 element beams.

Once we have all of the numbers either myself or Jay will send them out to the group. I would like to thank all of you that supported us in this endeavor. Without the help of each of you this event would have never got off the ground. Also, a big thank you goes out to the spouses that let your loved ones leave for the weekend and play radio with us on the Rim. If I have missed anyone or anything about the event I apologize. I'm sure there will be a Field Day debriefing at the next QCECG meeting next month. Again, look for an email with more specifics about our numbers in the next week or so.

From: Dave Martin
Topic: 4254 Message: 4501

Greetings All,
EVQRP will not be meeting this week due to the heat index and decompressing from Field Day weekend. I hope everyone who participated in Field Day had a good time either if you were with a club, group or by yourself. Look for an email next week for the Gathering Of the Willing. Have a great week and try and stay out of the heat.

Dave, all,
I wanted to say thanks to all who did the "heavy lifting" with all the planning and prep. I had a ton of fun getting away and experiencing my first real field day with some great folks. All I had to do was show up with a little food... you guys made it simple.
The whole trip was fun... but I can honestly say I had a pinnacle of fun in HF ham radio while sitting in the dark at 2am on Saturday night in front of our station. I took the mic from Christie, who had stuck with our station for the previous several hours while I slept. It's critical to have night owls around!
I took over the station...
Cool of the night... Hot coffee in hand...Jay was 20 yards away working 20m and 40m...No other sound except for the faint sound of Jay logging contacts on 20/40m... N7Q..QRZ?Moths bouncing off the Yaesu station's LED lights and the laptop screen holding the logging software...
I started calling CQ on 80m... (my first time on 80m)...
and then... They started coming... one after another...
Contact after contact...A cool experience to see all those 80m contacts fill up the laptop logging screen...Calling CQ lasted quite awhile, and then I moved to a hunt and pounce approach which was effective as well.Back to calling CQ... and stations started coming again...
I put the mic down at 6am. It was time to head home.

So much fun.
Andy KG7KWG

I was up Saturday night late getting our digital email bonus points.

During my 3 hour session fighting with software and propagation to the digital stations, It was great hearing Jay, Christi, Andy. Dennis, and Keith in the background working analog RF while I was shooting off digital RF emails all over the country.

Thanks to all for planning and executing a fantastic example of RF based fellowship.

Great times!

To Joe, Dennis or anyone from the Queen Creek group with Fusion capability. On my net tonight, I will be talking about Field Day. I know you guys had a very nice event. I would like if someone from your group could stop by and tell us a bit of how things went. Hoping it will peak up the interest in getting more hams involved with Field Day. On my net, every 4th Monday night we run the net in digital mode. It gives us a reason to use our Fusion radios. Anyone from your group with Fusion equipment is welcome to join in on the net. The net starts at 8pm on the 440.375 repeater on South Mt.

Text-to-9-1-1

to be

implemented

in

Queen

Creek

By Wendy Miller

Independent Newspapers

Individuals who need to text rather than call in an emergency to law enforcement will have another option by next year.

On May 24, the Maricopa Association of Governments Regional Council unanimously approved a motion to fund “text-to-9-1-1” capability in Maricopa County.

“Moving forward with text-to-9-1-1 is the right thing to do,” Greg Stanton, Phoenix mayor and MAG chairman, said in a press release. “Being able to text-to-9-1-1 provides a critical lifeline to many during moments of crisis.”

Text-to-9-1-1 will be a new service for those who cannot safely call 9-1-1 due to the nature of their emergency, or because they have a speech disability, are hard of hearing, or are deaf.

The new software will be installed at local dispatch centers in law enforcement agencies throughout the region within the next six to 12 months, Nathan Pryor, MAG’s government relations manager, said during a phone interview.

Capt. Dave Munley of Maricopa County Sheriff ’s Office District 6-Queen Creek confirmed by phone on June 14 MCSO will be utilizing the service.

Mr. Pryor stressed the importance of calling, rather than texting, 9-1-1 when possible.

“Calls move in real time, they are faster to respond to in an emergency situation,” he

See Text to 911 — Page *9*

Text to 911

Continued From Page 1

said. “If you are able to call 9-1-1, please do so.”

Advances in technology are making this option available now, but few places in the country have implemented the new service. In Arizona, only Lake Havasu City has text-to-9-1-1 service.

Phil Pangrazio is the president and CEO of Ability 360, a local nonprofit agency with a national reputation for serving people with disabilities. “ This is an important step forward,” Mr. Pangrazio said in the release. “ We are removing a very real barrier to people getting emergency services. We are giving people peace of mind and help when they need it the most.”

“For victims for whom summoning 9-1-1 is an option, having the ability to text may remove significant barriers to them doing so and may create greater opportunity to summon the help they need discreetly,” says Allie Bones, CEO of the Arizona Coalition to End Sexual and Domestic Violence.

Since 1985, MAG has administered the Maricopa Region 9-1-1 system with the city of Phoenix. The cities, towns and counties work cooperatively to coordinate 9-1-1 services, including plans to enhance the system.

Text-to-9-1-1 is an example of refinements being considered as a step toward Next Generation 9-1-1. Mesa serves as the main backup to the Phoenix system.

“ We have been saving lives through the regional 9-1-1 system for more than 30 years. We are always looking for ways to better serve our residents. Moving to the Next Generation 9-1-1 is a priority,” Mesa Mayor John Giles said in the release.

The MAG Executive Committee also had recommended the approval of $150,000 to buy new software that will allow people to text-to-9-1-1. Ongoing costs for the software will be paid by the cities and towns that belong to MAG as part of their annual assessments.

Protocols for using the system are being developed, Mr. Pryor said. He anticipated a representative from the individual jurisdictions will participate in the initial training. They would then take that information and train their co-workers, he said.

“Moving forward with text-to-9-1-1 is the right thing to do,” Greg Stanton, Phoenix mayor and MAG chairman, said in a press release. “Being able to text-to-9-1-1 provides a critical lifeline to many during moments of crisis.”

Text-to-9-1-1 will be a new service for those who cannot safely call 9-1-1 due to the nature of their emergency, or because they have a speech disability, are hard of hearing, or are deaf.

The new software will be installed at local dispatch centers in law enforcement agencies throughout the region within the next six to 12 months, Nathan Pryor, MAG’s government relations manager, said during a phone interview.

Capt. Dave Munley of Maricopa County Sheriff ’s Office District 6-Queen Creek confirmed by phone on June 14 MCSO will be utilizing the service.

Mr. Pryor stressed the importance of calling, rather than texting, 9-1-1 when possible.

“Calls move in real time, they are faster to respond to in an emergency situation,” he

See Text to 911 — Page 9

Text to 911

Continued From Page 1

said. “If you are able to call 9-1-1, please do so.”

Advances in technology are making this option available now, but few places in the country have implemented the new service. In Arizona, only Lake Havasu City has text-to-9-1-1 service.

Phil Pangrazio is the president and CEO of Ability 360, a local nonprofit agency with a national reputation for serving people with disabilities. “ This is an important step forward,” Mr. Pangrazio said in the release. “ We are removing a very real barrier to people getting emergency services. We are giving people peace of mind and help when they need it the most.”

“For victims for whom summoning 9-1-1 is an option, having the ability to text may remove significant barriers to them doing so and may create greater opportunity to summon the help they need discreetly,” says Allie Bones, CEO of the Arizona Coalition to End Sexual and Domestic Violence.

Since 1985, MAG has administered the Maricopa Region 9-1-1 system with the city of Phoenix. The cities, towns and counties work cooperatively to coordinate 9-1-1 services, including plans to enhance the system.

Text-to-9-1-1 is an example of refinements being considered as a step toward Next Generation 9-1-1. Mesa serves as the main backup to the Phoenix system.

“ We have been saving lives through the regional 9-1-1 system for more than 30 years. We are always looking for ways to better serve our residents. Moving to the Next Generation 9-1-1 is a priority,” Mesa Mayor John Giles said in the release.

The MAG Executive Committee also had recommended the approval of $150,000 to buy new software that will allow people to text-to-9-1-1. Ongoing costs for the software will be paid by the cities and towns that belong to MAG as part of their annual assessments.

Protocols for using the system are being developed, Mr. Pryor said. He anticipated a representative from the individual jurisdictions will participate in the initial training. They would then take that information and train their co-workers, he said.

4508. ARRL Field Day Bulletin

Yahoo group: Queen_Creek_Hams
Date: 2017-06-27 19:36:56 UTC
From: Joe Sammartino
Topic: 4508 Message: 4508

I thought you might find this interesting.

This was transmitted by the ARRL in Connecticut and California during Field Day. We earned 100 bonus points for receiving and decoding the PSK31 version of the bulletin.

It was recorded on my smartphone and decoded by Fldigi.

Sw SPCL ARL LX00C
ARLX007 2017 AW Field Day Bulletin

Get ready, get set, ARRL Field Day 2017 is ready for launch!

What is Field Day? Each year thous ends of Radio Amateurs and visitors participate in this communetions exercise. Contacts are ma` both loca ny and natio<
ly across North America, as well as internationally, and even out to Space and back. Whethea participants are new or seasoned radio hobbyists, this event offers sthing for every

Here are some basic steps for setting up your Field Day station for maxifun.

1. Bn a plan with others or withi your club.

2. Coordinate your site access.

3. Speak with served agencies or local officials to encourage pubF c interest.

4. Publicize your plans, listing your event information via the ARRL web site Locator page and elsewhere.

5. Prepare for site set up and review safety information.

6. Arrive at site and begin set up.

7. Inspect power source, antennas and eipment for proper(eonnections and ` ounding.

8./ynchronize your clocks.

9. Get your gging tools, pencils and operating plans ready to start.

10. Get on the air and have fun.

Remember, there are several bonus point categories available - how many will you earn?

The deadline for submissions for this year is Tuesday July 25. Be sure to use the http://www.b4h.net/cabforms web tool to submit your summary information to ARRL.

May all the steps you take prepare you for an exciting and safe Field Day! 73.

To: Queen_Creek_Hams@yahoogroups.com
Subject: Re: [Queen_Creek_Hams] Preliminary Field Day Report

To Joe, Dennis or anyone from the Queen Creek group with Fusion capability.

On my net tonight, I will be talking about Field Day. I know you guys had a very nice event. I would like if someone from your group could stop by and tell us a bit of how things went. Hoping it will peak up the interest in getting more hams involved with Field Day.

On my net, every 4th Monday night we run the net in digital mode. It gives us a reason to use our Fusion radios. Anyone from your group with Fusion equipment is welcome to join in on the net.

The net starts at 8pm on the 440.375 repeater on South Mt.

Ron McKee. AJ7T

Subject:Re: [Queen_Creek_Hams] Preliminary Field Day Report

Dave, all,

I wanted to say thanks to all who did the "heavy lifting" with all the planning and prep. I had a ton of fun getting away and experiencing my first real field day with some great folks. All I had to do was show up with a little food... you guys made it simple.

The whole trip was fun... but I can honestly say I had a pinnacle of fun in HF ham radio while sitting in the dark at 2am on Saturday night in front of our station. I took the mic from Christie, who had stuck with our station for the previous several hours while I slept. It's critical to have night owls around!

I took over the station...

Cool of the night...

Hot coffee in hand...

Jay was 20 yards away working 20m and 40m...

No other sound except for the faint sound of Jay logging contacts on 20/40m... N7Q..QRZ?

Moths bouncing off the Yaesu station's LED lights and the laptop screen holding the logging software...

I started calling CQ on 80m... (my first time on 80m)...

and then...

They started coming...

one after another...

Contact after contact...

A cool experience to see all those 80m contacts fill up the laptop logging screen...

Calling CQ lasted quite awhile, and then I moved to a hunt and pounce approach which was effective as well.

Back to calling CQ... and stations started coming again...

I put the mic down at 6am. It was time to head home.

So much fun.

Greetings All,

This is quick Field Day report since things still need to be totaled and figured out. We had approx. 25 folks that attended. This number includes Operators, Visitors, Spouses and folks that came up for the day to get out of the heat in the valley. We had over 1100 contacts in the 24hrs of the contest and we were able to capitalize on many of the extra bonus points that were offered in the event. Conditions were tough at times due to the increased heat that we experienced over the course of the event. We had 3 stations under the N7Q call and a GOTA station that was under my call (AC7FF). We put up 3 OCF wire antennas, 1 ZS6BKW wire antenna and 2 triband (10m,15m,20m) 3 element beams.

Once we have all of the numbers either myself or Jay will send them out to the group. I would like to thank all of you that supported us in this endeavor. Without the help of each of you this event would have never got off the ground. Also, a big thank you goes out to the spouses that let your loved ones leave for the weekend and play radio with us on the Rim. If I have missed anyone or anything about the event I apologize. I'm sure there will be a Field Day debriefing at the next QCECG meeting next month. Again, look for an email with more specifics about our numbers in the next week or so.

The ATN-AZ Summer Meeting will be held on Saturday, August 26th at Rod's House, 8334 E Culver St, Mesa AZ 85207.

Arrive at 11, food and drink will be provided at noon, meeting will follow at about 1pm.

All are welcome to stay after the meeting to work on projects or swim in the pool, etc. Bring a friend or two.

Let me know who will attend at rod@sbatv.org so I can plan for the crowd size.

See you there,
Rod Fritz WB9KMO

How to Copy CW in Your Head

By Dan Romanchik, KB6NU

The second most common question that I get about CW is, “How do I learn to copy in my head?” When I get this question, I give, what to some, is a very unsatisfying answer. One day, I just went cold turkey. I put down the pencil and paper and never copied letter-by-letter ever again.

Carlo Consoli, IK0YGJ, author of Zen and the Art of Radiotelegraphy (http://www.qsl.net/ik0ygj/enu/ZART_r20101008m.pdf), says that what operators need to do is to program themselves to copy in their heads. He counsels operators to practice relaxation and visualization exercises. Visualize yourself as a high-speed operator, and maybe one day you will be one.

This approach seems to have worked for Consoli. He is a member of the Very High Speed Club (VHSC), First Class Operator’s Club (FOC), and has been clocked at copying over 70 wpm. I'm not sure that this is really going to work for everyone, though.

Another approach is touted by Carl, N7AGK. On his website, Carl writes, “I have created a program to assist you in learning to copy Morse code in your head. Everything you need will be contained on a single USB flashdrive that I will provide to you. In the program there are audio Morse code presentations followed by a visual display. The visual display shows the information in large print and upper case letters. The visual display verifies that you have received the Morse code correctly.” Carl’s program costs $20 and is available from n7agk.com.

Zeb, HB9FXW, has created a free web application called Seiuchy (http://www.kb6nu.com/let-walrus-help-copy-head/) to help people learn head copying. Seiuchy, which Zeb says is Japanese for walrus, simulates on-air contacts. The trick to using this app is that instead of copying exactly whats sent, you only copy the most important bit of information. The idea is that if you train yourself to do this, then you can concentrate on what’s important rather than getting bogged down in copying what’s not important.

A different take on head copy was sent in by one of my blog readers, Bill, W3MSH. He wrote, “I was a CW op for many years and discovered something fascinating. I first began to hear “dots and dashes”, then letters, words, sentences and at 35+ wpm, thoughts in my head.”

I think Bill may have hit the nail on the head with this comment. I like the idea that copying code in your head is more akin to generating thoughts than it is to copying individual characters or words. Everybody talks about how getting faster is about moving from copying individual characters to copying words to copying entire sentences. I've never thought of it that way, although I was at a loss as to how to describe how I do it. I think the idea that when copying in your head, the code creates thoughts directly is a beautiful way to put it.

Isn't that what's happening when you talk to someone? When someone talks to me, I don't consciously parse the sentences and then analyze them to see what was just said. It's more of an unconscious process. The sounds being uttered are creating ideas in my head.

Shouldn't we approach head copy in the same way? Instead of thinking about head copy as the process of writing down the characters on an internal blackboard to be read later, it should be about translating the sound of the Morse Code directly into concepts. The sounds "dah di dit…dah dah dah….dah dah dit," should conjure up the image of a poodle or a pitbull, not the letters "D O G."

How that translates into a program or a method for learning to copy the code in one's head is another matter. It might be worth thinking about, though.

Dan Romanchik, KB6NU, is the author of The CW Geek's Guide to Having Fun with Morse Code and the No Nonsense series of amateur radio study guides. When he's not head copying on 30m, he blogs about amateur radio at KB6NU.Com

4522. Field Day 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-06-30 15:59:57 UTC
From: Jay
Topic: 4422 Message: 4522

Hey all,
One of the things I needed to change from Field Day was the thickness of the paracord that I have been using. Way overkill to use the 550 grade for hanging antennas.. Yes, Dennis, you are right here.

Plus the 550 puts a huge strain on your fishing line as you try to pull it back through the trees after you launch it over.

So, I did some shopping and found this place.

Free shipping over $50, and a 1000' spool of 275 paracord (thinner and lighter) was $60 bucks to my door.

All sorts of crazy colors... even glow in the dark para cord for us at the park in the evenings for guy lines..

Thanks, Jay! You helped me check off some items I had on my purchase list after field day.

I ordered a 1000’ spool of 275 in Desert Camo and some glow in the dark orange for the park.

I highly recommend the devices Rick uses in the park to tie down his guy lines. I used them on my easy up tie downs at Field Day and they worked great. Having a middle aged moment and can’t think of the official name for them.

They allowed me to tie down the easy up to the stakes with no knots. I could get great tension on the ropes without tying a knot. They held great through the wind. They also allowed us to easily reposition the tie downs when we determined the stakes needed to be further out. Makes tying down and untying a breeze!

I bought them at Home Depot. Probably cheaper online somewhere, but I didn't know what they were called.

4531. Vintage Stuff for Free

Yahoo group: Queen_Creek_Hams
Date: 2017-07-01 18:57:33 UTC
From: Joe Sammartino
Topic: 4531 Message: 4531

Folks,

I will be posting individual messages containing photos of radio related stuff that will be offered free to active members of QC Amateur Radio Club and QC Emergency Communications Group.

If you see something you want, contact me asap. I will be home all day today and hope to move this stuff out sooner than later.

Of course, it will be first come, first serve on these items except where I am offering items in quantity.

Regards,

Joe, N2QOJ

A 1950ish classic in very good condition.

Some info on the model: https://antiqueradio.org/halli02.htm

It's in better condition than the ones being offered on eBay for $75!

Your price: FREE, just give it a good home.

Just send me a text at 480-381-2993.

From: Joe Sammartino
Topic: 4534 Message: 4534
Attachments: 2 described; binary payloads are missing from this source WARC

This really old - from 1933 to about 1935, Pre WWII - with an external speaker of the same vintage.

From: http://www.radioblvd.com/Pre-WWII%20Ham%20Gear.htm

The photo of the actual unit is attached. The photos in the email are from the link above.

Here is a super bonus, the MATCHING external speaker comes with it. The condition for this 84 year old receiver is fair, the tuning dials work but the inside is loaded with dust.

To get this one running, I'd recommend having some experience restoring radios and a Variac <https://en.wikipedia.org/wiki/Autotransformer> on the bench.

Great history below.

Send text to: 480-381-2993

Joe, N2QOJ

Radio Manufacturing Engineers, Inc. - RME-9D

Radio Manufacturing Engineers, Inc. started in business in the early thirties, founded in Peoria, Illinois by two hams - E. Shalkhauser, W9CI and Russ Planck, W9RGH. Their first receiver, the RME-9 was designed in 1932 and was on the market by 1933. The RME-9 was a nine tube receiver with a single airplane-type tuning dial and an R-meter for measuring relative signal strength. The RME-9 featured a tuned-RF stage, two stages of IF amplification and a built-in power supply. The receiver was compactly-built onto a stout chassis made out of aluminum extrusion with the overall size of the receiver being quite small (19"W x 9"H x 10.5"D.) After some months of production and about 100 receivers produced, RME revamped the "9" and introduced the improved RME-9D. The RME-9D incorporated electrical bandspread and thus used two airplane-type dials with the R-meter between the two dials. Nine tubes were still used since the basic design remained unchanged. Five tuning ranges were provided with frequency coverage from .54mc up to 23mc. The tubes used were 58 (4), 57 (1), 2B7 (1), 2A5 (1), 24A (1) and 80 (1.) . Selling price was usually around $112 from discount houses.

The RME-9D was produced from late-1933 up to the introduction of the RME-69 in November 1935. There are some minor variations that are encountered with different types of knob sets being the most common. This especially relates to the tuning knobs with the large "RME-69" type tuning knobs often found

on late versions of the 9D. Like many "Depression Era" receivers, it is common to find examples of the RME-9D with modifications added. The tuning and bandspread dials are relatively small and the nomenclature is miniscule and difficult to read but the dial illumination does help. For its time, the RME-9D was a first-class receiver that introduced what became the "basic necessities" for amateur radio receivers - built-in TRF stage, Carrier Level meter, panel operated BFO, Crystal Filter and Bandspread tuning. Although not necessarily the first receiver to incorporate any of these individual features, the RME-9D was the first receiver to use all of the features together as "standard equipment" and with no external assemblies necessary other than the loudspeaker. This rapidly became more-or-less "the standard" for all communications receivers for the next two decades.

The RME-9D shown in the photo is an all-original, late production version with a serial number of "431." RME receivers had a paper label on the bottom of the cabinet with the calibration date hand-written on it. The date on this receiver's tag is 9-12-1935. This is about two months before the introduction of the RME-69. Since this receiver is very late in the RME-9D production and has a serial number of 431 one can infer that the total number of RME-9D receivers built is probably around 500. The scant number of RME-9D receivers encountered today seems to confirm that production levels were very low.

RME-9D Speaker - The RME speaker housing was an unusual trapezoid shape that allowed for a bench corner location to be used for the speaker and then rectangular equipment cabinets could butt against the speaker cabinet sides. The speaker utilized was an eight-inch Rola PM speaker with a large "wrap-around" magnet support structure. The transformer is a matching transformer that provides a 4000Z for the receiver output transformer impedance and an eight ohm impedance for the speaker voice coil. Luckily, a date is ink-stamped on the speaker frame - JUL 9 1935

This kind of recording device was a staple in many ham shacks back in the day.

It's also a favorite of audiophiles. It looks ok, but I don't know the working condition.

I am not powering up any of these items. It comes with the plastic dust cover and two reel hold downs, and one reel of used mag tape.

Here the model info: Tandberg Series 6000X

https://www.hifiengine.com/manual_library/tandberg/6000x.shtml

Manuals and Schematics are readily available on the Internet for this model.

Send text to: 480-381-2993. Photos attached.

4536. Early 2 Meter Mobile Radio - KDK FM 2015R

Yahoo group: Queen_Creek_Hams
Date: 2017-07-01 20:21:10 UTC
From: Joe Sammartino
Topic: 4536 Message: 4536
Attachments: 1 described; binary payloads are missing from this source WARC

This is a well made 2 Meter Radio classic. It comes with the matching hand microphone. It does not have a dc power cord but should be easily obtained.

It is in extremely good condition on the outside, kept in plastic. I don't know the working condition but the original ham owner was know to be quite capable.

This is a fine radio for a fixed position - home or portable location. These radios also made excellent packet radios with their well designed front-ends. Or, hook it up to an APRS modem and you have a great APRS tracker.

Here is some info:

<http://goog_898042529/>
https://www.eham.net/reviews/detail/2308

NOTE: This radio does not Encode / Decode - i.e. no PL. Add your own from these folks: http://www.com-spec.com/ss64.htm or similar.

Joe, thanks for sharing about adding PL tones to classic radios. I have a
45 watt 2M radio that I bought about 35 years ago and it still works great.
I had no idea that I could use it for anything other than simplex.

Absolutely....

Communications Specialists made external tone boxes just for that purpose.
They are always on eBay. ComSpec 32 or 64.

4544. A Commercial Mesh Node with Light Pole Housing

Yahoo group: Queen_Creek_Hams
Date: 2017-07-02 05:34:20 UTC
From: Joe Sammartino
Topic: 4544 Message: 4544
Attachments: 1 described; binary payloads are missing from this source WARC

Attention experimenters.....

We have about eleven of these "Ricochet" mesh nodes from the '90's that were removed from their light pole locations in Phoenix by our member, Cole, KD7YHT.

They were attached to the light pole and got power from the light pole using a cable that would attach between the darkness turn on sensor and the light assembly. I have those cables too. There is a 2.3 Ghz antenna within the housing and a 900 Mhz short coil whip attaches to a SO-239 mount. I have those antennas also.

As you know we have standardized on the Ubiquiti Mesh Node products for our mesh projects so we won't be using these items for our network build.

If you are interested, let me know how many units you want. Each unit will have the main mesh unit, the power cord, and the 900 Mhz antenna.

Send text to me at 480-381-2993 or email to jsammartno@....

Joe, N2QOJ

Here is some information on this item:

[image: Inline image 1]

The Ricochet Technology

The network consists of the following primary technology elements:

Radio Frequency Spectrum

Ricochet is faster by design. To reduce latency and increase performance, Ricochet incorporates multiple radio frequency (RF) bands for full-duplex transmission between Wired Access Points (WAPs), poletops (intelligent microcell radios), and the high-speed end-user modems. Ricochet utilizes two Industrial Scientific Medical (ISM) bands of regulated, unlicensed spectrum: the 900 MHz band and the 2.4 GHz band in addition to the licensed 2.3 GHz Wireless Communications Systems (WCS) spectrum.

Frequency-Hopping, Spread-Spectrum Technology

Each microcell radio uses many frequency-hopping channels in the 900 MHz and 2.4 GHz bands and uses a randomly selected hopping sequence, enabling multiple subscribers to use the network simultaneously. This technique makes more efficient use of a given band of frequencies because many more radio transmissions can take place simultaneously without interfering with

one another. It is also extremely robust and will easily cut through potential interference.

Packet-Switched Networking

For efficient transfer of data over radio waves, the Ricochet network transmits data by segmenting and routing information in discrete data units called "packets." Each packet has its own control information for routing, sequencing, and error checking. Packets are routed from radio to radio across the wireless network. This means that multiple communications between radios can occur simultaneously. With packet-switching, a communications channel can be shared by multiple users, with each using the channel only for the time required to transmit a single packet-typically no more than 20 milliseconds. In conjunction with frequency hopping, packet switching provides the Ricochet network with a tremendous amount of network capacity.

Mesh Architecture

The basic structure of the Ricochet network consists of microcell radios strategically placed every quarter to half mile in a checkerboard pattern. This "mesh" architecture routes data traffic between the modems and the WAPs. A higher density design like this ensures the safe, efficient transmission of data, and better indoor penetration of the radio signals. It also offers the reliability and handoff capability necessary to eliminate dropped connections even when moving.

Our mesh architecture provides advantages over the more typical network topology, known as the star topology, in which all communications are required to pass through one or more central base stations or hubs. In this system, congestion and impaired signal communications resulting from weak signal strength are generally addressed by installing another hub, typically a costly and time-consuming process. With the Ricochet network, we can reduce system congestion and increase network coverage and capacity by installing one or more relatively inexpensive poletop or wired access points where needed.

4545. Experimenters - Kits, etc.

Yahoo group: Queen_Creek_Hams
Date: 2017-07-03 00:54:35 UTC
From: Joe Sammartino
Topic: 4545 Message: 4545

Folks,

Here are some websites (Working!) for any of you that might like to
experiment with kit building.

- Milestone Technologies (http://www.mtechnologies.com/)
- Ham Gadgets (http://www.hamgadgets.com/)
- FAR Circuits (http://www.farcircuits.net/)
- Jackson Harbor (www.wb9kzy.com/ham.htm)
- QRPme (http://www.qrpme.com/)

http://www.goldmine-elec-products.com/
www.dangerousprototypes.com/docs/Main_Page#Projects
http://www.oatleyelectronics.com/
www.electronickits.com/kit/complete/complete.htm
http://www.canakit.com/
http://www.rainbowkits.com/

http://www.dzkit.com/
Here's my favorite for audio interfacing your rig for digital modes:

http://www.ebay.com/itm/Psk-31-EASY-DIGI-Sound-Card-Interface-PSK-RTTY-SSTV-NBEMS-JT-65-PCB-KIT-/222365408864?hash=item33c602de60:m:mIM6OajlhJ_uammVK5bZI_w

You can't beat $9.95. Just add your own project box.

I buy most of my parts and stuff on Amazon but if you need something local,
try Circuit Specialists <https://www.circuitspecialists.com/> in Mesa or Fry's
Electronics
<http://www.frys.com/ac/storeinfo/tempe-location-frys-electronics-hours-maps-directions>
in Tempe.

If you have any website for kit building or parts that you would like to
share, please do!

Regards,

Joe, N2QOJ

4546. Queen Creek Emergency Communications Group Net, Sunday, 02 July 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-07-03 02:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4546 Message: 4546

Queen Creek Emergency Communications Group Net reminder
When: Sunday, 02 July 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 449.325 (-) PL 100, 449.325 Simplex if Repeater Fails

Notes: The Queen Creek Emergency Communications Group will hold its weekly radio net Sunday evening at 2100 hours (9:00 PM). All are welcome to check-in on the first Sunday of the month. Only Regional Net NCS are required on all other Sundays of the month. The acting Net Control Station (NCS) will usually be announced in advance.

4547. Arizona Emergency Net - Maricopa, Monday, 03 July 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-07-03 15:55:05 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4547 Message: 4547

Arizona Emergency Net - Maricopa reminder
When: Monday, 03 July 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Hey all,
If any of you have any leads on any surplus 50 ohm hardline, I would love to know about it.
Looking for several runs of 1/2" or greater for the VHF bands (6-1296 MHz) as well as the EME arrays. (2/432/1296). A lot going to be going up this fall / winter, and trying to see what is out there for used / pulls / surplus before I am forced to spend big money on new.

Thanks

- Jay N1RWY

Greetings All,
I hope all of you had a safe and wonderful 4th of July. EVQRP will take another week off due to extreme heat advisories this week. I have been busy with Jay (N1RWY), Friday evening took us to Chino Valley outside of Prescott to pick up some hardline and a nice view of the Goodwin Fire which is just outside of Mayer. Then yesterday we started the day at 04:00 and traveled to St. Johns to pick up a tower and 2 more tri-bander beams and some assorted other do dads. We did make it back to hos house just a little before noon and the trip went off without a hitch. We will try and meet up next week with the weather cools off some, until then I hope you have a great week and try and stay out of the heat. Remember to stay radioactive.

73,
Dave Martin AC7FF

what data in the file are you looking for?
all repeaters, what HF freq.. etc.

I forgot to complete the sentence...

Hopefully, a file with valley 2m/440 frequencies would be fine. Should have
60m channelized freqs also.

Thanks,

Joe

4557. Horizontal Dipole orientation question...

Yahoo group: Queen_Creek_Hams
Date: 2017-07-09 18:38:23 UTC
From: Andrew Ambrosia
Topic: 4557 Message: 4557

Sort of a hypothetical at this point, but...
If you were going to mount a non-rotating horizontal dipole antenna on your roof in Queen Creek, which direction would you point it?
I get that you ideally want to be able to rotate it.. but lets say you have to settle for one orientation or the other. Which direction would you face it?
Gracias,
Andy KG7KWG

But seriously......

If you want to minimize its appearance, you have to orient across your roof.

If you don't have that constraint, then you will consider band and
preferred direction of operation.

Or, put two up and and get a good antenna switch.

One very good loop with remote tuning would work very well...but pricey.

As you know, a dipole up high and in the clear has nulls off the ends.

If it's not high (i.e., under 1/2 wavelength above ground) the
pattern will be altered somewhat. I would place it in whichever position
you can get the most wire as high and as in the clear as you can get it.

If you droop the wires, as in an 'inverted-vee', the pattern will
become less directional.

In either case, try to align it broadside to whatever area you
prefer to have the best signal.

okay, that makes sense. I am toying with the idea of putting up a short mast atop the back patio cover as inconspicuously as possible and attach my 3 horizontal dipole hamsticks (10, 20, 40m). I am messing around with the configuration on a tri-pod in the backyard at the moment. It may stay on the tripod.. but would be nice to get it in a more permanant spot... we'll see.

As Jim said - broadside to the direction of the ends is how the signal will radiate. I think you are MUCH MUCH MUCH better off to string up a 40m inverted V with super thin antenna wire, such as 18 or even 20-22 gauge wire. That thin would be hard to see from neighbors. It would handle 100w just fine. It would be a huge improvement over the ham sticks. Trust me, I have been there and done that with the Hamsticks- you are several, several db down from even a dipole. 40m invetered V even just coming off the peak of your roof at the highest point will get you way more contacts in the log.

Ah, well then you will have 2 other considerations:

1) short, inductively loaded dipoles near the ground won't be
50-Ohms, so matching and decoupling the feedline will important.

2) ground losses (since it won't be high). I have not tried it,
but you might improve performance by placing a (full sized) wire dipole
underneath it as a reflector. It might make a dandy NVIS radiator! (Joe
might have something on this)

Other alternative... is to use the hamsticks as they are intended - as vertical antennas - and place wires under them as radials. Doing the radials correctly - you would see the same performance as mounting these on a vehicle, and see the capability as expected as a mobile antenna. They would not have to be super high mounted - and therefore not visable via the neighbors. You will not burn down any contests with this arrangement, but you will get on the air and work folks.

hmmm... interesting thought to go vertical. I considered doing the hamsticks in vertical configuration... but then I went and got lost in a maze of ham online forums leading me to believe that SSB tends to be horizontal polarization and that I'd be more efficient horizontal. What is truth? I am in search of the truth but am being swayed by the wind (and the internet)...
I guess I will just have to experiment. or...
Why don't you guys just come over to my house in the near future and we can do the "Gathering of the Willing" here one night and you guys can see what I have to work with and you can give me your 2 cents?

In either case, try to align it broadside to whatever area you prefer to have the best signal.

Ah, that must be the April 1 forum...

Antenna (radiating) polarization is independent of modulation type.

Another idea along Jays line would be to use both whips together as
a vertical dipole, if you run the feedline out at right angles to the
dipole..

One important engineering factor: any antenna is better than NO
antenna....

If I may add my 2 cents? The vertical polarization on HF is not an issue due to when the wave is refracted off the ionization layer it no longer is regarded as vertical or horizontal. What a vertical with a good ground system will give us is a low angle of radiation that is beneficial for DX, much like a very shallow bank shot on a pool table. A Dipole less than a 1/4 wave in height will give you a much steeper angle of radiation much like a very steep shot on a pool table. We take advantage of this property when using NVIS propagation. Shoot straight up and the radiation does not travel as far but it gives us very reliable coverage up to about 300 to 500 miles. This is what most of us EMCOMM op's try to attain when transmitting either Tactical or comm's just out of the affected area. When I send e-mail via Winlink on HF I have had best luck with fewest digital retry's using an inverted "V", Half wave endfed is 2nd best, 3rd best a 1/4 wave vertical, I have a portable vertical called the PAC-12 that is very much like the Buddy Pole and is very portable but I see large amount of retry requests from the rec Winlink station I often use in Mexico when I use it. My inverted "V" is very portable by using Plumb Line Reels to hold the wire and I unreel the amount of wire I need for whatever freq I am using. Much like many ant's that are used in the Military. I hope this is of help to you Gary K7WZX

4574. Queen Creek Emergency Communications Group Net, Sunday, 09 July 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-07-10 02:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4574 Message: 4574

Queen Creek Emergency Communications Group Net reminder
When: Sunday, 09 July 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 449.325 (-) PL 100, 449.325 Simplex if Repeater Fails

Notes: The Queen Creek Emergency Communications Group will hold its weekly radio net Sunday evening at 2100 hours (9:00 PM). All are welcome to check-in on the first Sunday of the month. Only Regional Net NCS are required on all other Sundays of the month. The acting Net Control Station (NCS) will usually be announced in advance.

4575. Sunday Net Time

Yahoo group: Queen_Creek_Hams
Date: 2017-07-10 15:08:07 UTC
From: Joe Sammartino
Topic: 4575 Message: 4575

Folks,

I'd like to get some feedback on the possibility of rescheduling our Sunday night QCECG training net to an earlier time. It is now at 2100 hours or 9 PM.

Please share your thoughts and respond to these questions:

1. Do you think the Net should be at an earlier time?

2. If yes, what time would you prefer in this window: 7 PM till 9 PM.

3. If you do not regularly participate on the Net, is your reason time related?

You can respond by direct email to me.

Thanks,

Joe, N2QOJ

4576. Arizona Emergency Net - Maricopa, Monday, 10 July 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-07-10 15:55:03 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4576 Message: 4576

Arizona Emergency Net - Maricopa reminder
When: Monday, 10 July 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

From: Janet Gordon
Topic: 4575 Message: 4578

Hi Joe
I am happy with whatever time. I do have family times on Sunday evening which tends to overlap.

The reason I don't participate in the net calls is I sadly don't understand Who I am supposed to contact prior to this 9 o'clock meeting. I have listen to it many times and only once checked in because it seems to be a group check in versus an individual as it was when I first began doing ham radio. I don't have a clue who I check in with for my area which I think it's 1B and my crossroads are Chandler Heights and Sossaman. I hope this helps.

4579. RE: [Queen_Creek_Hams] Sunday Net Time

Yahoo group: Queen_Creek_Hams
Date: 2017-07-10 22:06:47 UTC
From: Michelle W
Topic: 4575 Message: 4579

Hi Joe,

As others have mentioned Sundays tend to be filled with a variety of activities and end time of them can vary. By 7-9pm my brain is “checked out.”

For me it’s the Sunday parts that’s tough… not the time. Also, is this not a stake check in? Some of us are not LDS.

4580. Re: [Queen_Creek_Hams] Horizontal Dipole orientation question... more

Yahoo group: Queen_Creek_Hams
Date: 2017-07-11 15:11:12 UTC
From: Thomas Miller
Topic: 4565 Message: 4580

I have never recommend verticals for new hams. They can work great but present some problems for new hams. Two ham sticks or any short antenna placed horizontal on a conductive mount and fed braid to one and center to the other (see commercial "buddy pole") is rotatable but loaded shorter antennas are tricky to tune at lower frequencys. The ends of a dipole can be bent to cover the space allowed since the current (max radiation) is in the center of a dipole
Inverted V antennas are less directional than flat tops even though the directionality of dipoles is really over rated. I have an NVIS 40 M antenna stapled to the ridge of the attic. I covers west coast to Texas although I has made Ohio and Indiana. The full sized inverted V is erectable on five minutes to hide from HOA.
A good plan is to experiment over time each of designs I have tried new designs as often as every three years.
I have yet to experiment with is a DDRC antenna which is tricky to assemble but is a 9 foot circle 18 inches off the ground and acts a s a full sized vertical. What a stealth antenna!
Best to start with a dipole at any direction possible and move on to improvements later.

KF7E jim_kf7e@... [Queen_Creek_Hams] <Queen_Creek_Hams@yahoogroups. com> wrote:

Ah, well then you will have 2 other considerations: 1) short, inductively loaded dipoles near the ground won't be 50-Ohms, so matching and decoupling the feedline will important. 2) ground losses (since it won't be high). I have not tried it, but you might improve performance by placing a (full sized) wire dipole underneath it as a reflector. It might make a dandy NVIS radiator! (Joe might have something on this)KF7E

KF7E jim_kf7e@... [Queen_Creek_Hams] <Queen_Creek_Hams@yahoogroups. com> wrote:

As you know, a dipole up high and in the clear has nulls off the ends. If it's not high (i.e., under 1/2 wavelength above ground) the pattern will be altered somewhat. I would place it in whichever position you can get the most wire as high and as in the clear as you can get it. If you droop the wires, as in an 'inverted-vee', the pattern will become less directional. In either case, try to align it broadside to whatever area you prefer to have the best signal.

Hey all- want to decode slow scan pictures down from the space station? Coming up for a full day the space station will be sending images on each pass. These can be decoded with a simple antenna and basic computer.

Hey Jay,
Thanks for posting this. My google-fu is weak. I see articles on setting up HF SSTV with the signal link, but no how-tos on setting up for FM. Do I simply hold the HT to the computer microphone or do I hook up the signal link?

thanks,
christi KG7NAD

Christi,
IN YOUR case, with the 891, I would connect the signalink as you do for the HF work. Leave the radio on the frequency mentioned, with the squelch off. Load the software and make sure it is seeing the signal link as the audio input, NOT the microphone on the laptop.
Then, select push the "auto" button on the software and walk away.

Here comes the IF statements.

IF you have a solid pass
and
IF they are sending and image on that pass
and
IF they are not in the middle of the transmission as it passes over

THEN
You might be able to see a full decoded image.
Most likely, using it the way I mentioned, you might get some partial decoded images, but something none the less.

I've recently acquired the book, "Networking for Dummies".

It looks to be a reasonable reference manual for networking newbies.

It's too large to attach to this email and too large to upload to the
Group. So, just navigate to the following link and download the file.

https://www.dropbox.com/s/btwmf0o2r8ipynm/Networking_For_Dummies.pdf?dl=1

For those of you who are running ACLOG from N3FJP as your home logging program - this book that Joe posted will help in understanding how to network your log file- so you can connect to your main log when in the park, or on the rim, or some other location.. (as long as you have cellphone/wifi access).

Hi Michelle,

The QCECG is not an LDS group. The districts and regions were drawn up around the LDS stake boundaries because they closely align with neighborhoods - mainly schools (medical triage) and Stake centers (district command centers). These sites were selected by QC as part of their formal disaster plan. They just happen to be LDS because no other faith based leadership stepped up to meet the Town's request. The schools make good medical stations and the LDS buildings make good district HQs.

Regards,

Joe, N2QOJ

4595. Ocotillo Repeater Audio Feed

Yahoo group: Queen_Creek_Hams
Date: 2017-07-13 23:42:18 UTC
From: Joe Sammartino
Topic: 4595 Message: 4595

Remember, we have a 24/7 audio stream of the Ocotillo Repeater.

Quite handy if you want to hear your own audio or if you are not able to listen in via radio for whatever reason.

It's great for listening to the Sunday and Wednesday night nets from whereever you are, assuming you have access to an Internet enabled PC, tablet, or smartphone.

Here the link: http://www.broadcastify.com/listen/feed/10544/web/?rl=rr

Bookmark it or drag it from your navigation bar to the desktop of your PC to create a desktop shortcut.

Regards,

Joe, N2QOJ

Hi Janet,

You can always send me a note to clarify any issues.

You can also check into the main net as a QCECG member anytime. As for the regional net, you should be checking in to 1B on 146.39 Mhz simplex. If no one is on frequency, you can take on the district net duty and ask for check-ins. There is no set district net operator at this time.

Regards,

Joe

Thanks Jay,

I have an FTM-450 Digital/Analog 2M/440 Mobile that was only used for a short time – works perfectly and is just like new. Asking $450 OBO.

I also have a straight 2m Mobile by Yaesu 25W but it's model number escapes me. $50 sound about right? I'll take the first $40.

I have a straight 440 Mobile by Yaesue 25W but again, I don't have the model number. Same price as the 2M rig

And lastly, I have the Yaesue 2m 440 FT1D with all the trimmings. Asking $500 OBO.

I'll entertain REASONABLE offers.

Scott

4601. Re: Sunday Net Time

Yahoo group: Queen_Creek_Hams
Date: 2017-07-14 23:25:24 UTC
From: Joe Sammartino
Topic: 4575 Message: 4601

Hello folks,

The consensus from your responses (thank you) is that most members would like to see the time of the regional net - now at 2100 - be moved to 2000 hours, that's 8 PM to you civilians.

That would mean that the districts nets (every Sunday except 1st Sunday of the month), usually held 1/2 hour before the regional net, need to move up to 7:30 PM. I'd recommend the district nets commence at 7:45 PM or 7:30 PM, whatever works best. They usually can be completed within 10 minutes. If you find that moving your district net up would be a problem, please let me know.

I did receive two responses that suggested the net meeting day be moved from Sunday to another day, preferably a week day. At this time, we will stick to Sunday and see how the new schedule works out.

The goal is more active participation on a regular basis. We will begin immediately starting with this Sunday, July 16th. I look forward to a great turnout at 2000 hours for the regional net on the Ocotillo Repeater.

Regards,

Joe, N2QOJ

I have an FTM-450 Digital/Analog 2M/440 Mobile that was only used for a short time – works perfectly and is just like new. Asking $450 OBO.

I also have a straight 2m Mobile by Yaesu 25W but it’s model number escapes me. $50 sound about right? I’ll take the first $40.

I have a straight 440 Mobile by Yaesue 25W but again, I don’t have the model number. Same price as the 2M rig

And lastly, I have the Yaesue 2m 440 FT1D with all the trimmings. Asking $500 OBO.

I’ll entertain REASONABLE offers.

4609. New FT8 Mode for WSJT-X

Yahoo group: Queen_Creek_Hams

From: Joe Sammartino
Topic: 4609 Message: 4609

Lots of buzz about this new mode.

Jay, N1RWY, has been experimenting with it and is our local subject matter expert on all modes related to WSPR.

Check out his twitter feed at: https://twitter.com/n1rwy

And more info here: https://wsjtx.net/home/ft8-mode.html

And here:
http://www.arrl.org/news/new-ft8-mode-included-in-wsjt-x-beta-release

Slight correction.... WSPR- still a neophyte. WSJT65/JT9/ and now FT8.. about 3800 qsos on those modes- so I do have a fair amount of knowledge on how to get up and running on those.

FT8 is different but fun. Been spending the weekend working stations on 6m on FT8. Interesting mode- should have a blog about it soon- comparing the similarities and differences between FT8 and JT65.

If you want to try FT8- which is super popular on 20m/40m right now- it is only available in the beta release of WSJT-X. Version 1.8. Not in 1.7. Or in JTdx software.

Jay N1RWY

4611. Re: Sunday Net Time

Yahoo group: Queen_Creek_Hams
Date: 2017-07-16 18:13:39 UTC
From: Joe Sammartino
Topic: 4575 Message: 4611

Reminder:

New Regional Net Time begins this evening at 2000 hours or 8 PM.

District simplex nets should move up to 7:45 PM or 7:30 PM, if possible.

Here are the districts simplex frequencies we use and some net operator assignments:

Here is the frequency list:

District 1A 147.44
District 1B 146.39
District 1C 147.58
District 2A 146.54 - Ron
District 2B 146.56
District 2C 146.58 - Jay
District 2D 146.46 (temp)
District 3B 147.54 - Joe/Brandon
District 3C Include with 3B
District 4A 146.48 - Steve
District 4B 145.33
District 4C 146.44
District 5A 146.42
District 5B 145.33
District 5C Include with 5B

District net check-ins should be recorded and reported to the regional net operator.

Our regional net operator will create a master check-in log for the group.

Try this link for an on-line net log/mapping tool. http://k5ehx.net/netmap/ Try it with some mock entries ahead of time. You can just right-click print to a PDF when done. It's ok once you get the hang of it. Here's my video on how to use the tool: https://youtu.be/33yWmX2kQ18

Regards,

Joe, N2QOJ

4612. ☢ Narrow Band FM or Standard FM? ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-07-16 19:15:24 UTC
From: Joe Sammartino
Topic: 4612 Message: 4612

Most of our handheld and mobile radios offer the option to program frequencies as narrow band or standard FM transmission. Here's a brief discussion of the topic.
Narrow Band FM in Two-Way Radio

Good examples of Narrow NFM are FRS radios, PMR radios, or a modern business-band UHF radios. Narrowband NFM only has a modulation index of .8 which is about half the modulation index of normal FM. You can fit twice as many channels per megahertz (approximate bandwidth 11 kHz with channel spacing 12.5 kHz).

- *NFM may have better spectrum efficiency than FM, but NFM just doesn’t go as far.*

The 6 decibels reduction in NFM deviation and modulation index is sadly a 6 dB decrease in signal-to-noise ratio (SNR), and this unfortunately means that NFM causes a loss of about 30% of your distance coverage versus regular FM. Of course Narrowband FM works fine when you are nearby, when you have strong signals (full quieting), but when you get in the fringe zone at far distances, Narrowband NFM goes to static quite rapidly.

- *You would need to double or triple your NFM transmitter Watts of power to equal a regular FM transmitter.*

- *That means that those who are interested in emergency, disaster, or SHTF simplex radio communications should stick with regular FM instead of NFM whenever possible. Switching from NFM to FM will boost your range by 30%.*

The Future of FM

This recent change to NFM will probably be the last of the FM series. In the future, modulation will be all digital. With digital, the spacing between channels can be even more narrow, and the distance performance can be improved.

This brief - but factual discussion - is proof positive that installing a digital capable uhf repeater, such as Icom's Fusion repeater for QCECG and the local ham community, is an act of true visionaries! ☐

May the Electro Magnetic Force be with you.

4614. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-07-16 20:25:40 UTC
From: Dave Martin
Topic: 4254 Message: 4614

Greetings All,
It's been awhile since I have emailed and EVQRP has done a Gathering Of the Willing in the park. We will be hosting one this coming Friday the 21st of July. We will gather at Desert Mountain Park in the rear of the park in our usual spot, across from the baseball fields and southeast of the bathroom building. We will start at our usual time of 17:00hrs at the Ocotillo Pavilion. I will bring a cooler of water. This event will be weather dependent, meaning if it looks like a major storm is brewing we will not setup. We will have our usual 3 station setup (Phone, Digital and CW). I'm going to bring my headset and my adapter with another set of headphones for those that want to listen in while I do CW. Please feel free to bring your own equipment and set up and operate. We encourage all to participate. You don't need to run QRP, just bring your portable station and get on the air and have fun.

We have not gathered since field day and now that we have a successful Field Day behind us it's time to focus on those items that you may need to work on before the next event. I have a couple items that I want to work on before the next event, my number 1 take away from Field Day is to have a better plan for power while operating at night. My other take away is becoming a better CW operator during contesting. I want to be able to copy in my head so I don't need to write down call signs and signal reports. I know this only comes from putting in the time and getting on the air. I know about half of the people that attend the Gatherings were at Field Day and having these gatherings are a good way to work out the bugs and become a more efficient operator, or making your station more efficient and ergonomic.

I would like to pass along 2 things. If you notice this is being sent from a new email address evqrpaz@.... This helps me keep track of things instead of using my own email address and the last thing to pass along, for all of you that listen to podcasts, there is a new one that just started, it's called Field Radio Podcast. It's being hosted by John (W7DBO). John is a ham from Utah and his podcast will cover all things from operating in the field such as equipment, building projects and things related to operating in the field away from your shack. I listened to episode 1 and it sounds like it will be a good one to follow. Just go to iTunes and search Field Radio Podcast and hit subscribe. You can also listen online at Hamradio360.com.

I hope to see you all this coming Friday evening at Desert Mountain Park for some radio fun and lots of good fellowship. Have a good week and remember to stay radioactive.

Dave AC7FF

4615. Hamstick experimentation...

Yahoo group: Queen_Creek_Hams
Date: 2017-07-17 00:50:07 UTC
From: Andrew Ambrosia
Topic: 4615 Message: 4615
Attachments: 3 described; binary payloads are missing from this source WARC

Hey QC hams,
I figured I would shoot out an email with some info on my venture into Hamstick experimentation over the past few weeks. You may know from other posts to the group that I live in an HOA restricted (a.k.a. government oppressed) community, and that over the past couple of years I have been experimenting with different HF antennas. I had a zero-five stand up 33' vertical antenna which besides being in a very poor position next to my house, breaker-box and fence, spiraled into a fit of troubleshooting (and learned knowledge) about nuisance tripped circuit breakers. From there I landed on the buddistick which I have been pretty happy with, particularly when taking it to the park. Well recently (because I continue to be unsatisfied), I decided to do some tinkering with Hamsticks. Well in reality they are MFJ Hamtennas, but we'll call them Hamsticks. I purchased a pair of 10m, 20m and 40m sticks that I have been putting up in a horizontal dipole position over the past few months on a wooden pole in the backyard. Meh, its been ok. Not too impressed but its been experimentation so that's how it goes. So I decided last week (or so) that I would spend some time tinkering with some different ways to mount these things. I bought two more dipole mounts for the sticks and decided to spend some time this weekend testing different vertical and horizontal configurations with PVC (you can see in the pics). I figured this would be a good way just to see what I see (er, hear). It was definitely helpful to have an SWR analyzer so I could at least get an idea how things were resonating in the different configurations.
Anyway, here is what I learned.

- My family thinks I am the guy from the movie Honey I Shrunk the kids

- PVC is cheap enough that if you buy a bunch and don't get very far at least you didn't go broke

- Its good to quickly take down your flimsy PVC mast when a monsoon rolls in

- If the antenna falls into the pool, no one will get electrocuted unless you are transmitting at the time

- The Hamsticks don't like to be mounted parallel to each other; but when perpendicular they didn't seem to mind (didn't effect SWR at least)

Well, that's what the weekend had in store. Guess I will see you on UHF/VHF :)
73,
Andy KG7KWG

<QCComGroup@yahoogroups.com> wrote:

Reminder:
New Regional Net Time begins this evening at 2000 hours or 8 PM.
District simplex nets should move up to 7:45 PM or 7:30 PM, if possible.
Here are the districts simplex frequencies we use and some net operator assignments:
Here is the frequency list:
District 1A 147.44
District 1B 146.39
District 1C 147.58
District 2A 146.54 - Ron
District 2B 146.56
District 2C 146.58 - Jay
District 2D 146.46 (temp)
District 3B 147.54 - Joe/Brandon
District 3C Include with 3B
District 4A 146.48 - Steve
District 4B 145.33
District 4C 146.44
District 5A 146.42
District 5B 145.33
District 5C Include with 5B

District net check-ins should be recorded and reported to the regional net operator.

Our regional net operator will create a master check-in log for the group.
Try this link for an on-line net log/mapping tool. http://k5ehx.net/ netmap/ Try it with some mock entries ahead of time. You can just right-click print to a PDF when done. It's ok once you get the hang of it. Here's my video on how to use the tool:

4620. Queen Creek Emergency Communications Group Net, Sunday, 16 July 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-07-17 01:55:05 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4620 Message: 4620

Queen Creek Emergency Communications Group Net reminder
When: Sunday, 16 July 2017 08:00 PM to 09:00 PM
(GMT-07:00) Arizona

Where: 449.325 (-) PL 100, 449.325 Simplex if Repeater Fails

Notes: The Queen Creek Emergency Communications Group will hold its weekly radio net Sunday evening at 2000 hours (8:00 PM). All are welcome to check-in on the first Sunday of the month. Only Regional Net NCS are required on all other Sundays of the month. The acting Net Control Station (NCS) will usually be announced in advance. Members and Visitors are welcome as Net Control directs.

4621. Arizona Emergency Net - Maricopa, Monday, 17 July 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-07-17 15:55:04 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4621 Message: 4621

Arizona Emergency Net - Maricopa reminder
When: Monday, 17 July 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

4622. Done experimenting with my Hamsticks - for sale

Yahoo group: Queen_Creek_Hams
Date: 2017-07-18 20:35:13 UTC
From: Andrew Ambrosia
Topic: 4622 Message: 4622

QC Hams,
I finished my experimentation with the MFJ Hamsticks this past weekend. I determined that they are not going to out-perform my Buddistick to the extent that I need to keep these. 6 in one hand, half a dozen in the other when comparing to what I get with the Buddistick.
So, I am selling them off so that I dont become a Ham radio hoarder (like some of you, and you know who you are) :)
Posted here on Craigslist, but of course I will give first dibs to any QC Ham that shows interest.

Most of our handheld and mobile radios offer the option to program frequencies as narrow band or standard FM transmission. Here's a brief discussion of the topic.

Narrow Band FM in Two-Way Radio

Good examples of Narrow NFM are FRS radios, PMR radios, or a modern business-band UHF radios. Narrowband NFM only has a modulation index of .8 which is about half the modulation index of normal FM. You can fit twice as many channels per megahertz (approximate bandwidth 11 kHz with channel spacing 12.5 kHz).

a.. NFM may have better spectrum efficiency than FM, but NFM just doesn’t go as far.
The 6 decibels reduction in NFM deviation and modulation index is sadly a 6 dB decrease in signal-to-noise ratio (SNR), and this unfortunately means that NFM causes a loss of about 30% of your distance coverage versus regular FM. Of course Narrowband FM works fine when you are nearby, when you have strong signals (full quieting), but when you get in the fringe zone at far distances, Narrowband NFM goes to static quite rapidly.

a.. You would need to double or triple your NFM transmitter Watts of power to equal a regular FM transmitter.
a.. That means that those who are interested in emergency, disaster, or SHTF simplex radio communications should stick with regular FM instead of NFM whenever possible. Switching from NFM to FM will boost your range by 30%.

The Future of FM
This recent change to NFM will probably be the last of the FM series. In the future, modulation will be all digital. With digital, the spacing between channels can be even more narrow, and the distance performance can be improved.

This brief - but factual discussion - is proof positive that installing a digital capable uhf repeater, such as Icom's Fusion repeater for QCECG and the local ham community, is an act of true visionaries! ☐

May the Electro Magnetic Force be with you.

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 6 minutes. It will be at good height and should be an excellent viewing barring any cloud cover.

Time: Sat Jul 22 9:19 PM
Visible: 6 min
Max Height: 52°
Appears: 10° above WSW (248 degrees)
Disappears: 12° above NE (45 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

Regards,

Joe, N2QOJ

Great info from Gary, K7WZX

---------- Forwarded message ----------

Joe I have been copying the ISS the last two days and I have recorded and posted the pic's on the BCS-ERC Mesa Bishop's Storehouse Facebook page. I attached a Doc of the pictures received yesterday and this morning using my dual band J-Pole ant that I have been showing people how to build. (commercially built the Arrow ant) and a Yaesu FT-2900. I can't send you the audio as Juno will not let me attach files that big but you can hear it on the Facebook page. Using the audio you can also decode the audio into pic's using MMSSTV but you have to right click on the modes to the the PD-120 mode that is being sent. We still have a few passes people could listen to yet. It will stop sending SSTV on Mon evening.

4634. Arizona Emergency Net - Maricopa, Monday, 24 July 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-07-24 15:55:02 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 4634 Message: 4634

Arizona Emergency Net - Maricopa reminder
When: Monday, 24 July 2017 09:00 PM to 10:00 PM
(GMT-07:00) Arizona

Where: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes: AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

To: Dave Martin <ac7ff1@...>

Greetings All,
I hope everyone enjoyed our rain last night and this morning. It sure was nice to wake up to a nice cool morning. It did make a mess in town and probably made the morning commute a little tricky but in Arizona fashion it was over by 10 with just clean up left for some.

EVQRP will be hosting another Gathering Of the Willing this coming Friday evening at Desert Mountain Park. We will gather in our usual spot across from the baseball fields and just Southeast of the bathroom building. We will be at the Ocotillo Ramada at 17:00hrs. We will have our usual stations up and running and we encourage all to bring their portable station, set up and have a good time. All of this will be what the weather looks like of course.

Nothing to report from last week Rick (W9JRF), Jay (N1RWY), Andy (KG7KWG) and Tyler (AF7VP) and myself were the only ones to make it to the park. Rick and I set up but a storm rolled in about 10 minutes after we set up so we decided to wait it out. Jay left early and he reported to us that a big dust storm was headed so we broke the radios down and put things away before the dust rolled in. No contacts were made and we did manage to get some good fellowship in before we called it an early night.

I hope everyone has a great week and I hope to see you all on Friday evening. Take care and remember to stay radioactive.

Dave AC7FF

I am very interested in the future of digital. I do some digital work, but for using it on a repeater requires knowing which radio to use. I use my radios in AZ during the winter, in Clarkston MI during the summer and locations in between. I have friends in AZ using D-star, C4FM, and DMR. In Michigan they use all of these and P25. I am holding for the correct system for me to use. There is also several low band systems using keyboard digital as well as more for digital voice mixed in with SSB.

Most of our handheld and mobile radios offer the option to program frequencies as narrow band or standard FM transmission. Here's a brief discussion of the topic.

Narrow Band FM in Two-Way Radio

Good examples of Narrow NFM are FRS radios, PMR radios, or a modern business-band UHF radios. Narrowband NFM only has a modulation index of .8 which is about half the modulation index of normal FM. You can fit twice as many channels per megahertz (approximate bandwidth 11 kHz with channel spacing 12.5 kHz).
- NFM may have better spectrum efficiency than FM, but NFM just doesn’t go as far.
The 6 decibels reduction in NFM deviation and modulation index is sadly a 6 dB decrease in signal-to-noise ratio (SNR), and this unfortunately means that NFM causes a loss of about 30% of your distance coverage versus regular FM. Of course Narrowband FM works fine when you are nearby, when you have strong signals (full quieting), but when you get in the fringe zone at far distances, Narrowband NFM goes to static quite rapidly.
- You would need to double or triple your NFM transmitter Watts of power to equal a regular FM transmitter.

- That means that those who are interested in emergency, disaster, or SHTF simplex radio communications should stick with regular FM instead of NFM whenever possible. Switching from NFM to FM will boost your range by 30%.

The Future of FM
This recent change to NFM will probably be the last of the FM series. In the future, modulation will be all digital. With

digital, the spacing between channels can be even more narrow, and the distance performance can be improved. This brief - but factual discussion - is proof positive that installing a digital capable uhf repeater, such as Icom's Fusion repeater for QCECG and the local ham community, is an act of true visionaries! ☐

Subject: Gathering Of the Willing
To:

Greetings All,
Good morning to all, I hope you are enjoying your Sunday morning and hope that you had a great week. EVQRP will hosting another gathering this coming Thursday evening at Desert Mountain Park at approx. 17:00hrs. We will set up our normal 3 stations (Phone, CW and Digital). For those that have never attended we will be across from the baseball fields and just Southeast of the restroom building. We will probably be there until around 21:30 so if you can't make until later in the evening there is always time to stop in and say Hi and get on the air. We encourage all to bring their portable equipment and set up and play radio.

Our gathering on Friday evening was fun. RIck (W9JRF) set up his FT-817 with his 45watt amp and both of us made a phone contact on 40m with Jose (TG9AOR) who was aeronautical mobile. He was flying back to Guatemala and was over the Gulf of Mexico and had a strong signal into AZ. He had a small pileup and was calling DX and both Rick and I had no problem getting in there and making the contact. He gave both of us a 5/9 and put us in his log. I also made 2 contacts (PY2XIZ) (PY2DS) on CW to Brazil. Again, both had very strong signals into Queen Creek and I grabbed them both on my first try. I also tried making a contact to Morocco on CW but couldn't bust the pile up so I moved on. Later in the evening Troy (K7TJK) stopped by after work and we had some good fellowship before breaking down and calling it a night.

I hope everyone has a great week and I hope to see you there on Thursday evening to play radio and have some good fellowship with each other. Remember to stay radioactive and stay safe and well hydrated.

Hello QC Hams,
I figured I'd keep the email flowing to the Yahoo group with a little info from my Sunday project.
I started out with a buddistick, but have since added enough parts to have a buddipole. Since I had the extra mount from the buddistick (now that I have the versatee), I was messing around with the buddistick mount with different configurations and I accidentally bent it (it was my fault as I was overloading it with extra antenna arms etc).
Anyway, since the mount was basically ruined, I decided to use the parts from the buddistick mount and build another mount from a standard L bracket. It was easire than I anticipated so I figured I would show some pictures in case anyone likes to tinker like I apparently do. It has the standard 3/8-24 threaded nut to receive the antenna, and has two points to connect the radials/counterpoises. Its substantially stronger than the buddistick mount was.
Anyone experimenting with mounts like this?

Andy KG7KWG

4649. Testing at the Queen Creek Emergency Communications Group Monthly Meeting, 8/10 @ 7 PM

Yahoo group: Queen_Creek_Hams
Date: 2017-08-05 20:59:59 UTC
From: Joe Sammartino
Topic: 4649 Message: 4649

The monthly meeting of the Queen Creek Emergency Communications Group will also be featuring an ARRL VEC Test Session administered by members of QCECG <http://www.qcecg.org>, QCARC <http://www.queencreekarc.org>, East Valley QRP <https://www.dropbox.com/s/l51l83ttyqxlj53/evqg.pdf?dl=0>, and East Valley Volunteer Examiner Team.

When: Thursday, August 10th @ 7 PM

Where: Queen Creek Town Hall, 22350 S Ellsworth Rd, Queen Creek, Arizona 85142
<https://www.google.com/maps/place/22350+S+Ellsworth+Rd,+Queen+Creek,+AZ+85142/@33.2447405,-111.6354952,19z/data=!3m1!4b1!4m5!3m4!1s0x872a4d1667220b8b:0x5e744986ffa8b0a3!8m2!3d33.2447394!4d-111.634948?hl=en>

Talk-in: 449.475 Mhz PL 136.5 Hz

APRS: <https://aprs.fi/#!call=a%2FQCECG&timerange=3600&tail=3600>
https://aprs.fi/#!call=a%2FQCECG&timerange=3600&tail=3600

Are you ready to upgrade? Then come and bring your photo ID, FRN or SSNUM, and $15.

If you know someone who is looking to get tested for the Technician license, pass on the following information to them:

Exams are every second Thursday of the month in Queen Creek

Details about what to bring to an exam session is listed below.

You will need to bring the following with you:

· $15.00 Exam Fee

· Photo ID – Driver’s License, Student ID, or Any government issued photo ID

· Your Social Security Number is required for the FCC application. However, if you register with the FCC in advance, you can receive an FRN, which is an FCC Registration Number. You can use that on your application instead of the SSN. Here’s the link to get your own FRN number: FCC FRN Registration <http://wireless.fcc.gov/uls/index.htm?job=about_getting_started#d36e21>
You do not need to pre-register but we would appreciate you letting us know if you intend to get tested so we have some idea of the turnout to expect.

Regards,

Joe Sammartino, N2QOJ

Topic: 4221 Message: 4652

---------- Forwarded message ----------
From: Dave Martin <evqrpaz@...>
Date: Mon, Aug 7, 2017 at 8:53 AM
Subject: Gathering Of the Willing
To: Dave Martin <ac7ff1@...>

Greetings All,
Good morning to all. EVQRP will be hosting another Gathering this coming Wednesday evening at Desert Mountain Park at 17:00hrs. We will gather at the Ocotillo Pavilion which is across from the baseball field and just Southeast of the restroom building. We will set up our usual 3 stations and see how many contacts we can make. We encourage everyone to bring their portable station and set up with us, We usually go until around 21:00/21:30hrs. We always have a great time and also have really good fellowship.

Last week was a bust. Threatening skies didn't make for a great evening. Troy and I decided to go to the park and eat our dinner and wait out the storm. Well about 30 minutes in and with the rain going sideways we decided to call it. When the rain finally let up we ran back to our vehicles and headed for home. It was nice to eat dinner under the Pavilion in cooler weather. Queen Creek received 1.25 inches of rain that evening.

I hope to see all of you on Wednesday evening. Weather is supposed to get hotter this coming week with temperatures climb again. It's supposed to be 110 on Wednesday. I hope you all have a great week and again I hope to see you all oon Wednesday evening for some great fellowship and playing radio. Remember to be safe and stay radioactive.

73,
Dave AC7FF

If you want to get rid of your storage compartment rust stains, check out Whink. It is based on hydrofluoric acid, so it's not child's play, but the stuff really works. My mom turned me on to it some 30+ years ago for removing rust stains from fabrics. You may not find it at your local grocery store, but it is still available on Amazon. I recently used it to remove rust stains from the windows and windshield of a truck I stored under a rusty steel roof and it worked wonders. Read and follow ALL label directions and warnings! Use gloves!

> Thanks, Bud. Living in an antenna restricted HOA governed community, I do have a dog in this fight. I have always supported this and other similar bills in the past. When I saw the "revised" wording, giving more power to HOA acceptance control, I figured that " something is better than nothing", and continued to support it. However, after reading this and other logical rebuttals, the bill seems "worse than nothing". I now totally agree with K1VR, and hope it doesn't pass in it's current form.
>
> In my situation, shortly after I moved in (15 years ago), I applied to the Architectural Committee for a multi-band, 25 foot vertical with built-in counter poise "spokes". Not too visually imposing. The CC&R's stated that they had 45 days to respond, or approval could be assumed. Hearing nothing well after that time frame, I wrote back that I was going ahead with the project. That got their attention. I then received a nasty letter with the headline "CEASE AND DESIST". I wasn't going to poke the bear any further. After a number of years compromising with attic dipoles, I said "#&$@% it", and put a screwdriver antenna up on the hill behind my house, hidden from view among the native desert shrubs up there. So far, so good. It's been about 10 years now, with no one the wiser. Enjoying ham radio and contesting with the AOCC.

Thanks for that information. I am a brand new operator (got my license July 27th, KI7PBR) and have the double whammy. I am in an HOA area but I am also a member of the board (please don't throw rocks). We are pretty lenient for things compared to most since we are a smaller community. But antenna's are a big nono. I am 100% in favor of this BILL if it gives me any option. My biggest problem is it wouldn't look very good if the treasurer of the board has a hidden antenna in his yard. It in all honesty, could be litigious to the community.

TO ALL, POKE McCain and Flake to PASS THIS BILL…please…

From what I can tell from reading exerps of the bill, it simply gives more power to HOAs. I didn't know they needed more power? I am not an HOA hater, but it seems to me like they're powerful enough already

4658. ☢ International Space Station visible Tonight ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-08-10 16:29:21 UTC
From: Joe Sammartino
Topic: 4658 Message: 4658
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

Another opportunity to spot the station tonight for only 2 minutes. It will be at an OK height and should be good viewing barring any cloud cover.

Time: Thu Aug 10 8:55 PM
Visible: 2 min
Max Height: 45°
Appears: 19° above NNW (from 338 degrees)
Disappears: 45° above NNE (toward 23 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

Regards,

Joe, N2QOJ

To: "Dave Martin" <ac7ff1@...>
Cc:

Greetings All,
Good morning all. EVQRP will be hosting another Gathering Of the Willing next Tuesday evening. We will gather at the Ocotillo Pavilion in the back of the park across from the baseball fields and just Southeast of the restroom building. We will start around 17:00hrs. We usually go until around 21:00/21:30hrs. We will set up 3 stations and see how many contacts we can make.

On Wednesday evening we had a great time. Christi (KG7NAD), Troy (K7TJK), Rick (W9JRF) and myself were in attendance. I made 1 CW contact to Vermont, Dorothy (KA1LDH) had a strong signal into Arizona. We were having a good QSO on 20m and the band changed and she started fading, we said our 73 and she was in my log. The big contacts of the evening went to Rick (W9JRF). After my QSO I heard him making a contact on 40m I believe. Christi was sitting next to me watching me do CW. Rick had his headphones on and we heard him say his contacts name as Bud. Then I heard Rick repeat his contacts call sign as W3FF. I told Christi and Troy that was Budd Drummond from Buddipole. I motioned for Rick to remove his headphones, I told him that was Budd from Buddipole and to let Budd know that he was using a buddipole setup and also let him know about his coil problem.

Rick's setup at the park is his FT-817 and his antenna is usually and Buddipole set up in the vertical configuration, which is has been having excellent results with. Rick described his problem with the coil and Budd gave him his email address and told him to email him and he would take of it for him. Pretty cool for Budd to do that. I have always heard great things about the Buddipole people when it comes to making good on their products. It was a great contact and I believe one that Rick will remember. If you remember back a couple months ago Andy (KG7KWG) came to a Gathering and set up his Buddistick and his second contact was with Budd (W3FF). I believe Andy will always remember that contact as well. Rick's next contact was with Ed (ZL4IR). Ed had a strong signal into Arizona from New Zealand. He gave Rick a 5/8 and they had a quick QSO then I grabbed the Mike and made a contact as well. He gave me a 5/8 and we had a short QSO as well.

We had a great time as always and of course there was plenty of good fellowship along with a great time playing radio. I hope to see you on Tuesday evening at Desert Mountain Park. Have a great weekend and remember the QC Amateur Radio Club breakfast is Saturday morning at the IHOP in

Queen Creek and 08:00hrs. Remember to stay radioactive.

73,
Dave AC7FF

First off, it was awesome to meet several folks at lunch today and really enjoyed the company and the chatting. I will be back for more....thank you for making me feel so welcome in my new "hobby"....

During lunch the topic of HOA's and antenna's came up, I went to our HOA website and pulled up our CC&Rs for my community. I was surprised to find out, we dont outright say NO to them, but they do have to be approved by the Architectural Committee. Of course as some of you heard our committee is only 2 board members and I am one of them. lol...I have to abstain on my vote so I only need to discuss with PM and HOA president. I have a pretty good chance of being able to put up an external for 2m and 70cm. Once I go to the next level of this hobby, I will be putting in a request to put one up. Great news for me. Attached is the snippet of our bylaws concerning antennas. Side comment, this is the original and it required Satellite Dishes to be ground mounted, that is no longer the case, we all have ours mounted on eve's or patio covers.

I hope to meet you at one of the upcoming events Gary. Have lived in three different homes with HOAs in Gilbert and Queen Creek end it always comes down to architecture committee approval. Pretty much for any changes to the exterior of your home. It's committee is different, with their own subjective nature. Best to hope for is a committee that is appreciative of the hobby or is not do hung up on aesthetic perfection

Andy,

Look forward to meeting you and others. Dave mentioned it was a really small turn out this week but there was still 8 to 10 people I am guessing.

Being on the board here helps me a little, but also, our HOA doesn’t have swastikas on its arms either. We allow backyard type changes with out approval providing it doesn’t interfere with the neighbors. Most major changes do and before I was on the board, everything I put in was approved (extended patio cover 20ft, added backyard gazebo, etc). I do have a high peaked roof so my attic is almost as large as my house. Should I need to, I have plenty of places to put an antenna.

lol. Ya, the architectural committees I have sought approval from have been reasonable to work with. Essentially they have stated that "if it is consistent with the desired aesthetics of the neighborhood" and if all the neighbors around me sign off on it, then its ok. But I have not sought approval on an HF antenna as of yet. Thanks for the info.

International Space Station visible tonight

Folks,

Good news! Another opportunity to spot the station tonight for 4 minutes. It will be at a very great height and should be an excellent viewing barring any cloud cover.

If you check in to the QCECG net tonight at 8 PM, tell us about your ISS spotting experience!

Time: Sun Aug 13 7:55 PM
Visible: 4 min
Max Height: 64°
*Appears: 24° above NW **(from 315 degrees)*
*Disappears: 14° above ESE **(toward 113 degrees)*

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

If you are an amateur radio operator, listen in (or work) on these frequencies:

Voice and SSTV Downlink: 145.80 (Worldwide)
Voice Uplink: 144.49 for ITU Regions 2 and 3
VHF Packet Uplink and Downlink: 145.825 (Worldwide) - easiest to hear
UHF Packet Uplink and Downlink: 437.550
UHF/VHF Repeater Uplink: 437.80
UHF/VHF Repeater Downlink: 145.80

Topic: 4673 Message: 4673

Folks,

Andy, KG7KWG, brought up an excellent point during this past week's QCECG meeting.

For new hams, a new handie-talkie alone may not be the best experience. I have to agree with his sound (pun) logic. A mobile radio, especially if you are commuting every day, will give you the opportunity to use your radio, gain experience, make new ham friends, and just have an overall much better experience than operating a hand-held exclusively.

The following is an excerpt of Andy's email to a friend that has just passed his Technician license exam:

==========

"Congrats on getting your Ham license yesterday.

Here are some recommendations.

First off. You will get much more use and benefit from having a mobile radio in your car than just having a walkie talkie. Having it in your car will give you commute time to and from work to play with it and get comfortable on the air. Plus Greg, Alex and I are doing that so we can chat from time to time on the repeaters while commuting.

Below are the radios I would recommend. Each of these is inexpensive and can easily be moved from one car to another in 5 mins if you do something like a velcrow mount and 12v cigarette power (since I know you camp with a different car than you commute with on a daily basis. There are more expensive radios of course, but these are good for getting a full solution at around $120 bucks or so.

Mobile Radios to consider (in the order I prefer, but also in most cost to least cost):

<goog_1720903950>
https://www.amazon.com/BTECH-MOBILE-UV-50X2-Mobile-Radio/dp/B06XK83VRV/ref=pd_bxgy_107_2?_encoding=UTF8&psc=1&refRID=FN6H7JCP6PSG0VQFXYWM

https://www.amazon.com/BTECH-MINI-UV-25X2-Mobile-Radio/dp/B06XD3CQ6H/ref=sr_1_3?ie=UTF8&qid=1502491150&sr=8-3&keywords=btech+mobile
<https://www.amazon.com/BTECH-MINI-UV-25X2-Mobile-Radio/dp/B06XD3CQ6H/ref=sr_1_3?ie=UTF8&qid=1502491150&sr=8-3&keywords=btech+mobile>

<goog_1720903956>
https://www.amazon.com/QYT-Transceiver-Radios136-174-400-480MHz-Quadstandby/dp/B01MXKIZ1U/ref=sr_1_6?s=electronics&ie=UTF8&qid=1502491739&sr=1-6&keywords=QYT+KT-8900D+Dual+Band
<https://www.amazon.com/QYT-Transceiver-Radios136-174-400-480MHz-Quadstandby/dp/B01MXKIZ1U/ref=sr_1_6?s=electronics&ie=UTF8&qid=1502491739&sr=1-6&keywords=QYT+KT-8900D+Dual+Band>

https://www.amazon.com/QYT-KT8900-Transceiver-400-480MHz-Programming/dp/B01LYIDJI3/ref=sr_1_8?s=electronics&ie=UTF8&qid=1502492053&sr=1-8&keywords=10+watt+mobile+dual+band

Mag mount Antenna I would recommend: (this will work with any of the radios):

https://www.amazon.com/Authentic-Genuine-Nagoya-UT-72-Magnetic/dp/B016SIJX28/ref=sr_1_1?s=electronics&ie=UTF8&qid=1502492286&sr=1-1&keywords=mag+mount+antenna

==========

Please jump in with your thoughts and suggestions as well.

Regards,

Joe, N2QOJ

4674. NVIS test at next Radios in the park event?

Yahoo group: Queen_Creek_Hams
Date: 2017-08-14 03:39:29 UTC
From: Andrew Ambrosia
Topic: 4674 Message: 4674

QC Hams,
Dave (AC7FF) and I were talking a few weeks back about doing some NVIS testing to coincide with the next Radios in the Park day.
I'm sending this email to gauge interest and do some preplanning since it will require some time investment on that day.
We were thinking about trying to get several stations roughly 50-100 miles apart. Trying to simulate if we can be effective at medium range comms w/o repeaters, etc.
First things first I suppose.
Who would be interested?
Thanks,
AndyKG7KWG

Hey Andy,
I am interested. I think Radios in the Park resumes in October. If we know far enough ahead the date, I can try to be at my property north of Mammoth. Not sure what the straight line distance is.

Topic: 4676 Message: 4676

For those of you that are interested in "contesting" or want to try it out, but do not have the time to dedicate a full weekend.. OR want to practice you radio skills on how to handle busier bands - the Phone Fray contest might be a great "get your feet wet" event for you.

30 minute contest - held weekly during the summer. (Next one is tomorrow, Tuesday). 7:30 - 8 PM for us here in AZ.

For those of us at the QRP event in the park, this might be a great event for us to jump into. Bring you band pass filters!

Phone Fray - Tuesday Evening, 10:30pm EDT (0230-0300z Wednesday), 30-minute SSB contest. Please bring a friend and introduce a new contester into the mix. One QSO or many, please enter your score.

The Phone Fray is weekly and mirrors NAQP SSB; exchange name and S/P/C, mults per band.

Suggested center frequencies are: 21.325, 14.250, 7.175, 3.800, 1.875. General Ops can be found above 3.800.

20 is open at the start (maybe 15 too!), then folks move down to 40, 80, and Q's are had on 160 in the last 5-10 minutes.

Rules are here: http://www.perluma.com/Phone_Fray_Contest_Rules.pdf

Agree, but you can also get the good antenna and attach it to your HT with a mic…

Subject: [Queen_Creek_Hams] ☢ So you are a new ham and wonder what kind of radio you should get... ☢

Folks,

Andy, KG7KWG, brought up an excellent point during this past week's QCECG meeting.

For new hams, a new handie-talkie alone may not be the best experience. I have to agree with his sound (pun) logic. A mobile radio, especially if you are commuting every day, will give you the opportunity to use your radio, gain experience, make new ham friends, and just have an overall much better experience than operating a hand-held exclusively.

The following is an excerpt of Andy's email to a friend that has just passed his Technician license exam:

==========

"Congrats on getting your Ham license yesterday.

Here are some recommendations.

First off. You will get much more use and benefit from having a mobile radio in your car than just having a walkie talkie. Having it in your car will give you commute time to and from work to play with it and get comfortable on the air. Plus Greg, Alex and I are doing that so we can chat from time to time on the repeaters while commuting.

Below are the radios I would recommend. Each of these is inexpensive and can easily be moved from one car to another in 5 mins if you do something like a velcrow mount and 12v cigarette power (since I know you camp with a different car than you commute with on a daily basis. There are more expensive radios of course, but these are good for getting a full solution at around $120 bucks or so.

Mobile Radios to consider (in the order I prefer, but also in most cost to least cost):

https://www.amazon.com/BTECH-MOBILE-UV-50X2-Mobile-Radio/dp/B06XK83VRV/ref=pd_bxgy_107_2?_encoding=UTF8 <https://www.amazon.com/BTECH-MOBILE-UV-50X2-Mobile-Radio/dp/B06XK83VRV/ref=pd_bxgy_107_2?_encoding=UTF8&psc=1&refRID=FN6H7JCP6PSG0VQFXYWM>
&psc=1&refRID=FN6H7JCP6PSG0VQFXYWM

https://www.amazon.com/BTECH-MINI-UV-25X2-Mobile-Radio/dp/B06XD3CQ6H/ref=sr_1_3?ie=UTF8 <https://www.amazon.com/BTECH-MINI-UV-25X2-Mobile-Radio/dp/B06XD3CQ6H/ref=sr_1_3?ie=UTF8&qid=1502491150&sr=8-3&keywords=btech+mobile> &qid=1502491150&sr=8-3&keywords=btech+mobile

https://www.amazon.com/QYT-Transceiver-Radios136-174-400-480MHz-Quadstandby/dp/B01MXKIZ1U/ref=sr_1_6?s=electronics <https://www.amazon.com/QYT-Transceiver-Radios136-174-400-480MHz-Quadstandby/dp/B01MXKIZ1U/ref=sr_1_6?s=electronics&ie=UTF8&qid=1502491739&sr=1-6&keywords=QYT+KT-8900D+Dual+Band> &ie=UTF8&qid=1502491739&sr=1-6&keywords=QYT+KT-8900D+Dual+Band

https://www.amazon.com/QYT-KT8900-Transceiver-400-480MHz-Programming/dp/B01LYIDJI3/ref=sr_1_8?s=electronics <https://www.amazon.com/QYT-KT8900-Transceiver-400-480MHz-Programming/dp/B01LYIDJI3/ref=sr_1_8?s=electronics&ie=UTF8&qid=1502492053&sr=1-8&keywords=10+watt+mobile+dual+band> &ie=UTF8&qid=1502492053&sr=1-8&keywords=10+watt+mobile+dual+band

Mag mount Antenna I would recommend: (this will work with any of the radios):

https://www.amazon.com/Authentic-Genuine-Nagoya-UT-72-Magnetic/dp/B016SIJX28/ref=sr_1_1?s=electronics <https://www.amazon.com/Authentic-Genuine-Nagoya-UT-72-Magnetic/dp/B016SIJX28/ref=sr_1_1?s=electronics&ie=UTF8&qid=1502492286&sr=1-1&keywords=mag+mount+antenna> &ie=UTF8&qid=1502492286&sr=1-1&keywords=mag+mount+antenna

==========

Please jump in with your thoughts and suggestions as well.

Regards,

Joe, N2QOJ

Hey everyone, I've recently decided to get into the hobby and studying for my tech license as well. I've been on the fence as to what radio to buy to and knowing how i want to use this (mainly for commuting and offroading fun) i'm looking at getting a mobile setup in the truck vs a HT..

Thank you for the wealth of info Joe :)

Hope to be listening in on everyone chattering on the air soon :)

4680. Gordon West (WB6NOA) talks about HF mobile antennas

Yahoo group: Queen_Creek_Hams

From: Joe Sammartino
Topic: 4680 Message: 4680

Gordon West (WB6NOA) talks about HF mobile antennas, and getting the feed-point impedance at 50 Ohms. Also covered, is a recommendation on the type of antenna vehicle mounts to use, and those to avoid.

I am a new HAM and agree with the points made, but also, currently I only have a HANDIE since I didn't want to jump in with a large investment until I was sure it is something I want to continue to pursue. For me I am all in already (had my ticket for 3 weeks now). I have attended a couple lunches and met fellow operators.

I have to be careful not to go to the other extreme, I want to buy a mobile and a base station already…good thing I am on a fixed income and have to budget for the big ticket ($$$) items.

Jay,

Absolutely. I have already met up with a couple of the groups and my new fellow operators are awesome so far, so helpful with questions. I have made a couple of accessary purchase already based on the input from them. It has worked out well. Even when I bought my initial handheld it came as a suggested purchase from a couple operators I already knew. I am a former off roader and we had the same suggestions for dirt toys. Always go to the actual users for advice.

Thank you for stressing your point. I am guess when I do get ready to expand, I most likely will see what used equipment is out there first.

Yes you can but I think Andy's point is that a mobile radio will always be ready to go and optimum in power and convenience which should result in more use over an HT setup. It's a passive solution.

Folks,

Andy, KG7KWG, brought up an excellent point during this past week's QCECG meeting.

For new hams, a new handie-talkie alone may not be the best experience. I have to agree with his sound (pun) logic. A mobile radio, especially if you are commuting every day, will give you the opportunity to use your radio, gain experience, make new ham friends, and just have an overall much better experience than operating a hand-held exclusively.

The following is an excerpt of Andy's email to a friend that has just passed his Technician license exam:

==========

"Congrats on getting your Ham license yesterday.

Here are some recommendations.

First off. You will get much more use and benefit from having a mobile radio in your car than just having a walkie talkie. Having it in your car will give you commute time to and from work to play with it and get comfortable on the air. Plus Greg, Alex and I are doing that so we can chat from time to time on the repeaters while commuting.

Below are the radios I would recommend. Each of these is inexpensive and can easily be moved from one car to another in 5 mins if you do something like a velcrow mount and 12v cigarette power (since I know you camp with a different car than you commute with on a daily basis. There are more expensive radios of course, but these are good for getting a full solution at around $120 bucks or so.

Mobile Radios to consider (in the order I prefer, but also in most cost to least cost):

https://www.amazon.com/BTECH-MOBILE-UV-50X2-Mobile-Radio/dp/B06XK83VRV/ref=pd_bxgy_107_2?_encoding=UTF8&psc=1&refRID=FN6H7JCP6PSG0VQFXYWM

https://www.amazon.com/BTECH-MINI-UV-25X2-Mobile-Radio/dp/B06XD3CQ6H/ref=sr_1_3?ie=UTF8&qid=1502491150&sr=8-3&keywords=btech+mobile

https://www.amazon.com/QYT-Transceiver-Radios136-174-400-480MHz-Quadstandby/dp/B01MXKIZ1U/ref=sr_1_6?s=electronics&ie=UTF8&qid=1502491739&sr=1-6&keywords=QYT+KT-8900D+Dual+Band

https://www.amazon.com/QYT-KT8900-Transceiver-400-480MHz-Programming/dp/B01LYIDJI3/ref=sr_1_8?s=electronics&ie=UTF8&qid=1502492053&sr=1-8&keywords=10+watt+mobile+dual+band

Mag mount Antenna I would recommend: (this will work with any of the radios):

https://www.amazon.com/Authentic-Genuine-Nagoya-UT-72-Magnetic/dp/B016SIJX28/ref=sr_1_1?s=electronics&ie=UTF8&qid=1502492286&sr=1-1&keywords=mag+mount+antenna

==========

Please jump in with your thoughts and suggestions as well.

Regards,

Joe, N2QOJ

4685. Fwd: New 605 Form takes effect August 21, 2017

Yahoo group: Queen_Creek_Hams
Date: 2017-08-16 17:50:07 UTC
From: Joe Sammartino
Topic: 4685 Message: 4685

*IMPORTANT UPDATE: NEW NCVEC 605 FORM *A NEW NCVEC 605 FORM MUST BE USED AT EXAM SESSIONS BEGINNING MONDAY AUGUST 21, 2017.
---

*VE NEWS SECTIONS: *

New NCVEC 605 Forms and Applicant Information.
Field Stocked VE Teams -- Packages Mailed.
FCC and NCVEC 605 Change -- Information and News Stories.

New NCVEC 605 Forms and Applicant Information

New *NCVEC 605 Forms <http://www.arrl.org/files/file/VEs/NCVEC%20605%20Form%202017%20Sept.pdf>* and an *Applicant information sheet <http://www.arrl.org/files/file/VEs/Applicant%20Info%20Qualification%20Question%202017.pdf>*
for use at your ARRL VEC exam sessions *beginning August 21, 2017* have been published. Please *discard* *all* existing versions of the NCVEC 605 Forms on or after midnight, August 20, 2017, as they will no longer be valid and cannot be used. All VECs and VE Teams must use this new form. For information regarding the 605 Form change, please see the “FCC and NCVEC 605 Form to Change” section below and refer to the news stories on ARRL’s website.

*Instructions for the New NCVEC Quick Form 605 Application (September 2017 series). *Throw away *all* previous versions on or after August 20, 2017. 605 Forms can be copied when necessary.

The FCC is revising the basic qualifications section of 605 Application forms to include a question regarding whether an applicant has been convicted of a felony in any state or federal court. Applicants’ responses and explanations to the basic qualification question (felony question), will be used to determine eligibility to be a Commission licensee.

*Instructions for the New Applicant Information Sheet – FCC Basic Qualification Question. *
These instructions are for applicants that answer *“YES”* to FCC’s basic qualification question.
There are 2 sets of instructions on one form, therefore please *cut* the form in half before using it at
an exam session. The Applicant Information sheet can be copied when necessary.

*After the application data is submitted to FCC and an FCC file number is created, the applicant is required to provide an explanation directly to

the FCC within 14 days. Candidates that do not want to answer the basic qualification question at the test session will be handled the same way the candidate’s that are uncomfortable with giving their social security number (SSN) at the session are handled.*

* The candidate is allowed to take the exam(s)*

. However, it must be made clear that FCC will reject their license application form 605 if the question is not answered. As with the candidates that decline to supply their SSN, these candidates should also be referred to the VEC department directly for further instructions and guidance.

Officially Field Stocked VE Teams

For ARRL VE teams who are Formally *Field Stocked* by the ARRL VEC, 25 new *NCVEC
605 Forms* were shipped out on Monday August 14, 2017. Field Stocked VE Team leaders should look for the package containing the new forms to arrive this week. Throw away *all* previous versions on or after August 20, 2017; do not return them to ARRL VEC.

The materials supply should be sufficient for up to four or five exam sessions for the majority of ARRL VEC teams. With one thousand Field Stocked teams, what we send to you all in a mass mailing must be done with prudence in mind. Generally, this mailing is not intended to provide a year’s worth of supplies for teams that test monthly and typically have more than 3 to 5 examinees per session.

Field Stocked teams should be especially vigilant about keeping us informed of who has possession of the exam supplies. Notify us immediately when your address changes or the teams Field Stock changes hands to ensure that any exam updates will be mailed to and received by the proper person. Periodically check your supplies to make sure they are current and that the quantities are sufficient.

Field Stocked VE Teams can order test materials on the ARRL website via our easy to use online *Re-Stock Form
<http://www.arrl.org/field-stocked-ve-teams>*
(*www.arrl.org/field-stocked-ve-teams
<http://www.arrl.org/field-stocked-ve-teams>*) or call us (800-927-7583
<(800)%20927-7583>) to obtain supplies.

Current exam session forms and documents (print, download or fill interactively) can be found on ARRL VEC’s *VE Resources
<http://www.arrl.org/resources-for-ves>* webpage
(*www.arrl.org/resources-for-ves
<http://www.arrl.org/resources-for-ves>*).

FCC and NCVEC 605 Form to Change: Information and News Stories

The Communications Act (federal laws overseeing communications) requires the Commission to evaluate whether an applicant is qualified to be issued any FCC license (both commercial and amateur). This enables the FCC to determine whether an applicant is eligible under sections 310(d) and 308(b) of the Communications Act of 1934, as amended, to hold or have ownership interest in a station license.

The FCC 605 Form Application is not just used for the Amateur Radio Service. It's used for authorization in the Ship, Aircraft, Amateur, Restricted and Commercial Operator, and General Mobile Radio Services. The Commission is revising the basic qualifications section of this form to include a question regarding whether an applicant has been convicted of a felony in any state or federal court. Applicants' responses and explanations to the basic qualification question (felony question), will be used to determine eligibility to be a Commission licensee. There is not a Report and Order and there is not a public comments period on this form update as it is already in the rules.

The NCVEC 605 Form (used at exam sessions) must also be updated to include the basic qualifications question. For potential amateur license holders, this means not just that they passed the examination but also that they meet the character requirements. If the answer to the basic qualification question (felony question) is '*YES'*, they will submit to FCC as an exhibit a statement explaining the circumstances. The application will be off-lined (held) for a basic qualification review which FCC already does for other radio license services. The Wireless Telecommunications Bureau's Mobility Division stated that the fact that an applicant answers 'YES' doesn't mean they will be denied a license.

Furthermore, applicants are required to answer the question *only* if they are filing NCVEC Form 605 or FCC Form 605 for one of the following purposes indicated: *New*, Amendment, Modification (*Upgrade or call sign change*), or Renewal/Modification (changes at renewal time). The question does *not* have to be answered if the applicant is filling a renewal only or an administrative update to their license (change of address, name, email, etc.).

A new NCVEC 605 Form with the basic qualification question was released and is available in the ARRL VEC forms section of the VE Resources page *www.arrl.org/resources-for-ves <http://www.arrl.org/resources-for-ves>*. The new form takes effect for all VECs and VE Teams on *August 21, 2017 *and must be used at exam sessions going forward. Older form versions will be obsolete and should be discarded.

FCC has indicated that all VEC's must begin transmitting this additional data to FCC starting on September 7, 2017. Amateurs will see the new information displayed in the FCC license database and in their license manager record when logged in to their license account. The FCC WTB Public Notice about the 605 form change was released on 08/07/2017 and is available here: *https://apps.fcc.gov/edocs_public/attachmatch/DA-17-741A1.pdf <https://apps.fcc.gov/edocs_public/attachmatch/DA-17-741A1.pdf> *

The last major change to the NCVEC 605 Form occurred 17 years ago (April 2000) when the FCC restructured the license classes!

ARRL News Stories

Revised FCC Form 605 Will Ask Applicants “the Felony Question” – published 07/19/2017
www.arrl.org/news/revised-fcc-form-605-will-ask-applicants-the-felony-question <http://www.arrl.org/news/revised-fcc-form-605-will-ask-applicants-the-felony-question>

Figured I'd share a simple solution for getting your antenna feed line into your house on a typical AZ stucco home.
1. Find a spot clear of electrical wires that has a good exit spot on the exterior 2. Use a very long drill bit to go through both the interior and exterior wall in one go so it's nice and straight 3. Use expanding foam sealer in from the exterior electrical box if you have and gaps to fill
Parts list:1. 10" or 12" long UHF female SO239 bulkhead connector2. Exterior outlet box3. Interior stainless steele outlet cover with hole (or solid and drill the hole yourself4. Stuff brand expanding gap sealer
Project time = 1 hour
Have fun and tell your wife not to worry about drilling thru your wall. It's quite normal behavior:)

Perfect time for this email, I was lying in bed last night trying to figure out where and how to pull a wire through the wall if I put up an external versus an attic antenna…what a great way you did it!! Thanks for posting

If you only want O N E cable to go outside- this is very nice and elegant. However, one feedline soon becomes two- then three.

My solution: external box with polyphasers and room for 12 coaxial connections and 3 mesh network cables.

I like the clean look of Andy's solution- but I know you will want more than 1 cable entry as you grow with the hobby.

CUT once and be done with it.

Subject: Gathering Of the Willing
To: "Dave Martin" <ac7ff1@...>
Cc:

Good Morning All,

I hope everyone is enjoying the cooler weather the past couple of days. It feels as though fall is in the air and just around the corner.

EVQRP will be hosting another Gathering Of the Willing this coming Tuesday evening @ 17:00hrs at Desert Mountain Park. We will gather the Ocotillo Ramada. We will be across from the baseball fields and just Southeast of the restroom building. We encourage all to bring their portable station and set up and play radio with us. We will set up our usual stations and see how many contact we can make.

Last week we had a fair good turnout. Rick (W9JRF) set up his FT-817 with his portable amp and his Buddipole Vertical antenna and made 1 contact on 40m with (WR5X) from Tennessee. Rick had his headphones on so I'm not sure how his signal from Tennessee sounded. He attempted to contact Rhode Island and Iowa with no luck. Troy set up his FT-817 digital station and he made no contacts. We need to work on Troy's antenna system and get him to use a wire antenna. I set up my FT-857 with a buddistick on a camera tripod about 4 feet off the ground and made 3 contacts. My first was with (VY1RAC) in Canada. He had a strong signal into Arizona. He gave me a 599. My next contact was with (KA1LDD) in South Carolina. He also had a very strong signal and gave me a 599. My last contact of the evening was with (RU3EG) in Russia. At first he had a strong signal but 20m started to change when I made my contact with him and still was able to make a contact and he gave me a 589. All of my contacts were on 20m doing CW with 30 watts. Jay (N1RWY) brought out the MESH equipment and was experimenting to see if he could connect to Brad's (N7LZD) node. I believe their he was able to connect but needed to be just a bit more elevation on the setup.

Remember this will be the last mass email from the EVQRP address. I want to thank those that have signed up on the group list. If you haven't signed up as of yet please stop by and do so. If I have missed anyone please feel free to send me an email so I can send you and invite. I hope to see you all there on Tuesday evening. Have a great weekend and remember to stay radioactive.

73,
Dave AC7FF

4703. Fishing Electrical Wire (and communications cable) Through Walls

Yahoo group: Queen_Creek_Hams
Date: 2017-08-24 17:47:06 UTC
From: Joe Sammartino
Topic: 4703 Message: 4703

Fishing Electrical Wire Through Walls
Run electrical cable through walls and across ceilings without tearing them apart
[image: Check the Whole Wall Cavity With a Stud Finder]Check the Whole Wall Cavity With a Stud Finder

A decent stud finder is a must-have for every wire-fishing job, but don't throw it back in your pouch after you've located the studs. Use your stud finder to check the whole wall cavity for obstacles like blocking and abandoned headers. You don't want to find out the hard way that you should have fished your wire one stud cavity to the left or right.
[image: The Tools You Need]The Tools You Need

Flex bits and glow rods are the go-to tools pros use to fish wires. Flex bits are great for drilling holes in hard-to-reach spaces (see “Invest in a Bumper Ball,” below). The two most common lengths are 5 ft. and 6 ft., but extensions are also available. A 3/4-in. x 54-in. flex bit costs about $50 at home centers. Buy a bit that has a hole on the end of it so you can use the bit itself to pull wires.

Once your hole is drilled, you can shove a glow rod through the hole, attach your wire to the eyelet at the end and pull it back through. Glow rods can also be used to hook wires to pull them out. As their name suggests, glow rods glow in the dark. This makes them easier to spot when you're working in dark areas (which is most of the time).

Glow rods come in various lengths and thicknesses, and you can combine as many sections as the job requires. Thinner rods flex more and work better when you have to make sharp turns. A thicker rod can span longer distances and is better for hooking wires that are more than a few feet away. A 9-ft. glow rod kit costs about $40 at home centers. Expect to pay about $60 for a 24-ft. kit.
[image: Push Through More Than You Need]Push Through More Than You Need

When hooking a wire to pull it toward you, make sure there's more than enough wire to hook on to. Sometimes it's a real challenge to grab hold of a wire, and once you have it hooked, you don't want to lose it. Always makes sure that you have at least 5 or 6 ft. of extra wire to keep up the tension on the hook the whole time you're pulling on it.
[image: Hook on to a Flex Bit]Hook on to a Flex Bit

Sometimes you don't need to use glow rods at all. Most flex bits have holes in the ends of them. If you have access to where the flex bit pops out, attach your wire directly to the bit and fish the wire through that way. Twist the wire and tape it up to make sure it doesn't come off when you're pulling it back through. Remove your bit from your drill before pulling so

you don't accidentally spin the bit and twist up your wire.
[image: Fish Wires Through the Holes for Recessed Lights]Fish Wires Through the Holes for Recessed Lights

When you're installing new recessed can lighting, fishing wires from one light to another is easy because you have a great big hole to pull the wires through. But even if you're not installing new lighting, you can use the existing openings. Many cans can be easily popped out of the opening by removing a few screws.
[image: Protect Drywall With a Mud Ring]Protect Drywall With a Mud Ring

Mud rings, also called drywall brackets or low-voltage “old-work” brackets, are great for protecting the drywall when you're drilling with a flex bit or cranking on a glow rod. They're easy to install (just tighten two screws) and inexpensive. Once the wires are connected, you can screw the wall plate to the mud ring.

Mud rings are approved only for low-voltage wires like communication and coaxial cables. If you need to install a regular gang box for an electrical receptacle or wall switch, install the mud ring temporarily to protect the drywall while you fish the wire, then remove it.
[image: Install Conduit Inside Cabinets]Install Conduit Inside Cabinets

Additional outlets above the counter space—that's one of the most popular electrical retrofits. Electricians loves these jobs because they can just fish wire through a flexible conduit installed right through the base cabinets. If you drill the holes for the conduit as far back and as high as you can, no one will ever notice.
[image: Invest In a Bumper Ball]Invest In a Bumper Ball

Wires aren't supposed to be installed any closer than 1-1/4 in. from a penetrable surface (the outside of the drywall). That means you shouldn't be drilling holes right next to the drywall. But it's not always easy to control where a flex bit goes. A Bumper Ball flexible drill bit guide installed on the end of your flex bit will help maintain the proper space between the bit and the outside of the wall cavity. You can buy a set of two at electrical suppliers or at licensedelectrician.com.
[image: Hold on Tight]Hold on Tight

When you hook cable to the eyelet of a glow rod, strip the plastic sheathing back about 6 in., then cut off the hot and neutral wires. Then wrap the remaining ground wire through the rod's eyelet and wrap it back around the wire's sheathing several times. Finally, wrap the whole area with electrical tape.

When hooking coaxial cable, just tape the whole wire to the glow rod. You'll never lose a light wire just using tape. Use the same technique when working with communication cable like phone wire. If you try to hook one of the small communication wires, you could stretch and damage that individual wire several feet down inside the sheathing.
[image: Get a Better View With an Inspection Camera]Get a Better View With an Inspection Camera

You know your wire is in there somewhere, but you just can't seem to find it. It's probably hung up on another wire or pipe, but guessing isn't going to solve the problem. Instead, shine a flashlight onto an inspection mirror to find out exactly what's going on. This is a simple, inexpensive tip that can save you a lot of time and frustration. Pick up an inspection mirror at an auto parts store for less than $10. Or bump it up a notch and pay a few more bucks for a mirror with small built-in lights, so you can see exactly what's going on.
[image: Don't Spin the Bit In Insulation]Don't Spin the Bit In Insulation

The best advice for fishing wires through insulation is “Avoid it if you can.” The potential is always there to damage the vapor barrier or bunch up insulation, leaving cold spots in the wall. If you must fish wires through exterior walls, the best tip is to avoid spinning the flex bit until you make solid contact with the wood you plan to drill through. If you drill too early, you'll end up creating a large insulation cotton candy cone, which will make retrieving your bit difficult, if not impossible.
[image: Keep Low-Voltage Wires Away From Electrical Cables]Keep Low-Voltage Wires Away From Electrical Cables

It's really tempting to fish low-voltage wires (like coax and Cat-5e) through existing holes occupied by electrical cables, but don't do it! Even though cables are insulated, the high-voltage current can interfere with the signal in the low-voltage wires. This could result in bad TV reception or unreliable phone and Internet service. Drill a new hole, and keep the new low-voltage wire several inches away from electrical cables. It's OK to run low-voltage wires perpendicular to cables, and it's also OK to run low-voltage wires next to electrical wires that are encased in conduit or metal sheathing.
[image: Buy Extra Wire]Buy Extra Wire

Have plenty of extra wire or cable on hand, because it's not likely that you'll be able to fish a wire in a straight line from Point A to Point B. There's also the possibility that your wire might get hung up on something, and you'd have to abandon it and start over.
[image: Identify Roughed-In Wires]Identify Roughed-In Wires

If you're installing more than one wire, save yourself a lot of headaches by identifying the wires as you install them. It's a lot harder to figure out which wires go where when they're covered with drywall. The electricians we talked to use a “code” for marking wires, and so can you. Develop a system and write it down. You don't want to have to guess after you've gone through all the trouble of running the wires all around the house

I asked my husband - PhD Metallurgist because I was interested in why it worked. He said it was likely acidic, which would clean the spring. He did issue this caution though:

"I did a quick search, and people normally KILL springs by surface treatment to remove rust/gunk. The acids attack the rust and/or grain boundaries and make pits that act as stress initiation sites. These sites can start cracks and that can cause the spring to break when in service. The smaller the spring the worse this gets as the pit/stress are a bigger % of spring cross section. I would have Dennis check the spring carefully before putting it into a critical service role. (Like if this will be in the drivetrain of his RV!!!)”

I am sure Dennis examined the spring very carefully, but I wanted to put the caution out there.

August 25, 2017
Press Release #2

The Dateline DX Association is very pleased to announce significant progress in our planning to operate in 2018 from KH1, Baker Island National Wildlife Refuge, the 4th most wanted entity in the DXCC program.

We have executed a charter agreement with a ship, the Nai'a out of Fiji, with an anticipated arrival at the refuge during the 3rd week of June, 2018. We intend to be at the refuge a total of 12 days with 10 days of operations. This ship and dates were chosen in consultation with the US Fish and Wildlife service based on availability of their resource monitor, avoidance of the cyclone season, and Nai'a availability. Propagation forecasts look favorable for HF to Western Europe (a large target audience for us) during this time as well.

As with any DXpedition to the really rare ones, this will be another large budget operation. The 11 operator team will contribute over 50% of the expected budget of $400,000. You can help make this DXpedition happen by visiting our new website, http://www.baker2018.net/ and contributing today.

We wish to thank the US Fish and Wildlife Service for their trust in our group to safely and responsibly activate this rare location.

Co-Leaders:
Don Greenbaum, N1DG

Tom Harrell, N4XP
Kevin Rowett, K6TD

This city didn't plan well for communications failure....

I hope these City officials learn from this breakdown.

Emergency radio channels were unavailable, and first responders were
limited to "shortwave radios that span only a couple miles," said Matt
Jamison, a volunteer firefighter from Fulton.

Let's translate that -- all they had was tactical simplex frequencies on
their handheld (LMR portable) radios. Good luck with that!

Technician License Course

A training course sponsored by Thunderbird Amateur Radio Club

This is an entry level course for anyone wanting to get started with "ham" radio. You will learn all you need to know to receive an FCC technician level license. No previous experience is required. No course fee. No exam fee.

Saturday mornings 9:00 to Noon
September 16th through October 7th, 2017
License test is October 7th.

at

HonorHealth, formerly John C. Lincoln, Hospital,
Deer Valley Campus, 19829 N 27th Ave (SW corner of North Loop 101 and I17 stack)

Membership of Thunderbird Amateur Radio Club is not required but we hope you will join. Visit w7tbc.org to find out more about us and to apply for membership.

Course text is "ARRL Ham Radio License Manual" 3rd edition, available at Ham Radio Outlet and at ARRL.org

Email course@... to register. Please include your name, email address, and phone number. Use message subject "Technician Course".

I really thought that since 9-11 and Katrina most cities had completely re thought and re did their emergency response system for “worst case scenario”. I guess Houston area underestimated “worst case”. Being new to the HAM world, how are the HAM NETs working in Texas, any idea or are they down as well????

Tips for Using Emergency Generators
A backup generator can save the day when the power goes out

[image: Keep Your Generator Away From the House]Keep Your Generator Away From the House

A generator is the best thing to have in a blackout. But it can make you black out (or die). Hurricane Katrina led to more than 50 cases of carbon monoxide poisoning. Like any internal combustion engine, a generator engine exhausts carbon monoxide gas, which can give you a headache, knock you out or even kill you. This is easy to avoid, though: Don't run a generator in your garage or porch, and keep it at least 10 ft. away from your house.

Plus: 16 Tips for Using Emergency Generators
<https://www.familyhandyman.com/smart-homeowner/home-safety-tips/tips-for-using-emergency-generators>
[image: Buy a Standby Generator if You Can Afford It]Buy a Standby Generator if You Can Afford It

A standby generator, unlike a portable generator, is permanently connected to your electrical system and goes on automatically when the power goes out. Standby generators can run on propane or natural gas, eliminating the need to monitor the fuel. And they're quieter. You can buy one large enough to power everything in your house, or you can buy a smaller unit and choose the most critical circuits to power. Standby generators start at about $1,800, plus installation. (And they do need to be installed by a pro.)

The difference in cost between a portable generator and a standby unit may not be as great as you think. Remember, a portable unit requires either expensive extension cords or a transfer switch. Standby units can run on less expensive natural gas, which will save you money in the long run.
Photo provided by Kohler
[image: Propane is Easier Than Gas]Propane is Easier Than Gas

When it comes to portable generators and ease of use, liquid propane (LP) sure beats gasoline. Gasoline is a handy fuel, but it's not without problems. Storing enough gasoline to get you through a several-day power outage requires constant vigilance. First you have to buy several 5-gallon gas containers and find a safe place to store them. Then you have to add stabilizer and ideally replace the gas after several months to make sure it's still fresh when you need it.

Propane-powered portable generators solve these problems and more. You can store and use liquid propane (LP) indefinitely (it doesn't go bad). Refueling is simple and safe; just replace the propane tank with a full one. And you don't have to worry about the carburetor on your generator getting gummed up with old gasoline.

Photo provided by Generac
[image: Buy a Generator You Can Get Serviced Locally]Buy a Generator You Can Get Serviced Locally

You may find a great deal on a generator by shopping online. But what will you do if you can't get it serviced locally? Sometimes it's worth spending a little extra to buy from a local dealer. Parts will be available, and the dealer will be familiar with maintenance and repair procedures for your model. So before you buy a generator, make sure there's someone nearby who can provide parts and service.
[image: Furnaces, Well Pumps and Electric Water Heaters Require a Transfer Switch]Furnaces, Well Pumps and Electric Water Heaters Require a Transfer Switch

You can use extension cords from your portable generator to power any device with a plug, but anything that's directly connected to your home's wiring, including essentials like your well pump, furnace and electric water heater, requires a transfer switch.

A manual transfer switch is essentially a small circuit breaker box that you mount next to your main electrical panel. You match the capacity of the transfer switch to the wattage of your generator. Then you choose which circuits to connect to the transfer switch. The Gen Tran manual transfer switch shown here came prewired for six circuits and included the inlet box (generator connection) and the cord to connect the generator.

Using a transfer switch is the only safe way to connect your generator to house wiring because it requires you to disconnect the house wiring from the incoming power lines at the same time you switch to generator power. This prevents the possibility of “backfeeding” generated power into the power lines, which creates a potentially lethal hazard for power line workers.
[image: Buy Gas Cans When You Buy the Generator]Buy Gas Cans When You Buy the Generator

A 5,500-watt generator will run about eight hours on 5 gallons of gasoline, so gas management is critical if you want to be prepared for an extended power outage. That may mean running your generator for shorter periods and coasting on things like refrigeration.

Having several filled 5-gallon gas cans available is prudent, but you'll need to add stabilizer to extend the shelf life. Even then, after six months or so you should pour it into your car's gas tank and refill the cans with fresh fuel. The generator itself should be run dry for storage or filled with stabilized fuel. That fuel should be replaced every six months as well.
[image: You'll Need Heavy-Duty Extension Cords]You'll Need Heavy-Duty Extension Cords

Remember, if you decide not to install a manual transfer switch, you'll need a lot of expensive, heavy-duty extension cords. Using undersize cords presents a fire hazard and can damage motors as well as stress your

generator. To run a refrigerator, depending on how energy efficient it is and how far from the generator, you'll need at least a 12-gauge cord. A 50-ft. 12-gauge cord will set you back about $50. Multiply that by five or six and you can see that a transfer switch starts to sound like a better deal.
[image: Don't Wreck Your TV With a Cheap Generator]Don't Wreck Your TV With a Cheap Generator

Computers, TVs and many modern appliances contain sensitive electronics that can be damaged by the “dirty” power produced by less expensive generators. Inverter-type generators provide the cleanest power but are very expensive, especially in sizes large enough to power a house. But for a little extra money, you can buy generators with power conditioning that provides cleaner power. Total Harmonic Distortion (THD) is a way to measure the quality of electricity from a generator. Look for a generator with a THD of less than 5 percent to safely operate most electronics.
[image: You Can Buy a Quiet Generator, But It'll Cost More]You Can Buy a Quiet Generator, But It'll Cost More

One problem with portable generators is the noise that you—and your neighbors—have to put up with. You can compare decibel ratings to find quieter models, but keep in mind that there's no industry standard, so you may be comparing apples and oranges. Standby generators are quieter, and for a stiff premium you can buy a really quiet portable generator like the 6,500-watt Honda shown here. It costs $4,500.
Photo provided by Honda
[image: How to Determine What Size Generator You Need]How to Determine What Size Generator You Need

Your first step in adding backup power is deciding what you need to keep running when the electricity goes out. This determines the size (wattage) of the generator you'll need. Look for a label on each appliance that contains information such as wattage, model number and the year it was made. Some labels are right inside the door; others are on the back. Write down the item and how much wattage it uses. Be sure to include essential items, like refrigerators, freezers, a well pump if you have one, and a sump pump if your basement could flood. You can go a few hours or even days without an oven (use the microwave instead) and an air conditioner—they use a lot of power and would require you to buy a much bigger generator.

Add together the items' wattages, then multiply that number by 1.5 (appliances need the extra power to start up). That's the minimum wattage needed for your generator.
[image: Don't Get Burned by Wattage Ratings]Don't Get Burned by Wattage Ratings

Every generator lists two capacity ratings. The first is “rated” or “continuous” watts. That's the maximum power the generator will put out on an extended basis. And it's the only rating you should rely on when buying a generator. The higher “maximum” or “starting” rating refers to how much extra power the generator can put out for a few seconds when an electric

motor—like the one in your fridge or furnace—starts up. If you buy a generator based on the higher rating and think you can run it at that level, think again. It will work for a little while. But by the end of the day, your new generator will be a molten mass of yard art, and you'll be out shopping for a replacement.
[image: Stock Up on Oil and Filters]Stock Up on Oil and Filters

Most new generators need their first oil change after just 25 hours. Beyond that, you'll have to dump the old stuff and refill every 50 or 60 hours. So you need to store up enough oil and factory filters to last a few days (at least!). Running around town searching for the right oil and filter is the last thing you want to be doing right after a big storm.
[image: Let the Engine Cool Before You Refill!]Let the Engine Cool Before You Refill!

Generator fuel tanks are always on top of the engine so they can “gravity feed” gas to the carburetor. But that setup can quickly turn into a disaster if you spill gas when refueling a hot generator. Think about it—spilled gas on a hot engine, and you're standing there holding a gas can. Talk about an inferno! It's no wonder generators (and owners) go up in flames every year from that mistake. You can survive without power for a measly 15 minutes, so let the engine cool before you pour. Then strap on an LED head lamp so you can actually see what you're doing. Pour slowly and avoid filling the tank to the brim.
[image: Old Fuel is Your Worst Enemy]Old Fuel is Your Worst Enemy

Stale fuel is the No. 1 cause of generator starting problems. Manufacturers advise adding fuel stabilizer to the gas to minimize fuel breakdown, varnish and gum buildup. But it's no guarantee against problems. Repair shops recommend emptying the fuel tank and the carburetor once you're past storm season. If your carburetor has a drain, wait for the engine to cool before draining. If not, empty the tank and then run the generator until it's out of gas. Always use fresh, stabilized gas in your generator.
[image: Backfeeding Kills]Backfeeding Kills

The Internet is full of articles explaining how to “backfeed” power into your home's wiring system with a “dual male-ended” extension cord. Some of our Field Editors have even admitted trying it (we'll reprimand them). But backfeeding is illegal—and for good reason. It can (and does) kill family members, neighbors and power company linemen every year. In other words, it's a terrible idea. If you really want to avoid running extension cords around your house, pony up for a transfer switch ($300). Then pay an electrician about $1,000 to install it. That's the only safe alternative to multiple extension cords. Period.
[image: Lock it Down]Lock it Down

The only thing worse than the rumbling sound of an engine outside your bedroom window is the sound of silence after someone steals your expensive generator. Combine security and electrical safety by digging a hole and sinking a grounding rod and an eye bolt in concrete. Encase the whole thing in 4-in. ABS or PVC drainpipe, with a screw-on cleanout fitting.

Spray-paint the lid green so it blends in with your lawn. If you don't want to sink a permanent concrete pier, at least screw in ground anchors to secure the chain.

I especially like the first tip about keeping it away from the house. By placing it in the front yard, you should be able to keep it WAY away from the house…especially when the thieves come along and move it for you.

Dennis

Keep Your Generator Away From the House
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH13APR_BUYGEN_01.jpg>

Keep Your Generator Away From the House

A generator is the best thing to have in a blackout. But it can make you black out (or die). Hurricane Katrina led to more than 50 cases of carbon monoxide poisoning. Like any internal combustion engine, a generator engine exhausts carbon monoxide gas, which can give you a headache, knock you out or even kill you. This is easy to avoid, though: Don't run a generator in your garage or porch, and keep it at least 10 ft. away from your house.

Plus: <https://www.familyhandyman.com/smart-homeowner/home-safety-tips/tips-for-using-emergency-generators> 16 Tips for Using Emergency Generators

Buy a Standby Generator if You Can Afford It
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH13APR_BUYGEN_02.jpg>

Buy a Standby Generator if You Can Afford It

A standby generator, unlike a portable generator, is permanently connected to your electrical system and goes on automatically when the power goes out. Standby generators can run on propane or natural gas, eliminating the need to monitor the fuel. And they're quieter. You can buy one large enough to power everything in your house, or you can buy a smaller unit and choose the most critical circuits to power. Standby generators start at about $1,800, plus installation. (And they do need to be installed by a pro.)

The difference in cost between a portable generator and a standby unit may not be as great as you think. Remember, a portable unit requires either expensive extension cords or a transfer switch. Standby units can run on less expensive natural gas, which will save you money in the long run.
Photo provided by Kohler

Propane is Easier Than Gas
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH13APR_BUYGEN_03.jpg>

Propane is Easier Than Gas

When it comes to portable generators and ease of use, liquid propane (LP) sure beats gasoline. Gasoline is a handy fuel, but it's not without problems. Storing enough gasoline to get you through a several-day power outage requires constant vigilance. First you have to buy several 5-gallon gas containers and find a safe place to store them. Then you have to add stabilizer and ideally replace the gas after several months to make sure it's still fresh when you need it.

Propane-powered portable generators solve these problems and more. You can store and use liquid propane (LP) indefinitely (it doesn't go bad). Refueling is simple and safe; just replace the propane tank with a full one. And you don't have to worry about the carburetor on your generator getting gummed up with old gasoline.
Photo provided by Generac

Buy a Generator You Can Get Serviced Locally
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH13APR_BUYGEN_04.jpg>

Buy a Generator You Can Get Serviced Locally

You may find a great deal on a generator by shopping online. But what will you do if you can't get it serviced locally? Sometimes it's worth spending a little extra to buy from a local dealer. Parts will be available, and the dealer will be familiar with maintenance and repair procedures for your model. So before you buy a generator, make sure there's someone nearby who can provide parts and service.

Furnaces, Well Pumps and Electric Water Heaters Require a Transfer Switch
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH13APR_BUYGEN_05.jpg>

Furnaces, Well Pumps and Electric Water Heaters Require a Transfer Switch

You can use extension cords from your portable generator to power any device with a plug, but anything that's directly connected to your home's wiring, including essentials like your well pump, furnace and electric water heater, requires a transfer switch.

A manual transfer switch is essentially a small circuit breaker box that you mount next to your main electrical panel. You match the capacity of the transfer switch to the wattage of your generator. Then you choose which circuits to connect to the transfer switch. The Gen Tran manual transfer switch shown here came prewired for six circuits and included the inlet box (generator connection) and the cord to connect the generator.

Using a transfer switch is the only safe way to connect your generator to house wiring because it requires you to disconnect the house wiring from the incoming power lines at the same time you switch to generator power. This prevents the possibility of “backfeeding” generated power into the power lines, which creates a potentially lethal hazard for power line workers.

Buy Gas Cans When You Buy the Generator
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH13APR_BUYGEN_06.jpg>

Buy Gas Cans When You Buy the Generator

A 5,500-watt generator will run about eight hours on 5 gallons of gasoline, so gas management is critical if you want to be prepared for an extended power outage. That may mean running your generator for shorter periods and coasting on things like refrigeration.

Having several filled 5-gallon gas cans available is prudent, but you'll need to add stabilizer to extend the shelf life. Even then, after six months or so you should pour it into your car's gas tank and refill the cans with fresh fuel. The generator itself should be run dry for storage or filled with stabilized fuel. That fuel should be replaced every six months as well.

You'll Need Heavy-Duty Extension Cords
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH13APR_BUYGEN_07.jpg>

You'll Need Heavy-Duty Extension Cords

Remember, if you decide not to install a manual transfer switch, you'll need a lot of expensive, heavy-duty extension cords. Using undersize cords presents a fire hazard and can damage motors as well as stress your generator. To run a refrigerator, depending on how energy efficient it is and how far from the generator, you'll need at least a 12-gauge cord. A 50-ft. 12-gauge cord will set you back about $50. Multiply that by five or six and you can see that a transfer switch starts to sound like a better deal.

Don't Wreck Your TV With a Cheap Generator
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH13APR_BUYGEN_08.jpg>

Don't Wreck Your TV With a Cheap Generator

Computers, TVs and many modern appliances contain sensitive electronics that can be damaged by the “dirty” power produced by less expensive generators. Inverter-type generators provide the cleanest power but are very expensive, especially in sizes large enough to power a house. But for a little extra money, you can buy generators with power conditioning that provides cleaner power. Total Harmonic Distortion (THD) is a way to measure the quality of electricity from a generator. Look for a generator with a THD of less than 5 percent to safely operate most electronics.

You Can Buy a Quiet Generator, But It'll Cost More
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH13APR_BUYGEN_09.jpg>

You Can Buy a Quiet Generator, But It'll Cost More

One problem with portable generators is the noise that you—and your neighbors—have to put up with. You can compare decibel ratings to find quieter models, but keep in mind that there's no industry standard, so you may be comparing apples and oranges. Standby generators are quieter, and for a stiff premium you can buy a really quiet portable generator like the 6,500-watt Honda shown here. It costs $4,500.
Photo provided by Honda

How to Determine What Size Generator You Need
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH08MAR_BACPOW_04.jpg>

How to Determine What Size Generator You Need

Your first step in adding backup power is deciding what you need to keep running when the electricity goes out. This determines the size (wattage) of the generator you'll need. Look for a label on each appliance that contains information such as wattage, model number and the year it was made. Some labels are right inside the door; others are on the back. Write down the item and how much wattage it uses. Be sure to include essential items, like refrigerators, freezers, a well pump if you have one, and a sump pump if your basement

could flood. You can go a few hours or even days without an oven (use the microwave instead) and an air conditioner—they use a lot of power and would require you to buy a much bigger generator.

Add together the items' wattages, then multiply that number by 1.5 (appliances need the extra power to start up). That's the minimum wattage needed for your generator.

Don't Get Burned by Wattage Ratings
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH11MAR_GENSMA_10.jpg>

Don't Get Burned by Wattage Ratings

Every generator lists two capacity ratings. The first is “rated” or “continuous” watts. That's the maximum power the generator will put out on an extended basis. And it's the only rating you should rely on when buying a generator. The higher “maximum” or “starting” rating refers to how much extra power the generator can put out for a few seconds when an electric motor—like the one in your fridge or furnace—starts up. If you buy a generator based on the higher rating and think you can run it at that level, think again. It will work for a little while. But by the end of the day, your new generator will be a molten mass of yard art, and you'll be out shopping for a replacement.

Stock Up on Oil and Filters
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH11MAR_GENSMA_02.jpg>

Stock Up on Oil and Filters

Most new generators need their first oil change after just 25 hours. Beyond that, you'll have to dump the old stuff and refill every 50 or 60 hours. So you need to store up enough oil and factory filters to last a few days (at least!). Running around town searching for the right oil and filter is the last thing you want to be doing right after a big storm.

Let the Engine Cool Before You Refill!
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH11MAR_GENSMA_03.jpg>

Let the Engine Cool Before You Refill!

Generator fuel tanks are always on top of the engine so they can “gravity feed” gas to the carburetor. But that setup can quickly turn into a disaster if you spill gas when refueling a hot generator. Think about it—spilled gas on a hot engine, and you're standing there holding a gas can. Talk about an inferno! It's no wonder generators (and owners) go up in flames every year from that mistake. You can survive without power for a measly 15 minutes, so let the engine cool before you pour. Then strap on an LED head lamp so you can actually see what you're doing. Pour slowly and avoid filling the tank to the brim.

Old Fuel is Your Worst Enemy
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH11MAR_GENSMA_04.jpg>

Old Fuel is Your Worst Enemy

Stale fuel is the No. 1 cause of generator starting problems. Manufacturers advise adding fuel stabilizer to the gas to minimize fuel breakdown, varnish and gum buildup. But it's no guarantee against problems. Repair shops recommend emptying the fuel tank and the carburetor once you're past storm season. If your carburetor has a drain, wait for the engine to cool before draining. If not, empty the tank and then run the generator until

it's out of gas. Always use fresh, stabilized gas in your generator.

Backfeeding Kills
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH11MAR_GENSMA_05.jpg>

Backfeeding Kills

The Internet is full of articles explaining how to “backfeed” power into your home's wiring system with a “dual male-ended” extension cord. Some of our Field Editors have even admitted trying it (we'll reprimand them). But backfeeding is illegal—and for good reason. It can (and does) kill family members, neighbors and power company linemen every year. In other words, it's a terrible idea. If you really want to avoid running extension cords around your house, pony up for a transfer switch ($300). Then pay an electrician about $1,000 to install it. That's the only safe alternative to multiple extension cords. Period.

Lock it Down
<https://www.familyhandyman.com/wp-content/uploads/2017/05/FH11MAR_GENSMA_08.jpg>

Lock it Down

The only thing worse than the rumbling sound of an engine outside your bedroom window is the sound of silence after someone steals your expensive generator. Combine security and electrical safety by digging a hole and sinking a grounding rod and an eye bolt in concrete. Encase the whole thing in 4-in. ABS or PVC drainpipe, with a screw-on cleanout fitting. Spray-paint the lid green so it blends in with your lawn. If you don't want to sink a permanent concrete pier, at least screw in ground anchors to secure the chain.

Topic: 4719 Message: 4719

Greetings and Good Morning All,

EVQRP will be hosting a Gathering Of the Willing this coming Tuesday. We will gather at the Ocotillo Ramada @1700hrs.

Desert Mountain Park - Queen Creek

https://aprs.fi/…
<https://l.facebook.com/l.php?u=https%3A%2F%2Faprs.fi%2F%23%21mt%3Droadmap%26z%3D11%26call%3Da%252FEVQRP%26timerange%3D3600%26tail%3D3600&h=ATPUjnxrT79HtS9XLyr3EqHBSFl5RG5fjNt8iSo2byJI_BdBOFCv8xwW-L0V8enCHS0rN0uRstP3nMqZkghdPCJTaJ54YDGh1JT4FC3ji2U0tKPBv_aoPnmtCcgN3HM3zTkB4hC2gZaIJvo6Wd75H86FTNH_OtmWQo2o3K_NiOAkM_atCbHv90fOr3jcwF1gWzhQkpi-jsm8oEsjh7EK7kYnxbiF622H8o0d8I_ON-cHvIFsljzW_PgymtNTdJlDw7Ztuz1SeBMSLZK4HgCKiNj5scYowAUPjo9l8qo2DuVPSSJWYTozHxk>

We will have our 3 stations set up (Phone, CW, and Digital). We encourage everyone to bring their portable station and set up and play radio with us. This is the perfect opportunity to use your band pass filters if you have them.

Last week we had a large group of folks. Ron (K7RWE) with her joined us along with Al (KG7BMI) along with his wife Brenda (KG7YFA). Also among the group was Andy (KG7KWG). Christi (KG7NAD) brought her FT-897 and her NVIS antenna setup. She had never set it up before and wanted to see how it would work. Jay (N1RWY), Andy (KG7KWG) and myself helped her set it up and get it tuned. When we had it all setup and put the analyzer on it we couldn't get it to tune on 40m. We found out that she was missing the choke balun used with the buddipole system. So Jay suggested that she use a short piece of coax. She cut the coax in half and he showed her how to strip the coax and make it work with the Versa-Tee from buddipole. I'm sure most have seen the video that Jay took of Andy, Christi and I getting our PT in for the evening. After we did that her antenna tuned up very nicely in the phone portion of the 40m band at a 1.2 SWR I believe. Next Rick (W9JRF) showed me the way he tunes his buddipole when he sets up vertical. We set up my buddistick and within minutes we had it tuned up in the 20m CW portion of the band at a 1.2 SWR. Troy started to set up his digital station then realized he left an important piece of his antenna system at home. Rick set up his FT-817 and vertical antenna on 40m and made 3 contacts (W1ZY) in Rhode Island, (KG7YJA) in Western Washington and (W2GOR) in San Francisco. All gave him great signal reports. Christi (KG7NAD) made 1 contact with her NVIS into San Francisco to (W2GOR). I had a good ragchew on CW with (WC7K) in Washington with my FT-857 and buddistick running 30 watts. We had a great time and I believe some learned how to over come and adapt when you are faced with a problem of missing equipment.

I want to apologize for meeting on Tuesday evening this week. We figured that with the holiday weekend folks might be leaving town and might not be able to make it so that is why we are meeting on Tuesday evening. Remember there is a group of us meeting for breakfast on Saturday morning September 2nd at IHOP in Queen Creek @07:30. After breakfast we will meet at Town Hall in the Founders Room @ approximately 09:00 hrs to work on QCECG radio bags. We will be programming radios along with inventorying the bags along with various little projects. If you would like to help send either Joe (N2QOJ), Dennis (KF7RYX) or Ron (K7RWE) and email and let them know. Even if you can only give an hour we would greatly appreciate the help.

I hope to see you all on Tuesday evening for good fellowship and playing radio. Remember temperatures are rising again. I will bring cold water, plan accordingly as it will probably be a little warm Tuesday evening. Take care and have a great week. Please stay radioactive.

Dave AC7FF

4720. ARISS Cross-Band Repeater Not Available for General Communication

Yahoo group: Queen_Creek_Hams
Date: 2017-08-29 18:44:55 UTC
From: Joe Sammartino
Topic: 4720 Message: 4720

ARISS Cross-Band Repeater Not Available for General Communication
08/29/2017

The cross-band FM voice repeater aboard the International Space Station has not officially been activated for general amateur use, although some stations have reported successful contacts.

The system is being used in an effort to detect telemetry from three recently deployed CubeSats.

Russian ISS crew members last week released three satellites carrying Amateur Radio payloads — TOMSK TPU-120 (RS04S), with FM voice announcements on 437.025 MHz; Tanusha-SWSU-1 (RS-6S) with FM voice announcements and AX.25 9,600 bps packet on 437.050 MHz, and Tanusha-SWSU-2 (RS-7S) with FM voice announcements and on AX.25 9,600 bps packet on 437.050 MHz.

They set up the ISS repeater as a cross-band relay between 437.050 MHz and 145.800 MHz at the last minute, because they were concerned about getting telemetry from their satellites, which might be spinning more than expected.

They are hoping that the nearby receiver on ISS might be able to capture and retransmit telemetry not being received up on the ground.

ARISS has advised that using the voice repeater for general contacts can interfere with this mission. ARISS Ham Project Coordinator Kenneth Ransom, N5VHO, noted that the FM cross band repeater has been a capability of the onboard Kenwood D-700 transceiver since it was first flown to the ISS in 2004.

“It has been utilized very little during that time, due to concerns by the Russians that the unit might overheat,” he said.

When the ARISS voice repeater is active and authorized for general amateur voice contacts, the uplink is 437.800 MHz, and the downlink is 145.800 MHz.
—

4721. Tuesday night recap. 8/30/17

Yahoo group: Queen_Creek_Hams
Date: 2017-08-30 15:27:00 UTC
From: Jay
Topic: 4721 Message: 4721

Hey all,
It was great to see the turnout to the GOTW last night in the park.
Even my good luck charm Al showed up and blessed me with good propagation.

For those that were not there, I showed up an hour early to start setting up my "Ethernet cable vertical antenna". Several members have been saying that they can't put up a big antenna for HOA reasons, or you need big expensive antennas to work people on HF. Or they don't have the room to string a dipole on 40m.

I wanted to debunk that thinking and decided to make an antenna completely out of ethernet cable. You know, that blue or grey cable that you plug into the back of your computer and then into the wall?

I sponsored the business of one of our local hams, Home Depot, and picked up a 100' roll of Cat 6 ethernet cable for $19, and I had a so-239 coax connector in the junk box, I think I paid a buck for it at the local hamfest. All in about $20 TOTAL.

Cut the wire to three equal 33' lengths and then trimmed from there to make a 1/4 wave vertical on 40/30/20/17/10. I used a free app on my iphone for the lengths, however, the link I sent last week can work as well for the lengths.

Taped the vertical radiator to my 31' jackite pole for support with electrical tape and laid the radials right on the ground.

I was using a "new to me" Yeasu FT-8. Not FT-800, or FT-8000.... Fox Tango - Eight.
Yes, we are talking 1976 - analog display technology.

The FT-8 is a very basic, non threatening, old school Yeasu HF rig, covering the 80-40-20-15-10 bands. I found it on a Craigslist ad over the weekend and picked it up the other day.

Power out:
10W on 20m
2W on 40m
(both confirmed into a dummy load this morning).

Worked list:
20m
NH6I (Hawaii)
K4BAI (Georgia)
KW8N (Ohio)
W8EQB (Illinois)
I missed checking into the sked list by about a minute to work ZS3D, who

was an easy 5/5 copy off the antenna. (For those that do not know, Danie, ZS3D is in South Africa)

40m
KJ7RWQ (California)
VE7DQA (BC, 100m north of Spokane, WA)

On all the stations that I worked I only answered folks calling CQ. And usually picked them up with the first call. Sweet!

I will do a full blog write-up for more details and information.. However - COME ON OUT and join us! I think I proved that in the BOTTOM of the sun cycle, OLD gear with LOW power and a hunk of wire CAN get you on HF. Looking forward to the next one, and maybe even have Version 2.0 of the antenna ready to go. (We can talk then Ron..)

Rope and paracord on sale.

Hey all,
FYI. 30% off sale on paracord - for those of you looking for good prices
on antenna hanging rope for remote ops, or temp guys for portable ops -
Plus free shipping on over $49 as well.

From: Joe Sammartino
Topic: 4729 Message: 4729

I want to extend a big "thank you" to the following folks for volunteering to assist with our QCEC go-bag inventory and re-organization:

Jay, N1RWY
Brad, N7LZD
Christi, KG7NAD
Dave, AC7FF
Dennis, KF7RYX
Al, KG7BMI
Ron, K7RWE

You all did a great job and we very much appreciate Brad's efforts in bringing out all the supporting hardware to record, label, laminate, and bag our go-bag items.

I don't think I left anyone out but please let me know if I did.

Thanks again,

Joe, N2QOJ

He contacted the QC club on August 14th. I answered him on the same day.

He asked me to help price his uncle's stuff and maybe we were interested in buying some of it.

I recommended he check eBay's sold listings and to send to me a list of what he has. I have never heard back from him.

The Queen Creek Emergency Communications Group will host The East Valley QRP Group testing session this Thursday evening.

No prior registration is required. Technician license class and upgrade testing will be offered.

Where: Queen Creek Town Hall, Founders' Room, *http://tinyurl.com/QCChambers <http://tinyurl.com/QCChambers>*

When: Thursday, 9/14/17 @ 7 PM (1900 hours)

Details about what to bring to an exam session is listed below.

You will need to bring the following with you:
· $15.00 Exam Fee

· Photo ID – Driver’s License, Student ID, or Any government issued photo ID

· Your Social Security Number is required for the FCC application. However, if you register with the FCC in advance, you can receive an FRN, which is an FCC Registration Number. You can use that on your application instead of the SSN. Here’s the link to get your own FRN number: FCC FRN Registration <http://wireless.fcc.gov/uls/index.htm?job=about_getting_started#d36e21>

Please pass this announcement to interested friends and family.

4752. Mexico earthquake, ARRL message

Yahoo group: Queen_Creek_Hams
Date: 2017-09-20 04:14:40 UTC
From: Jim KF7E
Topic: 4752 Message: 4752

FYI:

Amateur Radio Emergency Net Active in Wake of Earthquake in Central Mexico

09/19/2017

The *FMRE National Emergency Net* <http://rne.puebladx.org/RNE/Bienvenida.html> has activated on 7.060 MHz following a magnitude 7.1 earthquake in the central Mexico state of Puebla at 1814 UTC on Tuesday. The net also uses 3.690 MHz and 14.120 MHz as well as IRLP reflector 9200, channel 08.

The epicenter was some 75 miles southeast of Mexico City, which felt the temblor. Preliminary reports indicate a lot of collapsed buildings and missing people.

The FMRE net has been handling traffic to make up for the loss of some cellular networks, FMRE President Al Tomez, XE2O, told ARRL.The earthquake came 32 years to the day after a 1985 magnitude 8.0 earthquake struck the Mexico City, killing some 9,500 people in and around the capital city.

Just one week ago, a magnitude 8.1 earthquake struck off Mexico’s southern coast, killing more than 60 people and causing considerable damage.

KF7E

Thanks for posting. One of the things that got me interested in HAM years ago was when I was living in SoCal and started "scanning" I discovered the Earthquake Net on the 2m band they use to have back in the 80s (when i found it). It has since changed frequencies and I believe Dr. Kate Hutton has taken over with an entire new system. They, much like SkyWarn, had weekly NETs and also activated anytime there was a significant (3.0+ if I remember correctly) event. They would do a roll call and damage update. This was long before internet and i didn't take long to figure out where the approximate epicenter was. As I move forward in this hobby, getting involved with an emergency net is in my plans. I feel now our hobby will become more and more important, not less as the world relies on CELL and INTERNET for information. These of course go bye bye in major events like storms, earthquakes, tornado's, etc. and HAMs may be the only source of communications in many areas

KI7PBR

4754. ☢ International Space Station visible tonight ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-09-24 23:46:33 UTC
From: Joe Sammartino
Topic: 3810 Message: 4754

☢ *International Space Station visible tonight *☢

Folks,

Good news! Another opportunity to spot the station tonight for 5 minutes. It will be at a good height and should be an excellent view barring any cloud cover.

If you check in to the QCECG net tonight at 8 PM, tell us about your ISS spotting experience!

Time: Sun Sep 24th 7:14 PM
Visible: 5 min
Max Height: 50°
*Appears: 11° above SSW **(from 206 degrees)*
*Disappears: 19° above ENE **(toward 68 degrees)*

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

If you are an amateur radio operator, listen in (or work) on these frequencies:

Voice and SSTV Downlink: 145.80 (Worldwide)
Voice Uplink: 144.49 for ITU Regions 2 and 3
VHF Packet Uplink and Downlink: 145.825 (Worldwide) - easiest to hear
UHF Packet Uplink and Downlink: 437.550
UHF/VHF Repeater Uplink: 437.80
UHF/VHF Repeater Downlink: 145.80

Regards,

Joe, N2QOJ

4755. Volunteers Needed

Yahoo group: Queen_Creek_Hams
Date: 2017-09-25 18:06:22 UTC
From: wmunsil@...
Topic: 4755 Message: 4755

From a Mensa Facebook page:

09/24/2017
The American Red Cross (ARC) has asked the ARRL for assistance with relief efforts in Puerto Rico. ARC needs up to 50 radio amateurs who can help record, enter, and submit disaster-survivor information into the ARC Safe and Well system. In the nearly 75-year relationship between ARRL and ARC, this is the first time such a request for assistance on this scale has been made. ARRL now is looking for radio amateurs who can step up and volunteer to help our friends in Puerto Rico.
Requirements
There are very specific requirements and qualifications needed for this deployment.
Due to the nature of this deployment you will need to process in as ARC volunteers. This includes passing a background check. The ARC has indicated that it will cover all expenses for transportation, lodging, and feeding while on deployment. ARC will also provide liability coverage for volunteers. The only out-of-pocket expense to the volunteer would be personal items purchased during deployment.
ARRL and ARC will require training for volunteers being deployed. ARC will provide general deployment training and advanced training in working in austere environments. ARRL will provide to ARC training on Amateur Radio equipment and modes to be used, reporting guidelines, and operating guidelines.
Deployment will be for up to 3 weeks.
Qualifications
General class Amateur Radio license or higher Familiarity with WinLink, HF voice, and VHF simplex communications Strong technical skills Ability to work under difficult conditions Ability to deploy for up to 3 weeks Ability to work as part of a team Helpful Skills Spanish language skills
Previous experience in disaster response Previous or current work as a Red Cross volunteer Previous experience with shelter operations If you feel that you meet these qualifications and would like to be considered for this deployment, please contact ARRL Emergency Preparedness Manager Mike Corey, KI1U (860-594-0222), who will make the introduction of qualified volunteers to ARC.

Interesting.....

The ARRL ARES organization maintains a list of registered volunteer operators and their skills. That list is supposed to be used in emergencies to call upon needed volunteers.

I would be interested to know why they are not being contacted directly. I am registered with ARES but have never received any communication before, during, or after any event.

☢ *International Space Station visible tonight *☢

Folks,

Good news! Another opportunity to spot the station tonight for 4 minutes. It will be at an OK height and should be a good view barring any cloud cover.

Time: Tue Sep 26 7:08 PM
Visible: 4 min
Max Height: 51°
Appears: 32° above W (from 270°)
*Disappears: 12° above NE (toward 45°**)*

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

If you are an amateur radio operator, listen in (or work) on these frequencies:

Voice and SSTV Downlink: 145.80 (Worldwide)
Voice Uplink: 144.49 for ITU Regions 2 and 3
VHF Packet Uplink and Downlink: 145.825 (Worldwide) - easiest to hear
UHF Packet Uplink and Downlink: 437.550
UHF/VHF Repeater Uplink: 437.80
UHF/VHF Repeater Downlink: 145.80

Regards,

Joe, N2QOJ

4762. Elmer List

Yahoo group: Queen_Creek_Hams
Date: 2017-09-26 16:31:24 UTC
From: Joe Sammartino
Topic: 4762 Message: 4762

QCARC/QCECG would like to develop an Elmer list that wannabe, new, or experienced hams could reference for assistance regarding a specific technical, procedural, or safety issue.

Would you like to be an Elmer? If yes, here is what you need to do:

1. Prepare an email with your name and call sign and area(s) that you feel you can coach, mentor, and offer assistance to a wannabe, new, or experienced ham. CLEARLY indicate how you would like interact - phone, email, in-person, etc. - and when is the best time in your schedule for someone to contact you.

2. Send to Joe that email PRIVATELY at jsammartino@.... Please do not reply to this email unless you have a question or comment for the entire Group.

Here's an example:

Joe Sammartino, N2QOJ, Amateur Extra
Elmer: Echolink, WinLink, Repeater interfacing, APRS, test equipment
Contact: Email (n2qoj.ham@... <n2qoj.ham@...>), SKYPE (joesammartino), 480-270-4563
Best times: Work schedule dependent but usually evenings and very late evenings

I will collect all inputs and create a list that will be made available on all of our web sites and Groups.

I look forward to your submission.

Regards,

Joe, N2QOJ

Hello,

Thanks for the list Joe, I was hoping there were ham fests' coming up soon!!

Just wanted to let you know that I followed your lead to the Tech. classes put on by the Thunderbird club, its a bit of a drive but worth it to me. We test on the 7th, I'm learning a lot and am feeling good about testing.

Thanks again. I have wanted to come down to the park, but it seems like I always have to work late that night. I will make soon I hope.

From: Michelle W
Topic: 4755 Message: 4765

Good Morning All,

I am just seeing this message. It is very common for organization to “forget” protocol when real emergencies happen.

Remember this request started with the Red Cross, so they likely know little or nothing about ARES.

Someone in ARES needs to step up and contact ARRL and “remind” them of the protocol, it will expedite the process and get help to those who need – the most important part of the equation our friends in Puerto Rico who need help.

Michelle

The American Red Cross (ARC) has asked the ARRL for assistance with relief efforts in Puerto Rico. ARC needs up to 50 radio amateurs who can help record, enter, and submit disaster-survivor information into the ARC Safe and Well system. In the nearly 75-year relationship between ARRL and ARC, this is the first time such a request for assistance on this scale has been made. ARRL now is looking for radio amateurs who can step up and volunteer to help our friends in Puerto Rico.

Requirements

There are very specific requirements and qualifications needed for this deployment.
Due to the nature of this deployment you will need to process in as ARC volunteers. This includes passing a background check. The ARC has indicated that it will cover all expenses for transportation, lodging, and feeding while on deployment. ARC will also provide liability coverage for volunteers. The only out-of-pocket expense to the volunteer would be personal items purchased during deployment.
ARRL and ARC will require training for volunteers being deployed. ARC will provide general deployment training and advanced training in working in austere environments. ARRL will provide to ARC training on Amateur Radio equipment and modes to be used, reporting guidelines, and operating guidelines.
Deployment will be for up to 3 weeks.
Qualifications

General class Amateur Radio license or higher Familiarity with WinLink, HF voice, and VHF simplex communications Strong technical skills Ability to work under difficult conditions Ability to deploy for up to 3 weeks Ability to work as part of a team Helpful Skills

Spanish language skills
Previous experience in disaster response Previous or current work as a Red Cross volunteer Previous experience with shelter operations If you feel that you meet these qualifications and would like to be considered for this deployment, please contact ARRL Emergency Preparedness Manager Mike Corey, KI1U (860-594-0222 <tel:(860)%20594-0222>), who will make the introduction of qualified volunteers to ARC.

The October edition of ADAW Newsletter had some incorrect data on the Hamfest Calendar page.

Corrections are:

1. The hours for the TARA Swapmeet on October 7 are 8:00 AM until 11:30 AM (not 11:30 PM). Ray Adams, K7MLE’s phone number is 928.468.6988 <(928)%20468-6988>.

2. QuartzFest will be the 21st of January through the 27th. It was mistakenly listed as the 21st through 21st.

The corrected page is attached.

Amateur Radio Antennas at Home Depot

Home Depot has a good selection - small but good - of amateur radio antennas.

<http://goog_1954967108>
http://www.homedepot.com/s/amateur%2520antenna?NCNI-5

Tips:

1. Be aware of the mobile antenna coax connectors on the antenna, you may need an adapter

2. Search a bit. You will find antenna mounts, mount adapters (NMO to S0239), and other items of interest to the amateur radio operator.

3. If the product you select does not offer free shipping to your home, it can ship to your nearest Home Depot for free pick up at your convenience!

Also, Home Depot has a large selection of TV antennas too:

<http://goog_1954967111>
http://www.homedepot.com/s/tv%2520antenna?NCNI-5

QCARC has a Facebook PAGE at https://www.facebook.com/QueenCreekARC/ .

However, that is a PAGE which is geared to announcements, photos, videos, and events only and it is specific to QCARC.

The new Facebook GROUP, "East Valley Amateur Radio" is a fully interactive Facebook experience created just for hams in our local area. Please join and feel free to post announcements, start discussions, share ham radio and emcom stuff, etc.

You can find it at: https://www.facebook.com/groups/1979532548947031/

Unlike the Facebook PAGE, the GROUP is private by design so you must request joining and will be accepted by the GROUP owner - me! It's been up and running for a few weeks but I kept it under the radar until now.

☢ Ham Gear For Sale ☢

Hi Folks,

One of our members, Zach Burnham, KF7YRW, is offering some of his base station gear for sale.

He has a Craigslist advert at: https://phoenix.craigslist.org/cph/ele/d/amateur-radio-icom-ic-718/6307408717.html

You can contact Zach directly via text at *480-248-4771 <(480)%20248-4771>* or via email at zachary.burnham@gmail.com.

I will post his Craigslist ad here as well:

I'm looking to sell my Icom radio and Ameritron amplifier to fund some other projects. Everything is in excellent condition.

Included in this offer:
- Icom IC-718 (with hand mic and power cable)
- Ameritron 811A
- MFJ-949E 300W tuner
- Astron SS-18 power supply
- MFJ-260C dummy load
- Power strip

$1100 OBO for all.
Also willing to sell amplifier and/or radio separate - $500 each OBO

Regards,

Joe, N2QOJ

Folks,

The first version of the Queen Creek Amateur Radio Club Elmer List is attached here for your review and reference.

The intent of the Elmer List is to provide knowledgeable resources (people!) for many aspects of the amateur radio service who can assist personally, whether face-to-face or via email, phone, or video conference.

Remember, this YAHOO Group is still the right place for general questions or requests that are of interest to all. This is the place to get many point of views in response to your questions. Most of them are usually correct. ☐

Comments / feedback is always welcome.

4783. Tonight's QCECG Net

Yahoo group: Queen_Creek_Hams
Date: 2017-10-09 03:37:54 UTC
From: Joe Sammartino
Topic: 4783 Message: 4783

Hello Folks,

For those of you that participated in the weekly QCECG Training Net, thank you.

Tonight, Christi, Net Control Operator, asked the following questions as a way to inform net participants and listeners about QCECG protocol.

The questions and answers are repeated here for your reference.

1. Who can formally activate the QCECG?

Answer: QC Fire & Medical, Emergency Manager OR QCECG Leadership on behalf of QC, Maricopa County Sheriff's Office, LDS Church

2. Name several ways the QCECG activated and by whom.

Answer a:

1. Via Radio - QC Repeater and Ocotillo Repeater

2. email

3. text

4. phone

Answer b:

QCECG Leadership - Joe, Dennis, Ron or whomever they designate

3. What information do you provide when responding to an activation?

a. Available or not available

b. If available - for how long, If not available, when will you be available

c. Whatever else net control asks for

Joe, N2QOJ

4784. PREDICTING PROPAGATION IN HAM RADIO WITH VOACAP ONLINE

PREDICTING PROPAGATION IN HAM RADIO WITH VOACAP ONLINE
[image: 1118592115.jpg]

RELATED BOOK
Ham Radio For Dummies, 2nd Edition
<http://www.dummies.com/store/product/Ham-Radio-For-Dummies-2nd-Edition.productCd-1118592115.html>

By H. Ward Silver <http://www.dummies.com/?s=&a=h-ward-silver>

Operating on the high-frequency (HF) ham radio bands can be very exciting as conditions change around the world.

To help you be in the right place at the right time, propagation prediction programs are available. Many are free, such as the HamCap <http://www.dxatlas.com/HamCap> software from Alex Shovkoplyas (VE3NEA). The online prediction service VOACAP Online <http://www.voacap.com/prediction.html> is easy to use and helps you understand propagation.
<http://teads.tv/inread-outstream/>

Both programs use VOACAP, the underlying engine that does all the calculation based on current solar information.

You can have a lot of fun with propagation prediction programs, but remember: they aren't exact; conditions can change from day to day and hour to hour; and while you're on the computer, you're not on the air making contacts!

Here's how to use VOACAP Online, starting with entering the Date information in the top-right corner of the screen:
1Make sure that the month and year are correct.

Don't enter a value for SSN (Smoothed Sunspot Number), because the program will obtain it from an online source.
2Select a transmitting location from the Transmitter Site section's QTH menu (typically, your home location).

U.S. cities are listed in the W section; select one near you. (Later, you can enter direct latitude and longitude if you want to be exact, but it won't make a great deal of difference.)

When you make a selection, the red map pin moves to that location.
3Select a receiving location from the Receiver Site section's QTH menu.

The distance and bearing information below the map updates, and the blue pin moves to the receiving location.
[image: Voacap Online with a propagation prediction]

<http://www.dummies.com/wp-content/uploads/383475.image0.jpg>4Leave all antenna, power, mode, and other information alone for now.

The screen looks like the one shown here with a map on the left and the leend information on the right.
[image: Results of a VOACAP prediction.]
<http://www.dummies.com/wp-content/uploads/383476.image1.jpg>5Click the button labeled Run the Prediction!

A new window appears.

Each of the HF amateur bands is marked as a black line across the graph with increasing frequency along the vertical axis. Universal Coordinated Time (UTC) is shown along the horizontal axis. The color bar on the right shows the probability that your transmitted signal will be heard at the receiving site. Sunrise and sunset at each location are shown below the graph.

In this particular scenario, there’s a pretty good chance of being heard in Kenya from central Missouri on the 17 meter band between 1800 and 2400 UTC, followed by a 4-hour potential opening on the 20 meter band.

Topic: 4723 Message: 4790

World Scout Calling Frequencies for upcoming "Jamboree on the Air" event from October 20 thru 22.

HF SSB Voice

80 meters – 3.940 MHz and 3.690 MHz where authorized.
40 meters – 7.190 MHz and 7.090 MHz where authorized.
20 meters – 14.290 MHz
17 meters – 18.140 MHz
15 meters – 21.360 MHz
12 meters – 24.960 MHz
10 meters – 28.390 MHz
6 meters – 50.160 MHz

HF CW Morse Code

80 meters – 3.570 MHz
40 meters – 7.030 MHz
20 meters – 14.060 MHz
17 meters – 18.080 MHz
15 meters – 21.140 MHz
12 meters – 24.910 MHz
10 meters – 28.180 MHz
6 meters – 50.160 MHz

The JOTA is not a contest. The idea is not to contact as many stations as possible during the weekend. It is about Scout to Scout conversations to learn about one another and the country where they reside.

4794. ☢ International Space Station visible tonight ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-10-14 17:43:43 UTC
From: Joe Sammartino
Topic: 3810 Message: 4794
Attachments: 1 described; binary payloads are missing from this source WARC

☢ *International Space Station visible tonight *☢

Folks,

Good news! Another opportunity to spot the station tonight for only 2 minutes. It will be at a good height and should be an excellent viewing barring any cloud cover.

Time: Sat Oct 14 7:36 PM
Visible: 2 min
Max Height: 44°
*Appears: 10° above NW **(from 315 degrees)*
Disappears: 44° above WNW *(toward 293 degrees)*

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

If you are an amateur radio operator, listen in (or work) on these frequencies:

Voice and SSTV Downlink: 145.80 (Worldwide)
Voice Uplink: 144.49 for ITU Regions 2 and 3
VHF Packet Uplink and Downlink: 145.825 (Worldwide) - easiest to hear
UHF Packet Uplink and Downlink: 437.550
UHF/VHF Repeater Uplink: 437.80
UHF/VHF Repeater Downlink: 145.80

Regards,

Joe, N2QOJ

4798. East Valley QRP to meet Friday Evening in Queen Creek

Yahoo group: Queen_Creek_Hams
Date: 2017-10-18 02:50:49 UTC
From: Joe Sammartino
Topic: 4798 Message: 4798

Greetings All,

I hope this finds all of you having a great week.

EVQRP will be hosting a Gathering Of the Willing this coming Friday evening at Desert Mountain Park at the Cottonwood Ramada. We will meet at 17:00 hrs. We usually go until around 21:30 hrs. We will have a Phone, Digital and CW station set up. We encourage everyone who attends to bring their portable station and set it up and play radio with us. I will have my testing materials with me, so, if you know someone that would like to test or upgrade we will be able to do that for you. Also, if you know someone that is a General or Extra and would like to become a Volunteer Examiner send them my way and we can get them started with the paperwork as well.

Last week we played with a Buddipole Vertical configuration for 40m. Rick(W9JRF) set up his FT-817 and 45 watt amp along with the Buddipole Vertical. We wanted to see if we could get my newly purchased Mini Coil along with the Rigid Shock Cord Whip to tune on 40m. The Mini Coil is advertised for 20m-10m. We used 4 11"antenna arms the Mini Coil and the Rigid Shock Cord whip and was able to tune it for the 40m phone portion of the band, now to test it out. Rick made a contact to South Africa and was given a 5/8 signal report, so I think the above combination works on 40m. He also made a contact with a gentleman in Nevada doing a Parks On the Air activation as well. Christi (KG7NAD), Troy (K7TJK), Andy (KG7KWG) and myself also made a contact with him using Rick's radio. Troy set up his FT-857 and a homemade Linked Dipole for 20m and 40m. I used his setup to make a contact on CW to Joesph Oregon during the NAQCC sprint. Christi (KG7NAD) set up her FT-897 and her SotaBeams Linked Dipole 20m-40m. I believe she had no contacts. I set up my FT-857 and a Buddipole Horizontal on 20m and didn't make a contact on my rig.

I wish all of you a great week. Remember that we have a couple of events this coming weekend. Radios in the Park at the LDS Church just west of Hawes on Ocotillo Rd this Saturday from 10:00-14:00 hrs. We will offer testing there as well and I believe we are setting up a station for JOTA (Jamboree On the Air) for the scouts as well. We also have the Town of Queen Creek Trunk or Treat event on Saturday evening. If you are available please contact Joe (N2QOJ), Dennis (KF7RYX) or Ron (K7RWE) and let them know of your availability. I hope to see you either Friday evening or at one of the events this coming weekend. Please stay radioactive.

73,
Dave AC7FF

QST QST QST

From Queen Creek Amateur Radio Club and Queen Creek Emergency Communications Group.

We have been asked to provide some form of venue for Scouts in our area during the JOTA event. Specifically, those interested could visit with us to experience amateur radio and make contacts with JOTA stations.

We plan on holding such an event on Saturday, October 21 between 10 AM and 2 PM in Queen Creek at 19781 E Ocotillo Road. The venue is a large outdoor park pavilion at a local church.

We hold "hands-on" events every 5-6 weeks during the cooler part of the year as a public service and as a way for us to keep up our field operation skills. These events are always open to the public.

We would be happy to host Scouts of all ages at this upcoming event.

As always, anyone with an interest in amateur radio is welcome.

Also, if you know someone that is a General or Extra and would like to become a Volunteer Examiner send them my way and we can get them started with the paperwork as well.

Last week we played with a Buddipole Vertical configuration for 40m. Rick(W9JRF) set up his FT-817 and 45 watt amp along with the Buddipole Vertical. We wanted to see if we could get my newly purchased Mini Coil along with the Rigid Shock Cord Whip to tune on 40m. The Mini Coil is advertised for 20m-10m. We used 4 11"antenna arms the Mini Coil and the Rigid Shock Cord whip and was able to tune it for the 40m phone portion of the band, now to test it out. Rick made a contact to South Africa and was given a 5/8 signal report, so I think the above combination works on 40m. He also made a contact with a gentleman in Nevada doing a Parks On the Air activation as well. Christi (KG7NAD), Troy (K7TJK), Andy (KG7KWG) and myself also made a contact with him using Rick's radio. Troy set up his FT-857 and a homemade Linked Dipole for 20m and 40m. I used his setup to make a contact on CW to Joesph Oregon during the NAQCC sprint. Christi (KG7NAD) set up her FT-897 and her SotaBeams Linked Dipole 20m-40m. I believe she had no contacts. I set up my FT-857 and a Buddipole Horizontal on 20m and didn't make a contact on my rig.

I wish all of you a great week. Remember that we have a couple of events this coming weekend. Radios in the Park at the LDS Church just west of Hawes on Ocotillo Rd this Saturday from 10:00-14:00 hrs. We will offer testing there as well and I believe we are setting up a station for JOTA (Jamboree On the Air) for the scouts as well. We also have the Town of Queen Creek Trunk or Treat event on Saturday evening. If you are available please contact Joe (N2QOJ), Dennis (KF7RYX) or Ron (K7RWE) and let them know of your availability. I hope to see you either Friday evening or at one of the events this coming

weekend. Please stay radioactive.

73,

Dave AC7FF

Subject: [Queen_Creek_Hams] East Valley QRP to meet Friday Evening in Queen Creek

Greetings All,

I hope this finds all of you having a great week.

EVQRP will be hosting a Gathering Of the Willing this coming Friday evening at Desert Mountain Park at the Cottonwood Ramada. We will meet at 17:00 hrs. We usually go until around 21:30 hrs. We will have a Phone, Digital and CW station set up. We encourage everyone who attends to bring their portable station and set it up and play radio with us. I will have my testing materials with me, so, if you know someone that would like to test or upgrade we will be able to do that for you. Also, if you know someone that is a General or Extra and would like to become a Volunteer Examiner send them my way and we can get them started with the paperwork as well.

Last week we played with a Buddipole Vertical configuration for 40m. Rick(W9JRF) set up his FT-817 and 45 watt amp along with the Buddipole Vertical. We wanted to see if we could get my newly purchased Mini Coil along with the Rigid Shock Cord Whip to tune on 40m. The Mini Coil is advertised for 20m-10m. We used 4 11"antenna arms the Mini Coil and the Rigid Shock

Cord whip and was able to tune it for the 40m phone portion of the band, now to test it out. Rick made a contact to South Africa and was given a 5/8 signal report, so I think the above combination works on 40m. He also made a contact with a gentleman in Nevada doing a Parks On the Air activation as well. Christi (KG7NAD), Troy (K7TJK), Andy (KG7KWG) and myself also made a contact with him using Rick's radio. Troy set up his FT-857 and a homemade Linked Dipole for 20m and 40m. I used his setup to make a contact on CW to Joesph Oregon during the NAQCC sprint. Christi (KG7NAD) set up her FT-897 and her SotaBeams Linked Dipole 20m-40m. I believe she had no contacts. I set up my FT-857 and a Buddipole Horizontal on 20m and didn't make a contact on my rig.

I wish all of you a great week. Remember that we have a couple of events this coming weekend. Radios in the Park at the LDS Church just west of Hawes on Ocotillo Rd this Saturday from 10:00-14:00 hrs. We will offer testing there as well and I believe we are setting up a station for JOTA (Jamboree On the Air) for the scouts as well. We also have the Town of Queen Creek Trunk or Treat event on Saturday evening. If you are available please contact Joe (N2QOJ), Dennis (KF7RYX) or Ron (K7RWE) and let them know of your availability. I hope to see you either Friday evening or at one of the events this coming weekend. Please stay radioactive.

From: Joe Sammartino
Topic: 4805 Message: 4805

Folks,

If you are a QCECG volunteer, then you are requested to provide your services for the upcoming Trunk or Treat event on Saturday from 4:30 PM til 9:30 PM - only a 5 hour event.

Supporting these events is considered part of our drill protocol to maintain membership in the Queen Creek Emergency Communications Group. Volunteer turnout over the last couple of events has been less than desirable.

We need 15 people to cover this event adequately. We will be shadowing most of the principles this time.

Please respond directly to me at jsammartino@.... If you are not a member of QCECG but would still like to volunteer your services, contact me directly.

Thank you,

Joe, N2QOJ

Folks,

I have received only a handful of responses.

We need 4 people at library bus stop, 2 at Desert Mountain, 1 net control, 2 riding buses, 3 to shadow, 3 stationed each of three candy zones, and 2 at parking lots.

We need your assistance - it's only 5 hours.

Please private email me at jsammartino@...

Thanks,

4812. Gathering of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-10-24 01:26:46 UTC
From: Joe Sammartino
Topic: 4687 Message: 4812

Good Morning All,

I hope everyone had a great weekend and was able to participate in some of the radio events on Saturday. I put on a testing session at the Gilbert Farmers Market and Christi (KG7NAD) also help out as well. We had 5 people take the Technician test and all passed with flying colors and of the 5 one of them also took the General test and successfully passed that as well. So, we have 5 new operators in the hobby.

EVQRP will host another Gathering Of the Willing this coming Friday evening. We meet at Desert Mountain Park which is at Hawes Rd and Ocotillo Rd on the Southeast corner. We meet inn the rear of the park at the Cottonwood Ramada which is across from the baseball fields and just Southeast of the bathroom building. We will meet at 17;00 hrs and usually go until around 21:30. We will set up various stations and antennas. Usually we have a Phone, Digital and CW stations set up. We encourage everyone to bring their portable station, set up, show your station off and play radio with us.

Last week was a bit unusual in nature. Now that it is cooler you can see that everyone is getting out and enjoying the cooler weather. I was on my way to Desert Mountain Park to set up early when I received a phone call from Christi (KG7NAD) informing me that there was a wedding setting up at the Cottonwood Ramada, so on to plan B. Set up at the large grassy area in the middle of the park, I'm afraid not, there was a birthday party setting up at that Ramada. Okay plan C. set up at the Ramada in the front of the park next to the big football field. We decided to wait for a few to see if there would be a football game or practice and sure enough the teams started showing up. Plan D, Jay (N1RWY) volunteered to go over and check out Founders Park, it was also being used, he did find a Ramada that was behind the old Fire Station that was open so that is where we finally setup for the evening. I set up a Par End Fed antenna from LNR Precision. It's called the Trail Friendly End Fed. It does 10/20/40. I bought it years ago and have never tuned it. The directions stated that when you have 40m tuned that 10 and 20 would fall in line. I set it up at about 30 ft on a Jackite pole and Jay (N1RWY) and myself put and antenna analyzer on it, 40m was spot on in the CW portion of the band. We checked 10 and 20 and they were spot on just like the directions stated. Now this antenna is only rated up to 25 watts so I set up the FT-817 and started calling CQ, no takers, I could hear stations but no luck. Switched to the FT-857 and bumped the power to 20 watts, still no takers, Troy set up his FT-857 along with his homemade 20/40 linked dipole and he also had no luck. We could hear stations but was unable to make a contact. By this time it was time to pack up and head home. Thanks to Christi (KG7NAD) and Jay (N1RWY) for keeping us company. Rick (W9JRF) had family commitments and was unable to attend. Some evenings are great and some are not, but the great fellowship is always

present.

I hope everyone has a safe week. I will have my testing materials with me so if anyone knows someone in need of a test or upgrade please let me know or tell them to show up at the Gathering. I hope to see all of you there on Friday evening. Remember we are meeting on Friday evenings through November 3rd then will switch back to Tuesday evenings on November 7th. Have a great week and please stay radioactive.

73,
Dave

4817. Last Week's QCECG Training Net Topic

Yahoo group: Queen_Creek_Hams
Date: 2017-10-30 00:42:37 UTC
From: Joe Sammartino
Topic: 4817 Message: 4817

Hi folks,

Here are some notes from last week topic concerning "Open Microphones".

The notes are lifted from our friends at the AEN-MAR Net and has been edited by me for our members.

If you engage in over-the-air nets, radio drills, or radio communications in support of unplanned events, this is a must read.

OPEN MICROPHONES

On this net we have addressed fox hunting, and that's one way to deal with an “open” or “stuck” microphone. This week I'd like to get a little more into how to deal with the situation where a radio is transmitting when it shouldn't be. It is often embarrassing for the person with the open mic, and can tie up the net to prevent traffic – which can be merely an irritation, or cause a great deal of trouble.

What should you do when you hear an open mic? What should you do when you ARE an open mic? How can you avoid becoming an unintentional radio star?

Every now and then you may run into intentional interference. In some respects, dealing with that on a net is similar to dealing with an open mic. Although it's sometimes frustrating, malicious interference can also give you opportunities to learn. If you can pass traffic over a net when interference is going on, you have a valuable skill.

Traditionally on this net we say that there are 2 types of hams: those who have experienced an open mic, and those who will. Even though this subject is an important one, let’s also enjoy the lighter side tonight and use our own open mic experiences to help others learn from them.

We will discuss Open Microphones and the challenges they pose for a net, how and why they occur, how we prevent our own radios from causing them and how we deal with them on the receiving end.

Let's talk about causes of open mics. What can cause your radio to transmit when you don't want it to?

Possible answers:

• PTT pushed accidentally

• Speaker/mic only part way in (Yaesu)

• Low battery – some radios can get stuck in transmit until the battery dies.

• VOX

• Others?

Now let’s talk about how to prevent an open mic. Here’s an idea on how to prevent having an open mic incident:

Employ your radio’s Time-out-Timer!

So, now that we have identified what can cause an open mic and how to prevent it, how do we deal with them in a net situation (or drill) when it does occur? First, does anyone know what the most common WRONG answer is?

“Hey, someone on the net has an open mic. Stop transmitting!” - on the same frequency that has the open mic.

Why is that the wrong answer?

The station with the open mic is the one station that can't hear you.

Now let's talk about RIGHT answers. What can you do when there's an open-mic station on the net?

Possible answers:

1. Raise power levels to talk over the open mic. Hopefully Net Control can also do this, and perhaps switch to an alternate frequency.

2. Switch your radio to repeater input to see if you can fox-hunt the open mic. If they are close enough you may be able to tell them in person that their mic is open. (Sometimes net control will send a mobile unit around to do this.)

3. Listen to the station with the open mic. (You don't have much choice anyway.) You might recognize their voice or position and be able to let them know. Don't forget you can use text message or a phone call.

4. If you have priority or emergency traffic, you should switch your radio to high power and attempt to contact Net Control. Also, if there is an alternate frequency, you can change to that frequency to contact Net Control.

5. Others?

When the open mic does clear, the Net Control Operator will generally advise the net that there has been an open mic. If you haven’t heard any traffic for a while just before you hear this announcement, please check you radio to see if you might have been the cause. If you discover that you were the culprit, do not feel you have to fess up on the air. Just be aware and prevent the problem from happening again. The same applies if you do identify who is causing the open mic. It isn’t necessary to identify the station unless it is apparent that it is an ongoing situation that the unit causing the open mic is unaware of.

4818. ☢ International Space Station visible in the Morni ng! ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-10-30 01:24:57 UTC
From: Joe Sammartino
Topic: 4818 Message: 4818
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

Good news for you early birds!

Another opportunity to spot the station tomorrow morning for 5 minutes. It will be at a very great height and should be an excellent viewing barring any cloud cover.

Time: Mon Oct 30 5:35 AM
Visible: 5 min
Max Height: 75°
Appears: 24° above SW (from 225 degrees)
Disappears: 10° above NE (toward 45 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

If you are an amateur radio operator, listen in (or work) on these frequencies:

Voice and SSTV Downlink: 145.80 (Worldwide)
Voice Uplink: 144.49 for ITU Regions 2 and 3
VHF Packet Uplink and Downlink: 145.825 (Worldwide) - easiest to hear
UHF Packet Uplink and Downlink: 437.550
UHF/VHF Repeater Uplink: 437.80
UHF/VHF Repeater Downlink: 145.80

Regards,

Joe, N2QOJ

Catalogs are about possibilities

By Dan Romanchik, KB6NU

When I was a kid, I used to regularly get catalogs, such as the Allied Radio and Lafayette Radio catalogs shown below, and pore over them for hours. Even if I couldn't afford to buy the latest Knight-Kit or Lafayette shortwave radio, I could imagine what it would be like. These catalogs were chock full of possibilities.

[image: Inline image 1] [image: Inline image 2]

I spent many hours poring over the Allied and Lafayette catalogs as a kid. These two are from 1968, when I was 13 years old.

So, you can imagine how I felt when, last Thursday, I found both the Autumn/Winter 2017 DX Engineering catalog and the 2018-2019 Newark Electronics/element14 catalog in my mailbox.

DX Engineering <https://www.dxengineering.com/> has really taken the amateur radio world by storm over the last ten years or so. I probably don't have to tell you about that. If you're an active amateur radio operator, I'm sure that you have heard about—and probably ordered from—DX Engineering.

[image: Inline image 3]

I think that DX Engineering did a very smart thing by investing the money in a print catalog. There's something about browsing a print catalog that is just more satisfying than browsing online.

DX Engineering has just about everything you need to have fun with amateur radio. The one glaring omission? They still don't carry my study guides!

The Newark/element14 2018-2019 catalog <http://www.newark.com/catalogues> is a completely different beast. Amateur radio operators are only a small part of Newark/element14's market, but one nonetheless. They have, for example, attended the Dayton Hamvention for many years.

[image: Inline image 4]

As such, the catalog is not a "ham radio" catalog, but if you build stuff at all you'll find something of interest in its 1,799 pages. It includes nearly any kind of electronic part that you might need.

The section that might you might want to start with is the "makerspace" section. In this section, you'll find Raspberry Pis, BeagleBones, and even

micro:bits. They really have everything, though, including passive and active components, connectors, cable, and enclosures.

Like I say, these catalogs are all about possibilities. You can search each company's website and find the parts they carry quickly and easily, but that experience is just not the same as browsing a print catalog and daydreaming about what you might find there.

So, get your own copies—they’re free—and page through them. I’d be surprised if you didn’t run across something that you didn’t know about before, and it gave you some ideas about your next amateur radio project.

From: Joe Sammartino
Topic: 4821 Message: 4821
Attachments: 2 described; binary payloads are missing from this source WARC

A wrong button push can easily result in unintended activation of the WIRES function (to the frustration of others listening to your transmission).

These two attached documents will instruct on the use and disabling of this feature on several Yaesu radio.

Regards,

Joe, N2QOJ

4822. Last Week's QCECG Training Net Topic - Interference

Yahoo group: Queen_Creek_Hams
Date: 2017-10-30 18:53:03 UTC
From: Joe Sammartino
Topic: 4822 Message: 4822

The notes are lifted from our friends at the AEN-MAR Net and has been edited by me for our members and our application.

Tonight’s Topic - Interference

Unintentional Interference

Unintentional interference is just that, interference caused by a station or object that does not mean to
cause interference. An open mic is actually unintentional interference. It can be natural or man-made.
Net Control Ask for Responses: What are some types of unintentional interference?

Possible answers:
• Intermod
• Electrical systems
• Alternator
• De-sense
• Packet or APRS
• Cross-band repeater
• Others?

If you hear ongoing interference on the Ocotillo Repeater or Queen Creek Repeater, please send an
interference report to N2QOJ.

Net Control: Tell Net Participants what an interference report is:
What's in an interference report?

It contains the some or all of the following information:

1. Interference Date:
2. Interference Time:
3. Minutes of Length:
4. Audio Recorded Minutes Available:
5. Repeater Site:
6. Output Frequency:
7. Input Frequency:
8. Strength of Interferer on the Repeater Input Frequency:
9. Type of Interference (carrier, music, etc):
10. Call Signs using the Repeater at the time of the interference:
11. Detailed Description of Interference:
12. Your Location when you heard the Interference (home or mobile):
13. Describe the Antenna and Receiver used when you heard the Interference:
14. Heading toward the interference heard on the Repeater Input

Frequency:
15. Details of the method used to obtain the Heading:
16. Your Comments and Suspicions:
17. Your Name:
18. Phone:
19. Your Call:
20. Email:

If you have the ability to record, that helps. If you have a directional antenna and can determine where a signal's coming from, that also helps. Note the time the interference starts and when it ends.

Net Control: Ask if there are any questions about any of the fields in an interference report?

INTENTIONAL INTERFERENCE

So let’s move on to what is probably the most aggravating interference, Intentional Interference - also called jammers.
Intentional interference can be very short lived by someone creating an open mic, making noises such as DTMF tones for a few minutes and then moving on.
The other type can be long term caused by someone mad and taking it out on the Net and his fellow hams, or purposeful combat jammers who want to prevent communications during a military operation or terrorist attack.
This type of interference is rare but can hurt especially in the time of an emergency.

How do we deal with intentional interference?

Net Control: Ask for any station with an idea, please come now with your call sign.

Possible answers

1. Do not attempt to talk to, or at the jammer. Ignore it as much as possible. Stay calm, cool, and professional.
2. Over-ride the jammer with their more powerful signals. Hopefully, one of those stations is Net Control.
3. Change frequency. (Use pre-arranged channel designators. Don't ever give out the numbers on air.)
4. Learn to differentiate an accidental double from malicious interference. Sometimes it's hard to tell, but there is a rhythm to a net – if someone transmits only on top of another station, or only after another station starts transmitting, and doesn't respond to a call back for “the other station in the double” then it may be malicious.

We need to be aware of the location of our microphones and PTT Buttons on our radios. We’ve also learned that having your time out timer set on all of your radios can help limit the interference to a shorter period of time, and if you have the option, setting it to beep might save you the embarrassment of having another ham walk up to you to tell you your radio

has been transmitting.

Also, it’s important to know the nuances of your equipment including how microphones plug into your radios and how power drops affect your radios ability to stop transmitting.

Don't forget that stuck mics can reveal the true you to the world. So when you're acting as a communicator, stay clean and professional even when you don't think the transmit button is down.

When interference happens, you need to be able to think on your feet and be adaptable. That might mean a change in power output, location or frequency. Solve your own problem if you can, and help a fellow ham solve theirs. If it's beyond you, let Net Control take the lead.

When it comes to malicious interference, the key is to stay calm and ignore the interference. Your reacting to his or her interference only encourages it. Instead, turn the tables on jammers and use them to become a better communicator.
These rules apply in both your day-to-day contacts with other amateur radio operators as well as any Nets that you may be involved in. If it is in a Net situation, think of ways to get around the situation including changing power output and even to an alternate Net frequency.

But, ultimately follow the lead of your Net Control.

And above all….Know your radio.

4825. ☢ Let's Talk Simplex ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-10-31 18:17:32 UTC
From: Joe Sammartino
Topic: 4825 Message: 4825

Hi Folks,Good Article by Don, N4UJW at Hamuniverse.comRegards, Joe - N2QOJ☢☢☢☢☢☢☢☢☢☢☢☢

*Common VHF/UHF FM Simplex FrequenciesBY N4UJWSimplex Operation and Frequencies for U.S. ham bands above 50Mhz. This article will give you the suggested and recommended simplex frequencies that are set aside for simplex operation and should help you understand how to operate simplex on the upper ham bandsIf you are new to the ham bands and especially to the VHF and higher frequencies, you no doubt may love to try your luck with simplex operating. Using simplex is really simple and it is nothing more than two ham stations using mobile or hand held radio transceivers to communicate on the same frequency without a repeater re-transmitting your signals. If you understand the operation of repeaters <http://www.hamuniverse.com/repeater.html>, then you will understand that using repeaters when you are close enough for simplex operation with good signals would only tie up the repeater for others that may not be able to use simplex.So how do you know if you can use simplex with a station you are hearing?One good method of knowing if you could contact a particular station directly using simplex would be to listen to the repeater's input frequency that he is using. If you can hear the station well (when your receiver is tuned to it's input frequency), then you are close enough to use simplex with that particular station at that point in time! The station you are listening to is transmitting directly to your antenna and also to the input frequency that the repeater is tuned to. It may either be a mobile from his vehicle or sitting back in his favorite chair at home or wherever he may be. If he is mobile, then his signal may be getting stronger or weaker as time passes depending on which direction from you he is traveling. An HT (hand held) transceiver will usually be the same signal strength all of the time if the operator is not moving around, and likewise, a mobile signal will tend to vary if the mobile is moving but usually will not vary if it is stationary.So now is the time to contact the particular station you want to talk to by using the repeater to see if you and he/she can "go simplex" and give it a try! Get on the repeater while the station is still on and use common repeater procedures and make a schedule (sked) with the other station. Be sure that both you and the other station pick the same exact simplex frequency. See the chart below. Others who hear you make the (sked) may also want to join in with the fun. You may be surprised at how many stations were just waiting for the opportunity to "go simplex" and many may join in with you! Here again, is another chance to make "sked" with them.Choose a simplex frequency for the band you want to use from the chart and have fun! Common VHF/UHF FM Simplex Frequencies2-Meter Band146.52*146.535146.55146.565146.58146.595147.42147.435147.45147.465147.48147.495147.51147.525147.54147.555147.57147.585*
National

simplex frequency1.25-Meter Band223.42223.44223.46223.48223.50*223.5270-cm Band446.0*33-cm Band906.5*23-cm Band1294.0001294.0251294.500*Every 25 kHz to 1295* National simplex frequencyNote that the "National Simplex Frequencies in RED are also know as the Calling Frequency. Monitor it often and make your calls there but move to another simplex frequency if possible to keep it open for use by others wishing to make simplex contacts. This frequency is often used when mobile on long trips in unknown repeater coverage areas.Notes**! See the ARRL BAND PLAN <http://www.arrl.org/band-plan-1>for more detailed info when using bands above 1.25 meters!They can be very congested and may be used by other services!Continued from above.....When using simplex, both station's antenna height, power output, type of antenna, other factors and terrain between both stations will have a great deal to to with how strong the signals are on your radio and how he would hear you if at all.Radio transmissions at these frequencies are usually limited to "line of sight" between station antennas. Line of sight simply means that there is a "radio horizon" from your antenna stretching out to the earth's horizon or other structures which normally blocks or attenuates the radio signals. An analogy would be if you imagine your radio signal as a light beam reaching out to the other station's antenna, so anything in the way of your "light beam" would tend to block or shield it from the other station' antenna and vice versa. Some factors involved in the blocking, or attenuating the signals are tall buildings with lots of metal in them, high hills, mountains, local "ground clutter" near you with a combination of everything mentioned above.Antenna Height above average terrain means everything!!!Overcoming many of the obstructions mentioned above, that reduce your signal strength to the receiving station, can be a simple or major problem. One of the most important things you can do to help increase your "range" and extend the "radio horizon" is to increase your antenna height above average terrain within your station limits. Much depends on whether or not you want to go to the extra expense of increasing that height by mounting your transmitter's antenna up as high as feasible.An example of using various "line of site to the horizon" calculators will enable you to see how additional antenna height should add to your station's range. We used the KD4SAI line of sight calculator <http://www.qsl.net/kd4sai/distance.html> for the examples below.You can see more line of sight calculators and an explanation of line of sight to the horizon as used in VHF/UHF radio operation here. <http://www.hamuniverse.com/lineofsightcalculator.html>Note: These examples below assume ONLY height change and take into account no other factors involved to change the amount of power getting to the transmitting antenna nor have there been any changes to the receive antenna unless specified. (Note that increasing height will mean the adding of additional losses involved with adding longer coax so the numbers below will not be exact in real life.)Examples:"Antenna height is above ground (flat terrain)." Using station "A" and station "B"1. Antenna height for each station: 6 feet. Line of sight to horizon for each station's line of sight = 3 milesBoth stations A and B line of sight between each other = 6 miles. So within 6 miles of each other, communications should be possible.2. Antenna height increased to 12 feet by each station A and B = 5

miles for each stationTotal line of sight =10 miles between the two stations. So within 10 miles of each other, communications should be possible.3. Both stations increase their height to 50 feet = 10 mile line of sight for each stationTotal line of sight between stations = 20 miles. If the stations are within 20 miles of each other, communications should be possible.Now using the same calculation with no changes in either station other then height of one station:4. Station A remains at 6 feet.Station B uses 50 feet....total range between stations = 13 miles. So if each station is within 13 miles from the other...you guessed it, they should be able to communicate.5. Now for a repeater and an HT at 6 feet example, (hand held radio) with a repeater at 1000 feet on the other end:HT line of sight to the horizon = 3 milesRepeater line of sight to horizon = 48 miles!So you can see by this last example above that you stand a much better chance of getting into a repeater that has a very tall antenna or is on a tall building or mountain, hill, etc! In the example, the repeater can "see" much farther than you can and "sees" not only your station but well beyond you! Now substitute the repeater height for an HT on top of a 1000 foot mountain....same line of sight!One more EXTREME example that is out of this world.Assume an HT in the International Space Station (ISS) next to a window facing the Earth with no obstructions!It's line of sight at 200 miles (1,056,000 feet) above the Earth would be about 1,456 MILES!Now how's that for a line of sight distance using simplex??Antenna types, power levels and other info for working simplex:If you are really excited by now to "work" simplex, then here are some good suggestions that may help you get the most out of your station.1. Use very low loss coaxial feed line....the lowest loss per foot you can afford. This will get the maximum amount of power from your radio to your antenna. At these higher frequencies, coaxial cable attenuates rf more rapidly and drastically than lower HF frequencies. An example using RG-58 type coax on 10Mhz vs 400Mhz increases loss by about 10db per hundred feet! 2. Use a high gain outside antenna if at all possible. The "rubber duck" antenna on your HT as if comes from the factory actually is a poor excuse to tack the word "antenna" on! Use a minimum of a 3 element Yagi or try a Slim Jim style antenna. Most Yagi's and verticals can be homebrewed <http://www.hamuniverse.com/antennas.html>with lots of savings in money. Using vertical or Yagi type antennas with 6dbd gain or more will certainly improve your results. If you use a Yagi type antenna, you will want to use a rotor with it so you can try different directions.3. Get those antennas HIGH up in the air. Rooftop or tower installations are the best if you can get them up there. Even the very tops of trees can be used in a pinch but be careful in the climb. Don't forget that by adding coax to the total length needed may not give you much if any advantage. This all depends on the loss of the coax per foot vs the old installation and the overall length of the distance from the transmitter to the antenna. You are looking for the most ERP, effective radiated power, possible at the antenna. See this link for more on ERP, db loss, gain, etc and how to figure any advantage of going higher. <http://www.hamuniverse.com/coaxdata.html>4. Be patient! Using simplex for making random uscheduled contacts is a lot like fishing!5. Understand that Mother Nature may not let you make DX contacts unless she is "in the mood"!

The SSB mode can be very helpful with DX'ing but you need to use horizontal polarity as a usual method. Many marginal contacts using regular FM can be enhanced by both stations use of SSB.6. When using a handheld (HT) at these frequencies, you can sometimes improve your results by moving horizontally a few feet or sometimes just a few inches. This is due to "shadowing" or shielding of objects between you and the other station. Try tilting your handheld radio one way or the other from vertical. It is best if both stations use the same position for their antennas relative to the ground. In other words, if your antenna is at 45 degrees relative to the ground when transmitting, then the station on the other end should be the same. Experiment with the position of the antenna on both ends of the conversation for best results. Try increasing your range by adding the "missing" part of your HT antenna! One simple method of increasing your HT range and performance is to add a "pigtail" or missing part of the antenna to the "rubber duck". Just attach the wire hanging down from the metal connector base of the HF antenna where it attaches to the radio. See this link for more info <http://www.hamuniverse.com/htantennamod.html>. For 2 meter operation, about 19 to 20 inches should do it. It will really improve your signal in most cases!7. Remember to stay off of the repeater input frequencies when using simplex. You may be keying them up and creating interference to many others and you will never know it when operating simplex unless someone hears your call sign and abruptly lets you know about it!!!Have fun and encourage others to use simplex whenever possible. 73, Don N4UJW*

4826. Gathering of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-11-01 16:50:38 UTC
From: Joe Sammartino
Topic: 4687 Message: 4826

Greetings All,

Happy Halloween to all. I hope this finds all in good spirits and hope that you are enjoying the cooler weather. I know that I'm really enjoying the cooler temperatures and have been getting out some evenings and doing a little more portable operating from my front porch.

EVQRP will be hosting another Gathering this coming Friday evening. We will meet at Desert Mountain Park @ 17:00 hrs at the Cottonwood Ramada. The Ramada is located in the rear of the park just east of the baseball fields and southeast of the restroom building. We will set up our usual stations on different modes and will put up different antennas. We usually go until around 21:30 hrs.

Location: http://tinyurl.com/gotw11317

Last week everyone that showed up had a great time. We had 2 stations set up and made plenty of contacts were made. Rick (W9JRF) set up his FT-817 and his buddipole vertical on 20m and made at least 7-8 contacts. Some of his contacts were Hawaii, Russia, and several which were state side. Christi (KG7NAD) had her FT-897 and her SOTABEAMS linked dipole set up on 40m and she also made several DX contacts.She put 3 new countries in her log, Russia, Jamaica and Canada. Troy (K7TJK) showed up late from work and brought his Short Wave Radio along and was spotting for Rick and Christi since his radio does have the Amateur bands in it. I didn't set up, I was trying to setup my buddipole in a different configuration but couldn't get it to tune up so I watched Rick, Christi and Troy make several contacts. I did make a contact with Jamaica using Christi's radio and was pleased that I could log another new country. Last week was the CQ Worldwide DX contest so there were plenty of stations on all weekend to make contacts with. Everyone had a great time and we had plenty of great fellowship.

I hope to see everyone on Friday evening at the park. We encourage everyone with a portable station to bring it along and set up. For those that do not have a portable station there are plenty of stations set up for you to use. I will also have my testing material with me so if you would like to up grade or know someone that is looking for a testing session pass along the info to them. I hope everyone has a great week and a safe Halloween. Remember to stay radioactive.

Posted for K7ZAE and AB7JF by Joe, N2QOJ

My name is Heidi Brewer (K7ZAE.)

I have been contacted by Rita Walker, who is the wife of Val Walker (N0QW) with the prospect of assisting her in selling her husband's ham equipment. Val Walker (N0QW) has been admitted into a care center, and it is not expected that he will recover to use ham radio again. I have been working with her, some family friends, and a few other hams to catalog and price her husband's collections. They gave me your name to contact as it was their expressed wish that your DXCC group with CADX.com was given one of the first opportunities to make any offers.

According to their wishes, we are offering these items for sale first to some hams in his church as well as to your DX contesting group of which Val was an active participant. After the initial offering, we will be opening up the offer to other hams in the East Valley. Around next Wednesday, there will be a posting on Craigslist for the remaining items...which will be sold at a garage sale at the Walker's home (6505 E. Quartz, Mesa, AZ 85215) on next Friday
and Saturday (November 10th and 11th.) We are planning on selling whatever is left over at the Superstition Hamfest in the beginning of December. We are dealing in cash only.

Please share this list with your group.

If you have any questions, or if you would like to make an offer, please call or text me, Heidi Brewer (K7ZAE) at 480-720-2708 <(480)%20720-2708>, or call or text Fred Bollinger (AB7JF) at 480-242-8606 <(480)%20242-8606>.

All proceeds from this sale are going directly to Rita and Val Walker.

Here is the list of what is up for sale (see also as an attachment):

Radios

Flex 5000 with PC tower and loaded software ($1500)

Icom 756 PRO 2 with Icom power supply ($1000)

Heathkit SB-102 radio with speaker ($300)

RadioShack 2155 CB radio ($15)

Realistic TRC-421 CB radio ($15)

2 other RadioShack CB radios ($15 each)

Other Ham Shack Equipment

Magnadyne 4 amp power supply ($10)

Heathkit signal generator 1G102 ($15)

MFJ-1116 DC power outlet ($15)

Homemade CW keyer ($5 OBO)

Heathkit 1426 field strength meter ($20)

Heathkit HM102 SWR bridge ($50)

Heathkit HM2102 SWR bridge ($50)

MFJ 949E tuner ($100)

Alinco DM 330MV ($100)

Diamond SX-200 meter ($50)

Daiwa CN-103L meter ($50)

Bencher key ($100)

Kantronics KAM 98 radio modem ($100)

Palstar AT-AUTO antenna tuner ($850)

MFJ-260C 300 watt dummy load ($20)

MFJ 4225MV power supply ($40)

Heil GM4 dynamic microphone ($80)

MFJ 1272BYV microphone/TNC switch ($20)

Belken AB switch ($20)

Rigblaster Plus – audio in and out ($50)

Ameritron ARB 704 audio switch box ($20)

Daiwa 2-way switches (2) – ($5 each)

LDG DTS-6 antenna switch ($75)

HP Oscilloscope ($100)

Rigblaster Pro ($100)

HP 6236B lab power supply ($20)

MFJ 1263 switch ($50)

Heathkit 1B-102 frequency scaler ($25)

Heathkit multimeter 1M-2202 ($20)

Heathkit IM-4100 ($40)

RadioShack SWR bridge ($10)

Antennas, Rotors, Etc.

Cushcraft A627013S tri-band (6m/2m/70cm) yagi antenna ($100)

Cushcraft X7 20-15-10m yagi with Yaesu G-100DXA rotor ($1000)

Cushcraft X740 (40m add-on for the Cushcraft X7) ($150)

Hustler 6-BT-V trap vertical antenna ($100)

Hustler 4-BT-V trap vertical antenna ($80)

Comet GP-15 tri-band (6m/2m/70cm) vertical base antenna ($100)

Comet GP-3 dual-band (2m/70 cm) vertical base antenna ($100)

Comet CP-5m mount ($20)

Centaur B11W 10-50 dipole (balun) ($150)

balun ($100)

NMO mobile antenna ($50)

Thomas Shelby & Co. BX tower (free if you take it down)

Yaesu G-100DXA rotor (new in the box) ($525)

Anderson PowerPole crimper and assorted PowerPole connectors ($35)

assorted coax, jumper & patch cables (make offer on individual pieces or groups)

Computers and Computer Peripherals

APC 1300 watt UPS ($100)

HP CM1312nfi color laser printer plus 2 toner cartridges ($200)

Creative Sound Blaster sound card ($20)

HP f1703 monitors (2) ($25 each)

General Tools

Helios caliper ($20)

Black & Decker power saw ($30)

multi-tool kit in grey case ($15 OBO)

JC Penny soldering gun in case – 150 W ($20)

Black & Decker power drill with bits ($40)

vice grip (2- $2 OBO)

Weller soldering iron station ($30)

assorted power strips (make offer)

Sperry-DM-350A multimeter ($5 OBO)

RadioShack Autorange dial multimeter ($5 OBO)

HP E2377A mulitmeter ($40 OBO)

assorted blue nut drivers ($10)

project box (make offer)

stud finder ($2)

laser level ($2)

hole punches ($15 each)

Misc.

MFJ Clocks (2) – ($5 each)

DYMO label writers (2 - $25 each)

hole punch ($2)

CQ and QST magazines (10 cents each)

Books ($5 each)

shack benches (make offer)

Escort radar detector (no power cord - $5 OBO)

4832. ☢ Palo Verde Siren Test - November 8th ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-11-04 18:08:53 UTC
From: Joe Sammartino
Topic: 4832 Message: 4832

Attention!

The Palo Verde siren test is coming up soon.
https://ein.az.gov/emergency-information/emergency-bulletin/notice-about-annual-testing-nuclear-plant-emergency-siren?utm_source=dlvr.it&utm_medium=tw
"... On Wednesday, November 8, emergency sirens will sound briefly around the Palo Verde nuclear plant but there's no cause for alarm. Palo Verde Generating Station, in cooperation with local and State agencies, is conducting federal-required testing. 58 outdoor warning sirens located within the 10-mile emergency planning zone of the nuclear generating station will be tested during the lunch hour...."

The annual testing will activate the sirens twice, once at noon and again at 12:30 p.m., to ensure they function properly. Volunteers from the West Valley Amateur Radio Club, the Tri-City Amateur Radio Club, Arizona Amateur Radio Emergency Service (ARES) and other unaffiliated ham operators will be stationed at each siren and immediately report siren activation to emergency managers.

4833. Tonight's QCECG Training Net

Yahoo group: Queen_Creek_Hams

☢ Volunteers Needed - QC Holiday Festival and Parade, Saturday, December 2 ☢

We need volunteers!

This is one of the best events of the year for demonstration of our support for the Town of Queen Creek.

Event info here: http://www.queencreekparade.org/index.html

The public hours are 12 PM til 7 PM.

We typically need to support from 11 AM till about 8 PM and will break up the event into 2 shifts.

More details to come but for now, please check your calendars and volunteer if you can. We need about 20 volunteers for this event.

Send your response to N2QOJ at jsammartino@gmail.com.

Regards,

Joe, N2QOJ

Some of you may be familiar with the ARRL's QST column, "The Doctor is In".

*The Doctor is none other than ARRL's Joel Hallas, **W1**ZR**, who has been **answering questions about Amateur R**adio in QST's "The Doctor is In" column since 2006.[image: Doctor_is_In_Podcast_Icon_2.jpg] <http://www.arrl.org/images/view//News_/Doctor_is_In_Podcast_Icon_2.jpg>*

*Hosted by QST Editor In Chief **Steve Ford, WB8IMY, the ARRL The Doctor is In podcast is a twice-monthly audio podcast that answers YOUR questions about Amateur Radio's technical challenges.*

*I will be making a selected podcast each week and this **first week's topic is "QRP".*

Download (or stream) the mp3 from these links:

STREAM:
https://www.dropbox.com/s/w693njpbaui7km4/October_26_-_QRP.mp3?dl=0

Download:
https://www.dropbox.com/s/w693njpbaui7km4/October_26_-_QRP.mp3?dl=1

The length in time of these podcast usually ranges from 15 to 25 minutes.

Please let me know if you have any difficulty accessing this content.

I do welcome feedback. I would like to know if this podcast feature is of any value to our members.

Regards,

Joe, N2QOJ

4838. Gathering of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-11-06 14:43:29 UTC
From: Joe Sammartino
Topic: 4687 Message: 4838

Greetings All,

EVQRP will be hosting another Gathering In the Park Tuesday November 7th @ Desert Mountain Park @ the Cottonwood Ramada. We will meet from 17:00 hrs until around 21:30 hrs. We will set up various antennas and a number of portable
stations on different modes (Phone, Digital, CW). Please feel free to bring your portable station and set up and play radio with us. It's not a contest, it's about getting your equipment out, setting up and becoming proficient with it. If your are working on building a portable antenna and need to tune it or put it on the, bring it along we check it out with an antenna analyzer to see where it is resonant.

Last night (Friday) we had Kevin (K9NTZ) and his wife join us. Kevin has a house in San Tan Valley and is still working and living in Indiana. He is due to retire in about a year and a half and then will move to Arizona full time. Kevin has a pretty extensive background in RACES and emergency communications. We had a nice visit with Kevin and his wife and really enjoyed their company. We look forward to Kevin joining us when he is here visiting his wife and eventually when he retires.

We also held a test session last night (Friday) for Jason. He took the Technician
test and passed with flying colors. CONGRATULATIONS Jayson. He plans on studying and eventually upgrading to General then to Amateur Extra.

Last night (Friday) not very many contacts were made. After the test session Rick (W9JRF) set up his FT-817 with his 45 watt amp on 40m. He made a stateside contact to his home state of Indiana then passed the mic to Kevin who also made a contact to his home state Indiana as well. Christi (KG7NAD) set up her FT-897 and her Sotsbeams linked dipole on 40m as well. After Kevin and his wife left Rick made a contact to South Africa on his station running 45 watts.

After Rick was finished with his QSO Christi made a contact to South Africa with the some person and she was running 45 watts, she then handed me her mic and I also made the same contact with South Africa. We got Troy (K7TJK) on the mic an just as he was trying to make the contact, the band changed and South Africa was gone, just that quick. Sorry Troy. All in all we had a good time meeting 3 new people and had some great fellowship with everyone that came out. I always look forward to the night we do our Gatherings and I do learn from each event.

I hope to see you all on Tuesday night @ 17:00 hrs at the Cottonwood Ramada. I will have my testing material if you know someone that wants to take a test or wants to upgrade. We will also be offering a testing session

at the monthly QCECG meeting on Thursday November 9th @ 19:00 hrs at Queen Creek Town Hall. Have a great week and please stay radioactive.

Dave AC7FF

4839. Re: Tonight's QCECG Training Net

Yahoo group: Queen_Creek_Hams

From: Joe Sammartino
Topic: 4833 Message: 4839
Attachments: 1 described; binary payloads are missing from this source WARC

Thanks to all that participated on Sunday's QCECG Training Net.

Attached are the notes on Alternate Power as discussed by Christi, KG7NAD, Net Control.

(also attached as a pdf file)

Tonight's topic is "ALTERNATIVE HOME POWER".

Tonight we want to find out how to power equipment in our homes during an extended outage or emergency. We're talking about life after the grid goes down. What is your "Plan B"?

I will be asking what types of alternative home power sources you have had experience with, how you keep these sources maintained and ready for quick deployment, and how easy it is for others to acquire the equipment so they can have the same or similar capabilities.

Alternate Power is a necessary topic for anyone involved in emergency communications. Knowledge of alternate power is valuable in base, portable, and mobile scenarios.

After check-ins, as I call you, say your name, town, and what alternative power source(s) you have experience with. You do not have to have these sources available. I need to know if you have experience with an alternative power source.

Net Control Notes:

[Call on those that reported experience with alternative power. Find out the type(s) of alternative power used and how the set-up worked. Lead discussion on each type. Continue as long as there is time and new information is forth coming.]

· What might we need alternative power for? [Freezer, refrigerator, air conditioner, fans, entertainment gear, computers, garage door opener, microwave oven, electric range, water heater, medical equipment, etc. Radio may be the last thing on your priority list.]

· What alternative power sources can you think of? [Solar, Wind, Hydro, Muscle]

· What are the advantages and disadvantages of each?

· What do you need to take advantage of each of these power sources? [fuel, power adapters, converters, inverters, etc.]

· What extra benefits might you gain from some of these power sources? [Generator supports lights and appliances. Solar panel can shade other equipment.]

· How do you size a solar panel? [Based on charge rate, which is based on battery size.]

· What happens when a solar panel becomes partially shaded? [Power drops off dramatically.]

Ask if there are any other comments or questions on ALTERNATIVE POWER SOURCES before proceeding to closing comments.

Net Control Closing Remark Concerning Tonight’s Topic:

When the power goes out, ham radio may be the last thing you have to worry about. Tonight we discussed our dependence on AC power and other ways to power our homes and maintain comfort levels. With a little ingenuity and preparation you can be ready when the plug gets pulled.

4840. ☢ QCECG Meeting, Thursday, November 9th, 7 pm - 19 00 Hours ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-11-07 16:59:39 UTC
From: Joe Sammartino
Topic: 4840 Message: 4840

Agenda: Remember, our meetings are open to all amateur radio operators and those with an interest in radio communications!

Radio Test Demonstration and check ups:

Doug, WB7TUJ, has graciously accepted our invitation to demonstrate radio rf and audio testing. Bring your HT and mobile radio to get checked out for RF power, audio quality, deviation and whatever else Doug has in mind.

You will get a practical explanation AND demonstration of effective rf output, noise level, audio bandwidth, modulation, over-modulation, deviation, and more. Plus, you will be able to have your personal radio(s) characterized.

Don't miss this opportunity. Most hams just read about this stuff.

QCECG update:

We will have a short discussion about QCECG activities.

License Exams:

Dave, AC7FF, will have his VE Test Kit and can administer Technician, General, and Amateur Extra exams. Please share this with your ham wannabe friends.

Where and When:

QCECG meets at Queen Creek Town Hall: 22350 S Ellsworth Road
<https://www.google.com/maps/place/22350+S+Ellsworth+Rd,+Queen+Creek,+AZ+85142/@33.2447394,-111.6354965,127m/data=!3m1!1e3!4m12!1m6!3m5!1s0x872a4d16782e63cf:0x4ffc7ac6fe4a6801!2sQueen+Creek+Street+Maintenance!8m2!3d33.2447394!4d-111.634948!3m4!1s0x872a4d1667220b8b:0x5e744986ffa8b0a3!8m2!3d33.2447394!4d-111.634948?hl=en>,
Queen Creek, AZ 85142, enter through the South door.

When: 7:00 PM to 9:00 PM.

Where: Founders Room at Town Hall Queen Creek. This is the former church building, where the town council now meets.

It's directly across Ellsworth from former Fire Station #1..Contact N2QOJ, KF7RYX, and K7RWE, at qcecgaz@gmail.com with questions.

4847. Gathering Of the Willing this coming Tuesday

Yahoo group: Queen_Creek_Hams
Date: 2017-11-12 08:02:35 UTC
From: Joe Sammartino
Topic: 4847 Message: 4847

Greetings All,

Happy Veterans to all that served in the military. I hope everyone is having a great weekend.

EVQRP is hosting another Gathering Of the Willing this coming Tuesday evening. We meet at Desert Mountain Park @ the Cottonwood Ramada. We start gathering around 17:00 hrs and go until around 21:30 hrs. We usually set up 3-4 stations using different mode (Phone, CW and Digital) on the hf bands. Also, we set up different portable antennas ranging from Buddipoles to linked dipole. We encourage everyone with a portable station to bring it out to the park and set up and play radio with us.

Last weeks Gathering brought us a new visitor. Richard (N7HX) joined us last week. Richard made a contact a couple of months ago with Jay (N1RWY) when Jay was building and testing his ethernet antenna. Richard and his wife spend their summers in Oregon then relocate to Gilbert in the winter months. Richard told me that he has been a ham operator for 50 years and has never done portable operating. I would like to welcome Richard and hope that we are able to introduce him to operating outdoors from a portable location. We also did a testing session at the park for 1 person. Kim Post took his technician teat and passed with flying colors. Congratulations Kim, good job and hope to see you at a couple of our events and when you are ready to upgrade to General. We had several stations set up and with band conditions not the greatest I made 1 contact by CW to a gentleman in Texas. There was lots of QSB so it was a short QSO but we were able to make the QSO. I believe Rick made a couple of contacts as well on SSB.

I will not be at this coming Gathering, I am taking a very close friend of mine camping, however, Christi (KG7NAD), Troy (K7TJK) and Rick (W9JRF) will continue without me. I will be camping near Picacho Peak and we're going to try and make a contact. Rick is going to set up his Buddipole in the NVIS (Near Vertical Incidence Skywave) configuration and I'm going to do the same from my location as well. I should be roughly about 60-65 miles away. Hopefully we will be able to make a contact on 40m. If you ever wondered about how to setup an NVIS antenna or have never seen it used, this would be a good event to attend and see how it is setup and works. It should be a great learning experience for all.

I hope that you can make it to the park on Tuesday evening. Have a great weekend and a safe week. Remember to stay radioactive.

Dave AC7FF

4848. ☢ RUSS, "Radio Under Sun Shade" - Also Known as "R adio in the Park" - RITP ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-11-12 21:49:03 UTC
From: Joe Sammartino
Topic: 4848 Message: 4848

RUSS, Radio Under Sun Shade - Also Known as "Radio in the Park" - RITP

What is it?* *Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz); if operating HF, 7.168 Mhz LSB (7.158 Mhz also)
- and replicate this recipe several times over in the Valley at the same time

What is the objective?

- Engage in as many contacts as possible across the Valley using a VHF simplex frequency of 146.460 Mhz while operating off grid power, If possible.

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 5 years and every one of them has been a tremendous success.

The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio while exercising emergency communications via simplex and off-grid.

Where and When? (Queen Creek and Mesa)

November 18th, From 10 AM (10:00) till 2 PM (14:00).

We have two local RUSS / RITP planned. Dennis, KF7RYX, will host his event at the ball field pavilion behind the Queen Creek West Stake Center (19730 East Ocotillo Road) located near the intersection (just West) of Hawes Road

and Ocotillo Road.

BONUS: VE Testing will be provided from 11 AM till 1 PM at the Queen Creek Location

If you are looking for an event to visit closer to Mesa, Doug, WB7TUJ, will host RUSS / RITP in Mesa at Emerald Park.

If you can't visit the sites, please check in via the frequencies listed above.

Here is a link to a map of both locations:

https://aprs.fi/#!call=a%2FRITP-RUSS%2Ca%2FRUSS-RITP&timerange=3600&tail=3600

Regards,

Joe, N2QOJ

4849. Mesa R U Prepared Presents "Wildlife Event Days at Sportsman's Warehouse"

Yahoo group: Queen_Creek_Hams
Date: 2017-11-12 22:04:15 UTC
From: Joe Sammartino
Topic: 4849 Message: 4849

Our friends at Mesa R U Prepared are featured in a big event. Here is their announcement:

Wildlife Event Days at Sportsman's Warehouse

· Saturday, November 18, 2017, 10:00 AM to 3:00 PM

· Sportsman's Warehouse, 19205 North 27th Avenue, Phoenix, AZ <https://www.google.com/maps/place/19205+N+27th+Ave,+Phoenix,+AZ+85027/@33.6613041,-112.1176021,17z/data=!3m1!4b1!4m5!3m4!1s0x872b6f170e01f0b9:0xd4d604ede3e8d427!8m2!3d33.6613041!4d-112.1154134>

· this will be an outdoor event in the parking lot

· Sportsman's Warehouse is hosting a Wildlife Event Day in their parking lot. This will include Adobe Mountain Fish and Game animal rescue will be here with animals, smoker demo, POF firearms inside and Chik -fil -a.

Our group will host a table and a live HAM radio station. Closer to the event we will look for volunteers to assist an hour or two at the table. We will also do some one on one training with the small handheld HAM radios during the day.

The hours I posted are not final, we will add info and update as the event progresses - looks like fun!!!

---------- Forwarded message ----------
From: <mike.j.pulley@...>
Date: Wed, Nov 8, 2017 at 3:58 PM
Subject: AEN-MAR: Disaster drill and portable ops exercise
To: jsammartino@...

We will hold a disaster drill in TWO parts over the next TWO Monday nights. It is finally cool enough. Join in!

Next Monday at 9pm, we start with the Kobayashi Maru, a simulation of the chaotic first half hour of an activation. The key is not to lose our nerve or patience. We win by working together.

Those who join in on that drill will have \"reserved seating\" for the second half of the drill the following Monday.

The next week, the Monday before Thanksgiving, we pick up from there and hold a Flash Drill: Portable Operations Exercise. Everyone who can, operate portable from your neighborhood school, church, park, or even your back yard. Those coming from the ARA meeting will receive roleplay instructions at the meeting.

The Flash Drill will begin at 8:30pm, earlier than normal. We\'ll hold an orientation training on the Metrolink repeaters starting at 8pm, too.

If you want a role to play in the Flash Drill -- either portable or from home -- reply to me at Mike.J.Pulley@... for role play instructions.

A drill in two parts. Why? Because we will exercise much more than the usual traffic handling. We will move through activation and volunteering, move to a Mobilization Net for deployment instructions, simulated deployments (the portable operations part), and then to a Demob Net for demobilization.

Those who have taken the ICS/NIMS training see where this is going.

4853. Finding Noise Source

Yahoo group: Queen_Creek_Hams
Date: 2017-11-13 04:01:07 UTC
From: Christi K Feldewerth
Topic: 4853 Message: 4853

Hey All,

I feel like I suddenly have a lot of noise on the HF bands. A loud piercing hum that stays all across the band. On 40m, my noise floor is S9 across the band. Would someone be able to tell me how to methodically start tracking down the source, if there is one? I have not changed antenna, antenna location, coax, radio, or power supply. I removed my laptop and turned off all lights and fans in the shack and none of that made a difference.

I appreciate any help you can offer.

Are you hearing it on any other band? 15M?

If so, try another radio also and verify it is on that one too.

Is it there if you disconnect antenna?

I am hearing it on 20m and 80m as well. I will try my 897. I will also try disconnecting the antenna. I didn’t realize I could turn on the radio without an antenna to see what happens. That is a great tip!

Thanks for the great place to start! I will report back tomorrow once I try those two tests.

Christi.
Any luck with the diagnosis?
Did you try a different radio with the same antenna connected as well as a different antenna and or NO antenna to see if you can HEAR the noise?
Is it only after a certain time, or all the time during the day?

All,

Here is what I have as of now. I am out here earlier today and I will pay close attention to times and any changes.

1. Zero noise with no antenna.
2. 897 has same S9 noise floor and noise as 3000
3. Noise floors as follows: 40m - S9; 20m - S5; 17m - S4; 15m - S1; 10m - S1
4. Al mentioned on our district net last night that he has a lot of noise on 40m. Maybe it is just a noisy band now?

Thanks for all the help. Another new learning experience!

Hello Christi,

I fear you are picking up the same power line noise that Jim (KF7E) has trouble with. The lines have a lot of bad insulators. Since he is just across the street from you, that is a likely source.

Dennis

Thanks, Dennis. I do have a power pole maybe 20 feet from my shack and antenna. It is an above ground line.

How does one go about determining that? I assume SRP requires evidence to do anything.

4861. RE: [Queen_Creek_Hams] Finding Noise Source

Yahoo group: Queen_Creek_Hams
Date: 2017-11-13 22:01:51 UTC
From: Dennis Lawrence
Topic: 4853 Message: 4861

Reporting it is the first step after you determine that is the problem. Just take a portable radio with little antenna on it and walk by the poles. If there is a bad one, you will know it pretty easily. Jim has been fighting this problem for a couple years. They fix one and another goes bad.

I would suggest talking to him the next chance you get.

Dennis

Subject: Re: [Queen_Creek_Hams] Finding Noise Source

Thanks, Dennis. I do have a power pole maybe 20 feet from my shack and antenna. It is an above ground line.

How does one go about determining that? I assume SRP requires evidence to do anything.

Hello Christi,

I fear you are picking up the same power line noise that Jim (KF7E) has trouble with. The lines have a lot of bad insulators. Since he is just across the street from you, that is a likely source.

Dennis

Subject: Re: [Queen_Creek_Hams] Finding Noise Source

All,

Here is what I have as of now. I am out here earlier today and I will pay close attention to times and any changes.

1. Zero noise with no antenna.

2. 897 has same S9 noise floor and noise as 3000

3. Noise floors as follows: 40m - S9; 20m - S5; 17m - S4; 15m - S1; 10m - S1

4. Al mentioned on our district net last night that he has a lot of noise on 40m. Maybe it is just a noisy band now?

Thanks for all the help. Another new learning experience!

Christi.

Any luck with the diagnosis?

Did you try a different radio with the same antenna connected as well as a different antenna and or NO antenna to see if you can HEAR the noise?

Is it only after a certain time, or all the time during the day?

Thanks, I will test out with my HT.

I will connect with Jim. I must of temporarily lost my mind thinking SRP would actually do something in a timely fashion.

I am assuming I can use the FM radio function on the HT to test or do I need to locate an actual AM/FM radio?

Borrow Dave's FT817 - plug in the rubber HT antenna to it, and put the mode in AM. Easy to work with..
Or you could walk aorund with your 897.. but a bit heavier..

;-)

☢ *International Space Station visible tonight *☢

Folks,

Good news! Another opportunity to spot the station tomorrow morning for 4 minutes. It will be at a very great height and should be an excellent viewing barring any cloud cover.

Time: Fri Nov 17 6:04 AM
Visible: 4 min
Max Height: 82°
*Appears: 16° above NW **(from 315 degrees)*
*Disappears: 28° above SE **(toward 135 degrees)*

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

If you are an amateur radio operator, listen in (or work) on these frequencies:

Voice and SSTV Downlink: 145.80 (Worldwide)
Voice Uplink: 144.49 for ITU Regions 2 and 3
VHF Packet Uplink and Downlink: 145.825 (Worldwide) - easiest to hear
UHF Packet Uplink and Downlink: 437.550
UHF/VHF Repeater Uplink: 437.80
UHF/VHF Repeater Downlink: 145.80

Regards,

Joe, N2QOJ

4872. Black Friday Items for Hams at Home Depot

Yahoo group: Queen_Creek_Hams
Date: 2017-11-23 19:26:41 UTC
From: Joe Sammartino
Topic: 4872 Message: 4872

Home Depot has some items that may be of interest to our ham friends:

<goog_900367612>
https://bestblackfriday.com/ads/home-depot-black-friday#ad_view

For example:

- tote box/bags $4.98
- Bag of assorted Spring clamps $4.88
- Folding Utility cart $49.00
- 12 X 12 Pop UP $49.00
- head lamps many
- extension cords
- 10 pack led flashlights and headsets with 30 aaa batteries $9.98
- multi tools
- 2 pack interlocking organizers $9.88

Here's the scoop:

Stores open at 6 AM.

You can buy these items online but its delayed online until 9 AM. They want you in the stores.

If you order successfully online for pick up at a store but then they don't have it, you may be entitled to a gift card. ASK

Enjoy,

Joe, N2QOJ

Don't know what model number is the new one you're asking about but I have a Baofeng UV 82. It's a 2m and 1.25m and it works well. I have a Nagoya NA-320Antenna on it.

Topic: 4880 Message: 4880

☢ Holiday Festival and Parade Details ☢

Hello Folks,

The parking will be similar to recent past events (Founders' Day). There are no buses. The event duration has also been shortened from 9 hours to 7 hours -- beginning at 12 PM and ending at 7 PM. We will need to be on station from 11:30 AM and till at least 7:30 PM.

The most demanding portion of this event for us is the initial staging, parade run, and de-mobilization of the floats as they reach the end of the parade route. It can be a lot of walking.

As the parade run and de-mobilization activity completes, the shift moves more to supporting of our recreation department contacts as they focus on the Festival activities which includes the carnival and live entertainment at the outdoor stage.

In the past, volunteers have supported the entire event, start-to-finish. This year, we can try to break it up a bit into (2) shifts based on the volunteer response. So far, we have only (8) volunteers.

Early shift - 11:30 AM to 3:30 PM
Late shift - 3:30 AM to 7:30 PM

Volunteers need to report on site at the QC library no later than 11:30 AM. Give yourself time to park. Check in with Net Control on your arrival. Net Control will be setup just outside the Southeast doors of the Rec Department/Library (near the shrubs!) unless the Town provides a booth.

Bring your HT, extra battery, water, snacks, a jacket (it may be cold). The Town usually provides some form of dinner or snacks for the volunteers.

Here's the volunteer list so far:

Joe, N2QOJ, 480.381.2993 <(480)%20381-2993>
Dennis, KF7RYX, 602.510.3838 <(602)%20510-3838>
Janet Cooper, KF7SLQ - 2nd shift
Ron Earl - 2nd shift
Colleen Earl - 2nd shift
Andres Barreto, KF7RTV- 1st shift
Kristy Barreto, KF7RTW - 1st shift
Brad Young - 2nd shift

If by some chance you have already volunteered and not on this list, please remind me asap. I tally up the volunteers by counting email responses so if you had notified me in some other way, I may have overlooked you.

*We need a lot more volunteers to meet our commitment to the Town. Please send me an email directly at jsammartino@...
<jsammartino@...> if you can volunteer.*

Questions? Comments? Contact me without delay.

Joe, N2QOJ

4881. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-11-30 17:38:57 UTC
From: Joe Sammartino
Topic: 4254 Message: 4881

Good Morning All,

I hope everyone had a fantastic Thanksgiving day and you got to spend some quality time with family and friends. I also hope you got your fill of all thefood that comes with the holiday as well.

EVQRP will be hosting another Gathering this coming Friday evening. We will meet at the Cottonwood Ramada at 17:00 hrs and go until about 21:30hrs. The Cottonwood
Ramada is located East of the baseball field and just Southeast of the restroom building.

http://tinyurl.com/gotw11317
<https://l.facebook.com/l.php?u=http%3A%2F%2Ftinyurl.com%2Fgotw11317&h=ATNTWlA3XsmPQPpyA7Mn2oQCbIwLr7wP1sIAfbpNW3RQZsracml2CD5N-9zJP7fsjQQNSWOgGrxNf4XYc4W8MTiNV7ZmSxhWl4FFT9YskM6aXLDebGf9j5MlQY8MqmojdnTZ047BKHGtbjxbr3N2Hklr2fXB9S-JqQndZurJ7nz1lsOi9MvY-CWIm76Qtbty-pbQRNvDgaOHFY56bAuZPDXwlvDY82r_GdMONwVwjInhlhJPTDwCf0sQcirrpHegpz70nVOBRWv3s7I8YlcjzvDtKgF0aRXk8_C34bGrKHxC0BrmShbokcE4IH7W_DY>

We will set up our usual stations on different modes (Phone, Digital and CW) along with different antennas.

Not much to report on from last week. We experimented with a buddipole vertical configuration on 40m last week. We put together 4-22" arms along with 2 11" arms and a coil and a rigid shock cord whip which measures at 213". We got it to tune but unsure how effective it was. Saying that, I made no contacts with it set up that way. Richard from Gilbert joined us for the evening. He has a new portable, an ICOM ID 51a that he was playing with and figuring out the different features it has. Richard, I will bring your flashlight this coming Friday to the Gathering.

I want to wish everyone a safe and happy holiday season. I will be offering another testing session at our monthly QCECG meeting on Dec.14th. If you know someone that wants to test before Christmas or know of anyone that wants to up grade have them contact me by email. I hope to see you all on Friday evening at Desert Mountain Park. Have a great week and remember to stay radioactive.

Dave AC7FF

Hello Joe & the group,

I have an original ID-51A, an ID-51A Anniversary and an ID-51A PLUS2, so you can probably guess that I'm a fan of this platform. I use my ID-51A at S-Low power (10mW) with an HM-75LS speaker/mic, going out through a Diamond X510, when checking in to or calling the Mercury net. So I'd be willing to help improve Richard's level of comfort with his ID-51A, if he'd like, and I have a very comprehensive and well organized programming file I'd be willing to share. I use RT Systems programmers for most all of my many xcvr's, but they can export to a .cvs or .tab file type.

I'd like to make it to one of these Gathering events sometime, but what seems to be a normal start time is very close to my put my head on the pillow time. Maybe an earlier on a weekend day or RUSS event?

I found a used one on the website of the store I buy toroids and other electronic stuff from.
I'm not sure I can post the link here so I won't unless I get an OK to do so.
Anyway it's a chrome one and it appears to be in fine condition although it's missing the cable clamp underneath the base. It's selling for $75.00 which is a great deal on a >$200.00 key.
It's not mine and I have no interest in the selling of it.

Join us for the 35th annual Queen Creek Festival & Parade on Saturday, December 2, 2017. The Festival & Parade is hosted by the Kiwanis Club of Queen Creek and the Queen Creek Chamber of Commerce. Whether you are an event participant or attendee, you are sure to have a great time and benefit two amazing local organizations.

The festival begins at 12:00 pm and the parade starts at 3:30 p.m. The parade will run north on Old Ellsworth Road and will end at the Recreation Annex/Library where attendees will continue to enjoy the fabulous holiday festival until 7:00 p.m. Attendees will enjoy craft vendors, food vendors, live local entertainment, activities, photos with Santa and so much more. Be sure to stay for the Tree Lighting Ceremony in the Library area at 6:00 p.m.

The Queen Creek Emergency Communications Group will be Providing tactical communications for this event.

4894. Gathering Of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-12-05 16:30:53 UTC
From: Joe Sammartino
Topic: 4254 Message: 4894

Good Morning All,

I hope everyone is having the start of a great week and your getting your holiday shopping done. Its hard to believe that Christmas will be here in 3 weeks from yesterday.

EVQRP will be hosting another Gathering this coming Friday evening. We will meet at Desert Mountain Park at the Cottonwood Ramada at 17:00 hrs.

https://tinyurl.com/evqrpgotw

We will do our usual setup with various modes and different antennas. We encourage everyone to bring their portable stations and set up and get on the air and make contacts.

Last week we had a a good turnout at the park. Christi (KG7NAD) and myself were the only ones to set up. Troy (K7TJK) was out of town on business and Rick (W9JRF) was home working on various projects around his house. Jay (N1RWY) stopped by along with Joe (N2QOJ), Ron (K7RWE), Richard (N7HX) and Kevin (K9NTZ) was in from Indiana visiting his wife for the weekend. We and a great time and I made the only 2 contacts, one to California and the other one to Brazil. Both were made on CW and 5 watts. We did have some great fellowship and enjoyed our time with each other.

I look forward to seeing you all this coming Friday evening. Remember, its getting cooler in the evening once the sun goes down so if you plan on coming out plan accordingly. Once again, if you would like to bring your portable station please bring it along and set it up. I will be doing another testing session at our monthly QCECG meeting on December 14th starting at 19:00 hrs and I always have my box with me when we are at the park in case someone would like to take a test or upgrade there as well. Have a great week and a safe holiday season.

Dave AC7FF

Topic: 4900 Message: 4900

Who knew?

Father Kolbe was a Franciscan Priest who founded Niepokalanow (City of Mary), a large monastery in Poland dedicated to communications. Fr. Kolbe and his Franciscan brothers published dozens of weekly and monthly periodicals to promote the Roman Catholic faith and devotion to the Blessed Mother in particular. At one point in the late 1930s, circulation exceeded one million copies monthly, making Niepokalanow the largest publisher in Poland. Fr. Kolbe was a Ph.D. level philosopher and trained physicist. In addition to his print operations, he built a religious short-wave radio station in 1938 with the call sign of SP3RN. It is believed that his amateur radio operations were extended also to his monastery in Nagasaki, Japan.
On 26 May 1941 Fr. Kolbe's monastery was shut down by the Nazi SS. Fr. Kolbe was arrested and sent to Auschwitz concentration camp, where he was assigned Prisoner #16670. In July of 1941, ten prisoners were condemned to death because of an escape attempt from the camp. Among the condemned was Francizek Gajowniczek, a Polish Sergeant. Kolbe stepped out of line and offered his life in place of Gajowniczek's. The Nazi commandant accepted the exchange and sent Kolbe to a camp starvation bunker where he was deprived of food and water for nearly two weeks. Maximilian Kolbe died on 14 August 1941, hence our operating frequency of 3814 khz.
Maximilian Kolbe was canonized by Pope John Paul II on 10 October 1982. He is considered the patron saint of the addicted and of amateur radio operators. The National Shrine of Saint Maximilian Kolbe (http://www.marytown.com http://www.marytown.com/) is located in Marytown, IL, in suburban Chicago. Among the many sites with more information isniepokalanow.eu http://niepokalanow.eu/

St. Max is also the patron saint of drug addicts.

Some, XYL's in particular, might say that the amateur radio hobby is like a drug and it certainly can be addicting, so Saint Max may be the best fit to be our patron saint.

Thanks for the history lesson, Bil. I was raised in St. Louis, MO in the Roman Catholic faith, educated by the Nuns of the Sacred Heart through grade school and the Jesuits through high school, so I can relate to your lesson, Bil.

I'd have liked to attend the QC Club breakfast this AM but I was on the sched to call the Mercury Net.

FREE! I have back issues of CQ (to 2013) and QST (to 2011) magazines and I've run out of room! Note - I'm keeping the QST with our Ham Radio Saves Lives bumper sticker on the cover, but you can have the rest! We are advertisers, so our copies are complimentary.

If you would like them, you can come up pick them up (Higley and Ocotillo)! I need to get them out of here in the next day or so, but I don't want to just toss them into the recycle bin.

Write me back and I'll get you my contact info. First come, first served.

Again - FREE!

Hello All,

Many of you may know I keep up with the CDC weekly updates (boring but necessary.) So you are all aware, they missed the boat on the flu vaccine this year – it's always a guess and this year they only got it about 25% correct. The influenza B was spot on, however, the influenza A they put in this year's vaccine has already mutated and the flu vaccine is INEFFCTIVE against the current strain. By the way influenza A is always the more serious one.

So, that means if you have a fever, do us all a favor and STAY HOME!!! If you don't have a real thermometer in your house (and yes those temporal ones do work) get one. Stay vigilant, wash your hands often in any public situation, and stay away from sick co-workers.

Be healthly!

4910. Gathering of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-12-14 18:20:58 UTC
From: Joe Sammartino
Topic: 4687 Message: 4910

Greetings All,

I hope this finds everyone in great spirits and hopefully all of you are getting your Christmas shopping done with a very low level of stress and frustration.

EVQRP will be hosting another Gathering this coming Friday December 15th at 17:00 at Desert Mountain Park. We will gather at the Cottonwood Ramada. We usually go until around 21:30 hrs. For those that may not know, the Cottonwood Ramada is located across from the baseball fields and just Southeast of the restroom building in the back of the park.

https://tinyurl.com/evqrpgotw

We will set up a number of different antennas and radios on different modes. We do encourage anyone with a portable station to dig that station out, dust it off and bring it with you. The Gathering is not a contest and it is not a competition to see how may stations we can contact, its all about getting your gear out and becoming familiar portable operations. It is intended to help you become a better operator which is what you will need to become in an emergency situation. You will learn what your station will do on portable power (batteries) and what you need to do to conserve power when you are off grid. It will also help you see what different antennas will do and how to set them up in the field. I can personally say that I usually go away from these learning something or coming up with a different way of setting up my portable station and making it more efficient.

Last week there was only 2 of us, Rick (W9JRF) and myself. Rick set up his FT-817 along with his Buddipole vertical on 40m and made 2 contacts on Phone. Colorado and South Africa. I set up my FT-817 and my Sotabeams linked (20/30/40/80m) dipole. I made 1 contact on 80m CW in California. Both Rick and I had a great time and I will say once the sun went down it got really cold.

I hope everyone has a great week and I hope to see all of you on Friday evening. Remember to stay radioactive.

Dave, AC7FF

4911. ☢ International Space Station visible tonight ☢

☢ *International Space Station visible tonight *☢

Folks,

Good news! Another opportunity to spot the station tonight for 6 minutes. It will be at a very great height and should be an excellent viewing barring any cloud cover.

Time: Sat Dec 16 6:24 PM
Visible: 6 min, Max Height: 84°
*Appears: 10° above NW **(from 315 degrees)*
*Disappears: 10° above SE **(toward 135 degrees)*

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of the listed locations.

If you are an amateur radio operator, listen in (or work) on these frequencies:

Voice and SSTV Downlink: 145.80 (Worldwide)
Voice Uplink: 144.49 for ITU Regions 2 and 3
VHF Packet Uplink and Downlink: 145.825 (Worldwide) - easiest to hear
UHF Packet Uplink and Downlink: 437.550
UHF/VHF Repeater Uplink: 437.80
UHF/VHF Repeater Downlink: 145.80

Regards,

Joe, N2QOJ

4915. Gathering of the Willing

Yahoo group: Queen_Creek_Hams
Date: 2017-12-17 16:55:51 UTC
From: Joe Sammartino
Topic: 4687 Message: 4915

Good Morning All,

I hope this finds all in good spirits and doing well. Well its hard to believe but in just 8 days from today it will be Christmas. This year sure has flown by. Before you know it we will be at Field Day in June. Speaking of Field Day we are just a little over 30 days from Winter Field Day (WFD). I will be sending out a separate email on that so look for that in the near future.

EVQRP will be hosting another Gathering In the Park this coming Tuesday Evening. We will be meeting at Desert Mountain Park at the Cottonwood Ramada at 17:00 hrs. For those not familiar with the park, we will be in the back of the park. The Cottonwood Ramada is located just East of the baseball fields and just Southeast of the bathroom building.

https://tinyurl.com/evqrpgotw

We plan on setting up a couple of stations running different modes with various antennas.

Last week we had 4 show up at the Gathering. I was the only one who set up a station. I made 2 contacts on CW, 1 in TX and the other was in SC. I set up my 20m,30m,40m linked dipole which has always been a solid antenna along with my FT-817. Troy (K7TJK) showed up after getting off of work and brought his new portable and his Shortwave Radio. We also had Phil (K7TTI) who lives in Queen Valley come out to check it out. Phil showed up to a Radios in the Park (RUSS) back in November. Phil also likes to operate portable and has a portable station as well along with various portable antennas. Additionally Richard (N7HX) showed up as well.

I hope everyone has a great week before Christmas and if I don't see you this coming Tuesday evening at the Gathering I want to wish you and your family a very Merry Christmas and a Happy New Year.

Dave,
AC7FF

Joe, N2QOJ

---------- Forwarded message ----------
From: "Cris McBride" <vandcmcbride@...>
Date: Dec 21, 2017 12:37 PM
Subject: Question re: antennas used
To: <jsammartino@...>
Cc:

Joseph,

I was just talking to Doug WB7TUJ on 7.158 this morning and he mentioned that the QQARC has had some involvement with use or at least describing the Alpha-Delta DD-DX 40/75 m dipole-type antenna.

I am using a 75-m dipole, an IC7300, and an LG AT1000ProII tuner with my ALS-1300 amp and get pretty good coverage and transceiving with it. Doug thought I could/would do better with the Alpha-Delta antenna version, however.

I am wondering if you, or someone you know, has used the Alpha-Delta version and has any comment about how it works or perhaps how it compares with the use of a 62' + 62+ dipole for 75-m?

If you are too busy to respond, that is fine and I understand. I know that people who make things happen are generally pretty busy.

Thank you,

73

Cris McBride

From: Joe Sammartino
Topic: 4921 Message: 4921

Please ignore the Net announcements ---

Due to the holiday, there will be no QCECG Training Net this evening.

There will be an announcement regarding next week's net (or no net) soon.

Merry Christmas and Happy Holidays!

Who is Jean Shepherd?

Jean Parker Shepherd, Jr. (July 26, 1921 – October 16, 1999) was an American storyteller <https://en.wikipedia.org/wiki/Storytelling>, radio and TV personality, writer and actor. He was often referred to by the nickname *Shep*.[1] <https://en.wikipedia.org/wiki/Jean_Shepherd#cite_note-whois-1> With a career that spanned decades, Shepherd is known to modern audiences for the film *A Christmas Story <https://en.wikipedia.org/wiki/A_Christmas_Story>* (1983), which he narrated <https://en.wikipedia.org/wiki/Narration> and co-scripted <https://en.wikipedia.org/wiki/Script_(recorded_media)>, based on his own semi-autobiographical stories.[2] <https://en.wikipedia.org/wiki/Jean_Shepherd#cite_note-Hammond-2>

Born in 1921 on the south side <https://en.wikipedia.org/wiki/South_Side,_Chicago#South_side> of Chicago, Illinois, Shepherd briefly lived in East Chicago, Indiana <https://en.wikipedia.org/wiki/East_Chicago,_Indiana>, and was raised in Hammond,
Indiana <https://en.wikipedia.org/wiki/Hammond,_Indiana>, where he graduated from Hammond High School <https://en.wikipedia.org/wiki/Hammond_High_School_(Indiana)> in 1939.[2] <https://en.wikipedia.org/wiki/Jean_Shepherd#cite_note-Hammond-2> The movie *A Christmas Story <https://en.wikipedia.org/wiki/A_Christmas_Story>* is loosely based on his days growing up in Hammond's southeast side neighborhood of Hessville <https://en.wikipedia.org/wiki/Hessville>. As a youth he worked briefly as a mail carrier in a steel mill and earned his Amateur
radio <https://en.wikipedia.org/wiki/Amateur_radio> license (W9QWN) at age 16, sometimes claiming he was even younger. He sporadically attended Indiana University, but never graduated. Shepherd was a lifelong Chicago White Sox fan.

During World War II, he served stateside in the U.S. Army Signal Corps.[2] <https://en.wikipedia.org/wiki/Jean_Shepherd#cite_note-Hammond-2> Shepherd then had an extensive career in a variety of media.

Read his full biography at Wikipedia:

https://en.wikipedia.org/wiki/Jean_Shepherd

I hope you enjoy the article about one of our own.

Merry Christmas,

Joe, N2QOJ

4923. ☢ International Space Station visible tomorrow mor ning ☢

Yahoo group: Queen_Creek_Hams
Date: 2017-12-26 04:24:12 UTC
From: Joe Sammartino
Topic: 4923 Message: 4923

☢ *International Space Station visible tomorrow morning *☢

Folks,

Good news! Another opportunity to spot the station tomorrow morning for 6 minutes. It will be at a very good height and should be an excellent viewing barring any cloud cover.

Time: Tue Dec 26 6:23 AM
Visible: 6 min, Max Height: 46°
*Appears: 10° above SSW **(from 206 degrees)*
*Disappears: 11° above ENE **(toward 68 degrees)*

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link
and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of thelisted
locations.

If you are an amateur radio operator, listen in (or work) on these frequencies:

Voice and SSTV Downlink: 145.80 (Worldwide)
Voice Uplink: 144.49 for ITU Regions 2 and 3
VHF Packet Uplink and Downlink: 145.825 (Worldwide) - easiest to hear
UHF Packet Uplink and Downlink: 437.550
UHF/VHF Repeater Uplink: 437.80
UHF/VHF Repeater Downlink: 145.80

Regards,

Joe, N2QOJ

4927. ARRL's "The Doctor is In" Podcast - This week, "Loop Antennas"

Yahoo group: Queen_Creek_Hams
Date: 2017-12-26 05:38:13 UTC
From: Joe Sammartino
Topic: 4927 Message: 4927

Some of you may be familiar with the ARRL's QST column, "The Doctor is In".

The Doctor is none other than ARRL's Joel Hallas, W1ZR, who has been answering questions about Amateur Radio in QST's "The Doctor is In" column since 2006.

Hosted by QST Editor In Chief Steve Ford, WB8IMY, the ARRL The Doctor is In podcast is a twice-monthly audio podcast that answers YOUR questions about Amateur Radio's technical challenges.

This week's topic is "Loop Antennas".

Download (or stream) the mp3 from these links:

STREAM:

https://www.dropbox.com/s/4tb2sreim06xhje/Feb_21_2017_-_Loop_Antennas.mp3?dl=0

Download:

https://www.dropbox.com/s/4tb2sreim06xhje/Feb_21_2017_-_Loop_Antennas.mp3?dl=1

The length in time of these podcast usually ranges from 15 to 25 minutes.

Please let me know if you have any difficulty accessing this content.

I do welcome feedback. I would like to know if this podcast feature is of any value to our members.

Regards, Joe, N2QOJ

4928. Dangrous Flu Season Update

Yahoo group: Queen_Creek_Hams
Date: 2017-12-29 02:03:01 UTC
From: Michelle W
Topic: 4928 Message: 4928

Hi All,

Please be careful, wash your hands often, be vigilant of people who are ill.

As we speak a new colleague of mine rushes to the hospital, her father was admitted with influenza A, was on life support and is doing very poorly.

This is no joke!!!

Michelle Waller RN aka KG7NCW

Flu Widespread with Highest Number of Seasonal Cases Ever Reported by December
ADHS Public Health Officials Encourage Everyone to Get Vaccinated

PHOENIX – Flu is widespread in Arizona with 2,629 more cases reported than this time last year, the Arizona Department of Health Services announced today. As of Dec. 20, there have been 2,976 cases of flu reported compared to 347 for the same time period in 2016, which is a 758 percent increase in flu activity.

Hello Local Area Hams,

WB7TUJ and KC7MMI will be hosting a new net on Tuesday evenings.

Here are the details:

Who: Calling all amateurs
What: East Valley 6-meter Net
When: 1930hrs (730pm) Tuesdays starting January 9th
Where: 52.525MHz (6M FM calling frequency) ANTENNA MUST BE VERTICAL
Hosts: WB7TUJ and KC7MMI

Why: To generate interest in the 6M band and bring awareness to its usefulness as additional spectrum for FM simplex communications

This quarter wave design is cheap and works well for 2, 70 cm, and 6 meter.

I have stripped Romex and used cut the solid wire cut to size.

Just Google images for lots more.

Hi Andrew,

I intend to assemble a 1/4 wave vertical dipole, L config, with 2 Buddipole standard telescoping whips (13” collapsed, 66” max) and a VersaTee.

I hope to do this in the next few days and I’ll LYK how that works.

Thanks for the great response to my question. Love it when a plan comes together.
You've given me enough info so I can build a few configurations which I will try over the coming weeks on the net. Based on feedback from net participants I am sure I'll have an idea on which is the keeper.
Happy New year all.

From: Michelle W
Topic: 4928 Message: 4939

A sad update, my friend’s father passed today. Cause of death with be complications of Influenza A.

From: Michelle W [mailto:rnwaller@moparmanuals.com]
Sent: Thursday, December 28, 2017 7:03 PM
To: 'Queen_Creek_Hams@yahoogroups.com'; 'queen_creek_tech_talk'
Subject: Dangrous Flu Season Update

Hi All,

Please be careful, wash your hands often, be vigilant of people who are ill.

As we speak a new colleague of mine rushes to the hospital, her father was admitted with influenza A, was on life support and is doing very poorly.

This is no joke!!!

Flu Widespread with Highest Number of Seasonal Cases Ever Reported by December
ADHS Public Health Officials Encourage Everyone to Get Vaccinated

PHOENIX – Flu is widespread in Arizona with 2,629 more cases reported than this time last year, the Arizona Department of Health Services announced today. As of Dec. 20, there have been 2,976 cases of flu reported compared to 347 for the same time period in 2016, which is a 758 percent increase in flu activity.

My thoughts and prayers to your friends family and all who knew him. I was on the 2100Net last night and I believe well over 1/2 the check-ins either had it or were recovering from it, myself included. It is a RINGER this year especially since apparently according to one of our fellow operators, the flu shot this year was only about 10% effective. That's heresay of course but that was he heard.

Gary,

Your flu shot information is partly correct, the Influenza B part is effective, the Influenza A is not – the virus has already mutated.

Thank you for the thoughts and prayers – I will pass them along.

4943. ARRL's "The Doctor is In" Podcast - This week, "Handheld Antennas"

Yahoo group: Queen_Creek_Hams
Date: 2018-01-04 06:40:38 UTC
From: Joe Sammartino
Topic: 4943 Message: 4943

Some of you may be familiar with the ARRL's QST column, "The Doctor is In".

The Doctor is none other than ARRL's Joel Hallas, W1ZR, who has been answering questions about Amateur Radio in QST's "The Doctor is In" column since 2006.

Hosted by QST Editor In Chief Steve Ford, WB8IMY, the ARRL The Doctor is In podcast is a twice-monthly audio podcast that answers YOUR questions about Amateur Radio's technical challenges.

This week's topic is "Handheld Antennas".

Download (or stream) the mp3 from these links:

STREAM:

https://www.dropbox.com/s/s3vrrzaveerylfc/December_21_2017_-_Handheld_Antennas.mp3?dl=0

Download:

https://www.dropbox.com/s/s3vrrzaveerylfc/December_21_2017_-_Handheld_Antennas.mp3?dl=1

The length in time of these podcast usually ranges from 15 to 25 minutes.

Please let me know if you have any difficulty accessing this content.

I do welcome feedback. I would like to know if this podcast feature is of any value to our members.

Regards,

Joe, N2QOJ

Hi Joe,

Yes, I did find this information of interest, so please keep general interest QST’s like this coming.

I found a few other interesting amateur radio related podcasts on iTunes as well.

Nice thing about podcasts is that they don’t produce eyestrain, hi.

4945. antenna analyzer for 440?

Yahoo group: Queen_Creek_Hams
Date: 2018-01-05 00:15:01 UTC
From: Jay
Topic: 4945 Message: 4945

Greetings all.
With the completion of my 144 MHz EME project, I need to move to the 432 MHz EME system.

Does anyone have an analyzer that has the ability to measure in the 440 band?
If so, could I borrow it for 1/2 a day? I need to measure 1, possibly 2 antennas once I get them mounted.

Thanks

- Jay N1RWY

Jay:

I have an MFJ-269C that analyzes UHF. I'll have it at the GOTW this evening, or we can make different arrangements to get it to you if necessary.

From: Joe Sammartino
Topic: 4947 Message: 4947

If you are interested in purchasing this radio, do not reply to the Group but follow directions in the post.

Yaesu FT-450D
$450
Mesa, AZ

This is a used FT-450D HF/6m radio in great condition and has had the firmware update to give it all the correct 60 meter frequencies. It's spent about 99% of its life in a Pelican Storm case (not included). Comes with power cable (short but with power pole), mic, and manual. Please email me at benjaminrayrussell@... if interested. If you live in the east valley, I will personally deliver to you (must be ham). I want to sell because there is another HF radio I'd like to buy. Thank you!

4950. Antenna Installer

Yahoo group: Queen_Creek_Hams
Date: 2018-01-05 16:38:47 UTC
From: KI7PBR
Topic: 4950 Message: 4950
Attachments: 1 described; binary payloads are missing from this source WARC

IS the anyone in this group that installs antennas? I purchased the Diamond X-30 and got approval from the HOA to mount it to the rear peak of my house (see attached photo). I am not physically able to do the install and I am looking for someone that can help me out. The cable routing should be simple, into the attic thru the vent at the peak and accross the attic and drop it from the ceiling into my "Radio room". A financial agreement obviously can be arranged!

I live in South Chandler around Arizona Rd and Chandler Hts Rd.

Gary,

There was no attached photo.

Where will this be mounted? Eave, Peak, flat top, what?

Do you have ladder, tools, etc. on hand or does someone need to bring this stuff?

Joe

Hi Gary,

I can offer two suggestions. The first would be to bolt brackets like these through the wall, just below the vent, and install a 5’ or so mast in them to attach the X-30 to.

https://smile.amazon.com/Inch-Heavy-Y-Shape-Antenna-Mounts/dp/B0045DYPT0/ref=sr_1_1?ie=UTF8&qid=1515171588&sr=8-1&keywords=antenna+standoff+bracket <https://smile.amazon.com/Inch-Heavy-Y-Shape-Antenna-Mounts/dp/B0045DYPT0/ref=sr_1_1?ie=UTF8&qid=1515171588&sr=8-1&keywords=antenna+standoff+bracket>

The second could be to secure the bottom of a 10’ chainlink fence rail tube to the patio cover and the 2 x 6” at the side of the roof peak, with maybe another short section of mast on top of the 10’ tube.

The X-30 is a fine performing, smallish antenna.

Your input is appreciated.

Unfortunately, a lot of people may read your input and infer tha Gary is looking for advice - which he is not. So, then this topic will end up with many, many emails having nothing to do with his original request.

People rarely reference the original message.

Thanks,

Joe, N2QOJ

Thanks Joe. Yes, I understand. Sad but true. I'd have replied directly to Gary, but didn't see his address.

The way group mail headers, To:'s & Reply To:'s are these days, I find it hard to know for sure where a reply will end up, though it appears that this reply will go directly, and only, to you (I hope).

4962. Family Communications Plan

Yahoo group: Queen_Creek_Hams
Date: 2018-01-10 04:52:06 UTC
From: Joe Sammartino
Topic: 4962 Message: 4962
Attachments: 1 described; binary payloads are missing from this source WARC

During the weekly QCECG Training Net, The question "What is your communication plan for your family if landlines and cell service is down?".

We got a lot of silence in response to that question.

I've attached the " Family Emergency Communication Plan" starter document from FEMA for your review. Obviously, as amateur radio operators, we can improve on this starter plan with our own radio equipment and repeater systems.

Take the time to review the document, modify it to your family's needs and exercise it frequently.

S9WWWbI_>

Question: What is a linked repeater system?

Answer: A multiple linked repeater system can provide radio coverage over
long distances and large areas.

In applications where the distance has become too long or the coverage
provided is too restricted for a single repeater, more repeaters are used
to enable radio users to communicate over a greater distance. At each site,
multiple radios may be used to provide local coverage as well as continue
the link to the next site.

Check out these great email attachments.

From: Joe Sammartino
Topic: 4923 Message: 4970
Attachments: 1 described; binary payloads are missing from this source WARC

☢ *International Space Station visible tomorrow morning *☢

Folks,

Good news! Another opportunity to spot the station tomorrow morning for 5 minutes. It will be at a very good height and should be an excellent viewing barring any cloud cover.

Time: Mon Jan 15 6:43 AM
Visible: 5 min, Max Height: 77°
Appears: 13° above NW (from 315 degrees)
Disappears: 23° above SE (toward 135 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Remember, these times are based on a viewing site from the Mesa area. If you would like to generate times from your specific city or town, visit the link
and follow the instructions.

If your specific city or town isn’t listed, pick the closest one. The space station is visible for at least a 50 mile (80 km) radius around each of thelisted
locations.

If you are an amateur radio operator, listen in (or work) on these frequencies:

Voice and SSTV Downlink: 145.80 (Worldwide)
Voice Uplink: 144.49 for ITU Regions 2 and 3
VHF Packet Uplink and Downlink: 145.825 (Worldwide) - easiest to hear
UHF Packet Uplink and Downlink: 437.550
UHF/VHF Repeater Uplink: 437.80
UHF/VHF Repeater Downlink: 145.80

4973. Photos of ham radio activities?

Yahoo group: Queen_Creek_Hams
Date: 2018-01-15 16:35:22 UTC
From: wmunsil@...
Topic: 4973 Message: 4973

Was someone in this group looking for photos of ham radio activities?

I've good scads of old photos taken during some of my zillions of HAM TV demos.

I'm not an expert but I play one - on HAM TV.
Bil Munsil
K1ATV HAM TV
Mesa AZ
Hams should be SEEN as well as heard.
More than 30 years on and off HAM TV in Arizona.

4974. Should You Repair Your Own Phone or Laptop?

Yahoo group: Queen_Creek_Hams
Date: 2018-01-18 17:19:09 UTC
From: Joe Sammartino
Topic: 4974 Message: 4974
Attachments: 1 described; binary payloads are missing from this source WARC

Recently, a friend asked if he should replace his own iPhone battery. The answer is based on the individual's capabilities, resources, and experience. The following article can help you decide in which direction you may want to go.
Enjoy, Joe
Should You Repair Your Own Phone or Laptop?
<https://www.howtogeek.com/339252/should-you-repair-your-own-phone-or-laptop/>
by Harry Guinness <https://www.howtogeek.com/author/harryguinness/> on January 18th, 2018

While it can be tempting to take a crack at repairing your own laptop, phone, or tablet, there are times to do it…and times to leave it to the pros.

Every time I've had a problem with some of my tech gear, I've been tempted to grab a pentalobe screwdriver and dig in. Unfortunately, each time, when I've really looked at the options, I've realized it's probably been a bad idea. Let's talk about when (and why).

Repairing Your Own Gadgets Can Void the Warranty

Before getting started in, lets get one thing out of the way. You can open the back of most laptops without voiding your warranty, but that doesn't apply to phones and tablets. And once you start altering or removing things on the inside, you'll almost certainly void your warranty—if you're unsure, check the warranty of your specific device for more information.

Take this example from Apple's Mac warranty:
<https://www.apple.com/legal/warranty/products/embedded-mac-warranty-us.html>
:

This Warranty does not apply:… (f) to damage caused by service (including upgrades and expansions) performed by anyone who is not a representative of Apple or an Apple Authorized Service Provider ("AASP"); (g) to an Apple Product that has been modified to alter functionality or capability without the written permission of Apple.

In theory, if you leave things exactly as you found them, the manufacturer is unlikely to know that you've done anything to your computer, but most warranties makes it clear that modifying things can void your warranty. If it's still covered, you probably shouldn't take the risk. Which leads us to our first situation.
Is Your Device Under Warranty?

If your device is under warranty and the problem is due to hardware failure rather than user error, the manufacturer should fix it for free. Contact

the manufacturer, explain the problem, and they'll advise you on how to proceed.

Most manufacturers offer a one year warranty, but in certain countries you might be entitled to a longer warranty. For example, in Ireland and England, customers are entitled to a a refund, repair, or replacement of any defective product within six years of the sale.

Is Your Device Covered by an Extended Warranty or Other Insurance?

Should You Buy Extended Warranties?

<https://www.howtogeek.com/174032/htg-explains-should-you-buy-extended-warranties/>

Many shops and manufacturers offer extended warranties (although they'regenerally not a great deal <https://www.howtogeek.com/174032/htg-explains-should-you-buy-extended-warranties/>). For a fee, you can extend your warranty from one to two or three years. You might also get a discount on accidental damage repairs like you do with Apple's AppleCare+.

If you've paid for an extended warranty and the problem is a hardware defect, let the manufacturer fix it. You've already paid for them to do it.

If it's down to accidental damage, things get a little more complicated. Accidental damage repair fees can be pretty steep (even with an extended warranty), and there are plenty of computer problems you can fix yourself for cheaper. However, going it alone will probably invalidate the extended warranty you've already paid for. It's a judgement call for you to make, although I'd probably lean towards getting the manufacturer to fix things, because if a later hardware fault develops and you've lost your extended warranty, you'll be kicking yourself.

In addition, keep in mind that some credit cards offer an extended warranty for any device you purchase with them. You'll need to pay for the repairs yourself but, if you qualify, they'll reimburse you. Your laptop or phone might also be covered under the terms of your home insurance policy for accidental damage and theft. Look into these options before getting your hands dirty—even if you don't have an extended warranty, you might be able to get reimbursed for that repair.

What Does An Out of Warranty Repair Cost?

If you're out of warranty, you'll still want to see what it costs to get it repaired by a professional—often, it's only slightly more than replacing it yourself, due to the cost of parts. For example, A Galaxy S7 screen repair would cost you about $157 for the parts <https://www.ifixit.com/Guide/Samsung+Galaxy+S7+Screen+Replacement/90298>. Or, you get it repaired professionally for just a bit more—$190 from UBREAKIFIX <https://www.ubreakifix.com/samsung-repair/samsung-galaxy-s7-repair>, a local authorized Samsung service center in Los Angeles, or $200 at Best Buy

<https://www.bestbuy.com/site/geek-squad/cell-phone-services/pcmcat286500050002.c?id=pcmcat286500050002>.
(Note that if it’s out of warranty, you don’t absolutely have to go to an authorized repair center, but you definitely should make sure the repair shop seems credible and experienced—check your manufacturer’s web site for repair centers they recommend.)

Whether you want to fix it yourself or let professionals do it, is up to you. Check out the terms the pros offer. Often, repair shops will offer a one year warranty on the part they replace. With less than $50 in the difference for this hypothetical screen repair, I’d lean towards letting the pros do their thing just for the peace of mind and the warranty. If you’re on the fence, get a few quotes and then decide.
Are You Capable of Fixing It Yourself?

The best way to work out whether you can repair your devices is to head to iFixit <https://www.ifixit.com/> and check out the relevant guide for your problem. They have one for replacing every major component in every major modern device. They also sell the tools and parts you need to get the job done.The final question to ask is whether you are even capable of fixing it yourself. If you’ve been building your own gaming PCs <https://www.howtogeek.com/howto/the-geek-blog/building-a-new-computer-part-1-choosing-hardware/>
for
over a decade, you’re going to be a lot more comfortable fiddling around with the insides of your gear than someone who’s opening a case for the first time. Don’t overestimate your abilities. While most things can be replaced in modern laptops, it’s notoriously awkward to do. The race for ever thinner and lighter gear means you might end up needing to replace five ports just to fix one.

Look through the guide, check out the cost of parts and tools, and honestly ask yourself if it’s worth doing. The answer might well be yes! But in other cases, the risk might not be worth it.

The aforementioned Galaxy S7, for example, is rated “Very Difficult” on iFixit. For less than $50, that seems like a good deal for professional service. Replacing a battery in a MacBook, though? Easy peasy <https://www.ifixit.com/Guide/MacBook+Pro+13-Inch+Unibody+Mid+2009+Battery+Replacement/1332>
.
Know When to Give Up and Get a New Device

At some point, it’s better to recycle your device than repair it. If your six year old laptop is showing all the signs of a logic board failure, then it’s probably time to just give up. You could buy an old model secondhand with a screen failure and salvage the logic board, but then we’re really diving in the deep end. Computers and phones don’t last forever, and at some point, the cost of getting it repaired is more than the device itself is worth—especially considering it’ll become truly outdated soon enough anyway.

4975. VHF contest this weekend.

Yahoo group: Queen_Creek_Hams
Date: 2018-01-19 04:50:29 UTC
From: Jay
Topic: 4975 Message: 4975

The ARRL January 2018 VHF Contest will be held this weekend. This is a GREAT opportunity for all hams to get on the air to have fun, try operating on VHF/UHF without using repeaters, and learn more about VHF/UHF operating. For full details, please refer to: >>>>http://www.arrl.org/january-vhf<<<<;

I. Date/Time: 11AM PST Saturday 20 January until 8PM PST Sunday, 21 January 2018

II. Frequencies: ALL amateur radio frequencies 50 Mhz (6 meters) and up, including 144-148 Mhz (2 meters), 222-225 Mhz (135 cm), 420-450 Mhz (70 cm), 900 MHz (33cm), 1200-1300 Mhz (23 cm), AND all amateur frequencies higher than that. Modes: SSB, FM, CW, AM, Data including FT8. Note: No use of repeaters permitted!

III. Commonly used frequencies:

a. 6m: 50.125 Mhz USB; 50.525 Mhz FM Simplex; 50.090-50.100 CW; 50.313 FT-8
b. 2m: 144.200+/- Mhz USB; 146.52, 146.55, 146.58, 146.61 Mhz FM Simplex; 144.200+/- Mhz CW
c. 135cm: 222.1 Mhz USB/CW; 223.5 Mhz FM Simplex
d. 70cm: 432.1 Mhz USB/CW; 446.0 Mhz FM Simplex
e. 33cm: 902.1 Mhz SSB/CW; 902.1, 903.1, 927.5, 927.6 Mhz FM Simplex
f. 23cm: 1296.1 Mhz SSB/CW; 1269 Mhz FM Simplex

IV. Typical antenna polarization:
a. USB/CW/FT8 = horizontal
b . FM = vertical
c. NOTE!! Use whatever antennas you have available, even if not of the preferred polarization! (Old adage: a poor antenna is better than no antenna!)

V. A Valid QSO requires exchange of full callsigns, grid locator, & acknowledgement. (Note: Everyone in Queen Creek is in Grid "DM43")

VI. Scoring:
a. QSOs: 1 point per QSO on 6/2 meter bands; 2 points per QSO on 135/70 cm bands; 4 points per QSO on higher bands
b. Multiplier: Total of all Grids worked on each band

VII. Log Submission:
a. Use: http://b4h.net/cabforms/arrlvhfjan_cab3.php
b. Please submit also to the 3830 reflector for contest score rumors: The form for reporting your score to the 3830 reflector will be available as soon as the contest starts at >>>>www.3830scores.com<<<<;

VIII: Questions?
Send e-mail query to: Jay, N1RWY <whereisjay@...>

IX. Have fun, and spend a bit of time with >>>>http://www.arrl.org/
january-vhf<<<< ;

4976. ARRL's "The Doctor is In" Podcast - This week, "HF Mobile Antennas"

Yahoo group: Queen_Creek_Hams
Date: 2018-01-19 15:01:46 UTC
From: Joe Sammartino
Topic: 4976 Message: 4976

Some of you may be familiar with the ARRL's QST column, "The Doctor is In".

The Doctor is none other than ARRL's Joel Hallas, W1ZR, who has been answering questions about Amateur Radio in QST's "The Doctor is In" column since 2006.

Hosted by QST Editor In Chief Steve Ford, WB8IMY, the ARRL The Doctor is In podcast is a twice-monthly audio podcast that answers YOUR questions about Amateur Radio's technical challenges.

This week's topic is "HF Mobile Antennas". Download (or stream) the mp3 from these links:

STREAM: https://www.dropbox.com/s/msptxdp66h137i5/October_20_-_HF_Mobile_Antennas.mp3?dl=0

DOWNLOAD: https://www.dropbox.com/s/msptxdp66h137i5/October_20_-_HF_Mobile_Antennas.mp3?dl=1

The length in time of these podcast usually ranges from 15 to 25 minutes. Please
let me know if you have any difficulty accessing this content.

I do welcome feedback. I would like to know if this podcast feature is of any value to our members.

Regards,

Joe, N2QOJ

Is simplex Fast Scan HAM TV allowed in the VHF/UHF contest?

I'm not an expert but I play one - on HAM TV.
Bil Munsil
K1ATV HAM TV
Mesa AZ
Hams should be SEEN as well as heard.
More than 30 years on and off HAM TV in Arizona.

4978. Chirp

Hi Joe,

I tried Chirp long ago and didn’t care for it. Sounds like it’s come a long way since.

I have RT Systems programmers for my many Icom, Kenwood & Yaesu radios, plus the Alinco DJ-G29T, and they can output tab or csv files.

My data files are extensive for repeaters in AZ plus various agencies and miscellaneous freqs.

If you’ll tell me what radio you want a file for, so things like memory name length and group schemes are compatible, I’ll be happy to share a file with you.

Hi Dennis,

I found out after I sent the email, that Chirp integrates with a directory, you type in where youre located, how many miles around you want and it displays all that it can find.

However, the programming cable doesnt work with my PC, did a search and found a blurb on how to install a driver for it. Still doesnt work.

The radio is Btech UV-5X3, for what I need it for today, Ill just manually input.

Thanks for your help.
